KING CAST COOK STOVE

FOR COAL OR WOOD
MADE OF HIGHEST GRADE
PURE PIG IRON
HAS THE CELEBRATED
DUPLEX REVOLVING GRATES
LARGE
POUCH FEED DOOR
FOR
FUEL OR FOR BROILING.
HAS
LARGE OVEN
18 INCHES WIDE, 18 INCHES DEEP
10¾ INCHES HIGH
A GUARANTEED PERFECT
BAKER.
CAN BE FURNISHED WITH RESERVOIR.

Thoroughly modern in design, and equipped with all the essential features of a high-grade cook stove. The smooth, even surfaces lend attractiveness to the general design and make the stove easy to blacken and keep clean.

OVEN. Oven has ample capacity, and is heated by two large, easy working and easily cleaned flues, the baking qualities being guaranteed. Has wire woven racks.

TOP PLATES are cut into four sections, which make them easy and cheaply replaced and prevents cracking, as allowance is provided for contraction and expansion.

COVERS are made in two pieces, and have reinforced centers, which is the highest possible construction, and they have stood the test for years. We guarantee them not to crack or warp.

FIRE-BOX is oval, and all linings are made unusually heavy for a medium-priced cook stove. Has the popular single-wall fire back. The Bottom grate is duplex, reversible for burning wood.

RESERVOIR—Heavy cast-iron, white enamel lined, of good capacity and rust proof.

All stoves blackened, polished, securely crated and shipped direct to you from factory in Northwestern Missouri.

S-6022—King Stove—Without Reservoir; 18x18x10¾ in. Oven; Top 25x30½ in.; Weight 225 Pounds. Price $31.95
S-6023—King Stove—Without Reservoir, 20x20x11½ in. Oven; Top 26x32½ in.; Weight 245 Pounds. Price $37.50
S-6024—King Stove—With Reservoir; 18x18x10¾ in. Oven; Top 25x37 in.; Weight 275 Pounds. Price $40.75
S-6025—King Stove—With Reservoir; 20x20x11½ in. Oven; Top 26x39 in.; Weight 295 Pounds. Price $43.50

LIBERTY STEEL COOK STOVE

SATISFACTION AND SAFE DELIVERY GUARANTEED

$15.25 and $17.25

AN IDEAL STOVE FOR
SHEEP RANCHES AND
FOR
CAMPING PURPOSES.
STRONGLY AND WELL
CONSTRUCTED IN EVERY DETAIL
GUARANTEED
TO BAKE PERFECTLY

Our "Liberty" Steel Cook is a well-built and serviceable steel cook stove, is used largely on sheep ranches and for camping outfits.

THE TOP is of heavy cast iron, with extension end shelf. Ample room is provided for expansion and contraction of cross-pieces and lids. The Covers are smooth, and in one piece. The Oven Door is steel-lined, and drops down the same as on a range; also combination "drop down" draft door and register slide.

THE OVEN is well proportioned, with wire oven rack. FIRE BOX is suitable for burning coal or wood. We guarantee this stove to be a perfect baker.

THE LEGS, as shown, are high, allowing the stove to stand in convenient position. We can, however, if so ordered, furnish short legs, so that the stove can be bolted to bottom of wagon bed.

All Stoves are blackened, polished, securely crated and shipped direct to you from factory in Northwestern Missouri.

S-6026—Liberty Stove, Oven 18x18x9 in., weight 95 pounds; four 7-inch covers. Price $15.25
S-6027—Liberty Stove, Oven 15x18x9 in., Weight 125 Pounds; four 8-inch Covers. Price $17.25

GRAND SECURITY CAST COOK STOVE

$37.50
WITHOUT RESERVOIR

$51.50
WITH RESERVOIR

LARGE OVEN SIZE 18x20x11½ INCHES

GUARANTEED PERFECT BAKER

Burns Hard or Soft Coal
Wood or Cobs
A Strictly High Grade Stove
Fully Guaranteed
Mounted on Substantial Sanitary Base
Has Large 10 Gallon
Copper Reservoir

FIRE BOX. The linings are made extra heavy and corrugated to increase their durability. The general shape of the fire box is oval which prevents warping. The grate bars are duplex, reversible for burning wood

ASH PAN. Large bailed ash pan of ample capacity measures 12½x15 and 4 in. Size of pipe collar, 7 inches. All Stoves are blackened, polished, securely crated and shipped Direct to you from Factory in Northwestern Missouri.

OVEN. The oven in our Grand Security is extra large, nearly square, measuring 18x20x11½ inches. Flues are of large capacity, making a perfect baking oven.

TOP PLATES. The main top is cut into four sections, which many years' experience has demonstrated to be the most durable construction. The outer edges, or rim, are extra heavy and have reinforcing ribs that prevent breakage in shipment.

COVERS AND CENTERS. Equipped with two-piece SECURITY COVERS, with re-inforced SECURITY CENTERS. Their construction has stood the test of many years' severe usage. We guarantee them not to crack or warp. The SECURITY ANTI-SCORCH HOT BLAST COVERS can be put on if desired.

POUCH FEED. The pouch feed door cuts very low in front so that coal can be put in easily. The lift-up-style that forms a shield against the heat from top when putting in fuel and prevents the coal from falling on top of the stove.

RESERVOIR. Very large, ten gallon, detachable all-copper reservoir.

DOUBLE END SHELF. This is an entirely new improvement original with us, and very useful. A second shelf is placed just below the top end shelf. A very convenient place in which to put many articles used often about the kitchen stove. Also has a row of heavy cast hooks on extreme edge of top shelf.

IMPERIAL CAST COOK STOVE

$19.95

REMARKABLY FINE STOVE AT A REMARKABLY LOW PRICE.

Our Imperial Cast Cook Stove is an excellent stove for the money. It is manufactured in one of the largest and most modern stove foundries in the United States, where they employ only the very best moulders, and experienced stove mounters; so, in this stove, we can promise you one that is extra well constructed. All castings have a fine, smooth finish, and are fitted perfectly. The cut shows the stove complete, with base set up.

THE TOP has four lids, of the latest design; they are substantial, and are made of the finest smooth stove-plate. Guaranteed not to crack or warp.

OVEN. The oven has ample capacity and is heated by two large, easy working and easily cleaned flues, the baking qualities being guaranteed. Has wire oven rack.

FIRE BOX. The general shape of the fire box is oval and all linings are made unusually heavy for a medium priced cook stove. Has the popular single wall fire back.

All Stoves are blackened, polished, securely crated and shipped direct to you from factory in Northwestern Missouri.

FOOT VISE AND BOLT HEADER

LITTLE GIANT

For Forming, Sharpening and Welding Calks on Horse and Ox Shoes and making Bolt Heads; takes the place of an ordinary vise for Bending and Shaping Hot Iron, combining two machines in one. The Die on which the Calks are formed is of the Best Tool Steel, and shapes the Calk correctly. Sharp or Square Calks are made by turning the steel die around. The Dies adjust themselves to the Shoe, whether it is thick or thin, tapering or straight, and do not hold the shoe by the corner of the dies, like any other arrangement. There are Dies for making Bolt Heads on iron from 13/32 to 21 in. long, 1/4, 5/16, 3/8, 7/16, 1/2, 5/8 and 3/4 in. The Dies can be changed quickly.

	Each
No. 1—With **Shoe Calking Dies** Only. Weight Each about 155 Lbs.	$25.00

MAJESTIC GALVANIZED STEEL WIND MILLS

FOR WOOD OR STEEL TOWERS

The efficiency and durability of steel wind mills is thoroughly established wherever wind motors are used. Years of practical experience have enabled us to produce and place upon the market an article, perfect in design and construction, and at a price within the reach of all. Durability and strength, as well as efficiency, have not been overlooked, and we offer to the trade a line of Wind Mills which we believe cannot be excelled and which we know to be superior to many competing lines.

Great care has been used in designing our mills, to obtain the greatest amount of power with the least amount of friction, and to meet all the requirements of a wind motor in the most direct and simple manner. Strict mechanical principles have been observed and the working parts have been limited to the least number consistent with good results.

These Wind Mills are back geared 2½ to 1; that is, the pump rod makes one stroke each way while the wind wheel revolves two and a half times. Please note that all steel parts are galvanized before being put together, thereby assuring that each part is protected against rust. **The Wind Wheels** are made up in six sections with the exception of the six-foot mill, which has four sections, the six, eight, ten, twelve and sixteen foot sizes have four sails to each section and the ten and fourteen have five. Each section is supported by angle steel. Sails of heavy sheet steel. **The Working Head,** back geared 2½ to 1, is equipped with our new pitman rod mechanism which works pump rod. It travels through a ball bearing which is always in direct line with the pitman, thereby eliminating all friction and side strain. Note illustration carefully as to its simplicity, strength and durability. **Vane** has a simple, yet effective adjustable spring governor which holds vane at proper angle permitting it to develop required velocity, yet causes it to face the lighter winds and obtain full effect. **Brake** is made with a compression spring which keeps an even pressure on band when mill is out of service. It automatically holds the wheel when locked out of the wind. The mill is always in gear and ready to run unless you lock it by pulling the brake out of the wind with the pull-out wire. When mills are ordered with towers, we furnish sufficient pull-out wire and wooden pump rod for the height of the tower ordered When ordered without tower, thirty-two feet of pump rod will be furnished **Be sure, when ordering mill only, to state whether for three or four post tower and for wood or steel.** Proper cap will then be sent for the mill.

Full instructions for erecting mill are sent free. It is therefore not necessary to hire a mechanic as anyone can erect it. We guarantee prompt shipment on all mills and towers. Shipped from factory in Wisconsin.

Ball Bearing, Back Geared Warranted Perfect In Every Way.

Size of Mill to be used on Your Well

The size of mill is determined largely by the size of your cylinder. For a 6-foot mill on a 2½-in. cylinder the depth of well should not be over 40 feet, unless there is considerable water in well. An 8-ft. mill on a 2½-in. cylinder will work successfully in a 100-ft. well. A 10-ft. geared mill with a 2½-in. cylinder will work in a 200-ft. well.

B-2113—Majestic Wind Mill, wheel 6 ft., length stroke 4 and 6 inches. Weight 280 pounds ..... $ 32.50

B-2114—Majestic Wind Mill, wheel 8 ft., length stroke 4, 6 and 8 inches. Weight, 380 pounds 45.00

OVERHEAD PUMP JACKS

Made expressly for belt power; to be placed overhead, or on perpendicular posts or beams. They are made in two sizes and are back geared 4½ to one and 5½ to one. Pump makes one stroke while pulley turns 4½ to 5½ times. The gearing, frame and pulleys are substantially made of the very best materials, all casts are made of rolled material, carefully machine finished, and very accurately fitted, compact in size yet strong and durable in operation. Eight feet of pump pole and necessary bolts furnished free. Tight or loose pulleys can be furnished if desired. Shipped from factory in Wisconsin.

MADE IN TWO SIZES.

B-2135—No. 1 Pump Jack complete with 10x4 inch pulley, 6, 9 and 12-inch stroke, back geared 5½ to one. Weight 90 lbs Price $12.95

B-2136—No. 2 Pump Jack complete with 12x8 inch pulley, 12, 15 and 18-inch stroke; back geared 4½ to one. Weight, 150 lbs. Price 20.95

WIND MILL QUADRANT LEVERS

FOR EITHER PUMPING OR POWER MILLS

It is often necessary to erect the wind mill at a distance from the well or pump. In such cases, to transmit power and motion from pumping mill or pump jack to pump, quadrant levers are used. These levers are alike in form and are connected by two wires which are drawn tight by the take-up bolts in the lower ends. When used with pumping mills these wires must be crossed one to give a lift on the pump rod when the wind mill is on the up stroke. The third arm of one lever is connected to the pump pole of the pumping mill or pump jack, and the third arm of the other lever is connected to a pole leading from the lever to the pump, as indicated in the illustration.

By means of the quadrant levers an ingenious person can make connection with the pump within any reasonable distance and in almost any location, frequently being able to make use of a wind mill where it could not otherwise be used, and sometimes making it possible to set a power mill in a much more desirable location in relation to machines to be operated by it. Furnished with pump connection, 8 feet of wood pump pole, pivot plates and center bolts. Quadrant wire for connecting levers is extra. Shipped from factory in Wisconsin.

B-2137—Wind Mill Quadrant $7.50

B-2138—Quadrant Wire, per 100 foot ..... .50

GALVANIZED WINDMILL TOWERS

Our Four Post Galvanized Steel Towers are made in four styles or weights, each properly proportioned for the mill which it is designed to support. They are thoroughly braced in every direction in order to obtain the best results and the strongest structure. Four anchor posts of heavy angle steel are furnished with each tower so that they may be properly secured to the foundation. Full and complete directions for erecting the towers are sent with each one. The price include anchor posts, platform, pull-out lever, and steel ladder. Shipped from factory in Wisconsin.

Majestic Elevator Potato Digger

Co-Operative Price

$124.50

"EVERY DIGGER GUARANTEED"
HAS 32-INCH SHOVEL.

The "Majestic" Potato Digger is constructed by skilled workmen of the very best of steel and malleable iron, making it light, durable and strong. Two good horses, weighing 2,800 pounds or more, can handle it perfectly, although it is strong enough to use with four.

THE SHOVEL is 32 inches wide, and can be raised or lowered to meet any conditions. Its position can be altered 7-16 of an inch by one notch of the quadrant. The controlling lever is within easy reach of the operator on the seat.

THE ELEVATOR APRONS are made of ⅝ inch spring steel and formed so that one link is up and the other down when hooked together alternately. This action breaks up the dirt as it comes from the shovel. The front apron is 4 feet 5 inches long, and runs back twice as fast as the machine moves forward, spreading the dirt on the apron one-half as thick as it comes from the shovel. Two oblong sprockets on either side shake out the dirt. The back apron is 2 feet 7 inches long, and is also equipped with shakers. There is a drop of 11 inches from the front apron to the back one, making the jarring loose and separation of the dirt certain.

THE DRIVE WHEELS are 36 inches in diameter, and have 3-inch, half oval tires. Fitted to these are the lugs and the clutch. The clutch is made of malleable iron, and fitted with 1 inch cold rolled steel pins, case hardened, which engage the gear on each side of the machine, and start the elevator aprons the moment the machine is in motion. The clutch is non-breakable, and cannot get out of order, nor will it allow the machine to jar into gear when being hauled to and from work.

LUBRICATION is furnished by force feed grease cups in all the principal boxes, and spring top push oilers on the wheels, well protected from dust and dirt. THE SEAT can be adjusted to suit operator. ON STEEP HILLS the back end of rear apron can be lowered at will.

A STONE ATTACHMENT is part of the equipment of each machine, to be attached to back of shovel for work in stony land. This is easily attached by removing the two ⅞ inch bolts that hold the front rolls, setting the rolls back in nose iron, and bolting the stone fingers to the shovel blade.

THE POLE is so attached that the team has absolute control of the front wheels, preventing slewing on rolling land, and permitting backing if obstructions are met with.

ALL MACHINES are equipped with tongue, doubletrees and neckyoke, wrench and oil can. Shipping weight about 960 pounds. Shipped direct to you from factory near Chicago.

ILLUSTRATION SHOWS COMBINED PLANTER AND DIGGER.

PLANTER AND DIGGER

Schofields Potato Planter and Digger is the simplest, most practical and reliable Potato Planter and Digger on the market, and we guarantee it to give complete satisfaction.

There is perhaps no machine so well adapted to the purpose as the Scofield Digger and Planter. Every farmer who is raising potatoes to any extent will appreciate the possibilities of this machine in use on their farm. Hundreds of planters and diggers of different types have been devised without success and the Scofield is unquestionably the most popular type in use today. The new model we illustrate herewith has every late improvement known to potato planting and digging machinery. There is not a poor feature embodied in the make up of the Scofield. The fact that the machine is interchangeable to either a planter or digger makes it exceptionally valuable to anyone who is engaged in the raising of potatoes even in a small way. We recommend the purchase of the complete machine in every instance for you will find you will have use for the digger shortly after you have used the planter. We will, however, supply the machine separately if desired, as shown in the price list below. The combination is very simple to handle. When you want to use the machine as a digger, simply remove the discs and hopper and place the digging shovel in position and you are ready for digging potatoes. A few minutes time adapts the machine to either use.

ILLUSTRATION SHOWS PLANTER

Very easy to operate and nothing to get out of order. Any boy can handle this machine and do the best kind of work. Beats any machine ever put out and it will pay for itself many times over. Does the work good and does it quick.

AS A PLANTER. When used as a planter, the machine marks, drops and covers all at the same time. Accurate dropping is assured and planting always is done much better than it possibly could be done by hand. This machine is equipped with a tubular axle and wheels can be set, any distance apart desired. It will plant 13, 16 or 19 inches apart in a row by using different size sprocket wheels which are furnished with each planter. The distance between wheels determines the distance between rows. Steel detachable chains are used and conveyor chain is malleable iron with detachable links. It will plant any depth from 3 to 5 inches by simply raising or lowering bearing plate. Better work cannot be done than will be done with a Scofield Planter. You can buy it for planting alone if you wish.

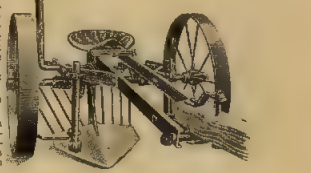

ILLUSTRATION SHOWS DIGGER ONLY.

Put in your next crop with a Scofield Planter.

AS A DIGGER. When used as a digger the planting attachments are removed and the digger is placed in position as shown in the bottom illustration. This attachment can be set to run any depth desired and will not run too deep or too shallow. The digging attachment is made entirely of iron and steel and will give satisfactory service in every respect. The seat being left in position when the planter is removed enables the operator to ride when digging.

The combination planter and digger is made of very best grade of material throughout. All parts are iron and steel except pole. This is a machine that with ordinary care should last a life-time.

Prices quoted are for either planter and digger combined or for planter and digger separately. Shipped direct to you from factory in Northern Illinois.

"AGITATOR" Broadcast Seeder

We consider this Seeder the best Agitator Broadcast Seeder made. It is constructed of good materials throughout and we will guarantee it to give you complete satisfaction in every way.

Hopper is 11 feet long, very deep, giving great capacity. The sides are U-shaped and securely bolted to three partitions inside of hopper, all fitted with oil tubes for oiling axle. The Agitators on axle are adjustable and the grain is sown on scattering board under hopper so that equal distribution is insured, the amount sown being regulated by feed lever, with gauge attached to front of hopper, which is close behind the tongue bracket, which prevents breakage. Axle is made of steel 1¼ inch, is divided at center and each wheel turns independent of the others throughout the hopper. Steel wheels—36 inches high and fitted with 2½ inch tires, with right wheel keyed to axle and left idle. Grass seeder can be furnished if desired, as shown below, fitted with deflecting seed board, which is attached in the rear and is driven by chain direct from the axle and can be thrown in and out of gear independent of the grain feed, also fitted with gauge showing the amount of seed sown, which may be changed while sower is in motion. Doubletrees, singletrees or neckyoke not furnished. Shipped from Indiana factory.

B-2543—Agitator Seeder, weight about 375 pounds $39.95
B-2544—Agitator Seeder with Grass Seed Attachment weight about 415 lbs. 45.95

COMBINATION CLOD CRUSHER Pulverizer and Land Roller

Our combination Clod Crusher, Pulverizer and Land Roller crushes clods, pulverizes the soil, does not pack the surface, but leaves it in fine mellow condition for perfect seed bed. Helps the soil hold moisture. Great help to spring wheat and alfalfa seedings, as it gently packs the seed bed.

It is made in three sizes and two styles. Style "G" packs the subsoil, and also compresses the surface into the best seed bed to be obtained by any method for wheat, oats, millet, alfalfa, and other seeds. The edge is not quite so sharp as Style "U", which packs the subsoil and leaves the ground in small ridges, preventing the soil from drifting and blowing, it pulverizes thoroughly. They leave a perfect seed bed. Use it after sowing, and it will pack the soil about the seed, help germination, stimulate growth of your plants, and increase the yield. Roll your winter wheat after spring opens, and you will get an increase of from 10 to 20 per cent. When wheat, timothy, or clover has been lifted by alternate freezing and thawing, its use will pack the earth, and level the surface about roots, and save crops that would otherwise be lost. It is fine for leveling meadows. Rolls are of heavy cast iron. Each wheel works independently upon the steel axle, which turns free in its three hardwood bearings. State which style is wanted. Style "2" wheels, 4 inches wide and 18 inches diameter. Style "1" is 4 inches wide and 18 inches diameter. Ten foot size has center brace. Shipped direct to you from factory at Kansas City, Missouri

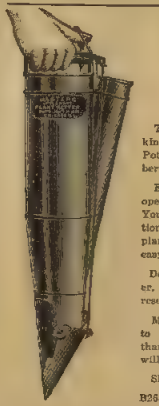
Ajax Force Feed Broad Cast Seeder

WILL SOW 100 ACRES A DAY FITS ANY WAGON

The most perfect force feed seeder on the market. Even distribution and even feed. The flow of seed is uniform and the amount can be gauged exactly. The feed roller does not grind or crush the grain. The seeder can be thrown in or out of gear and the feed roller stops with the seeder. Two feed gauges, regulating the amount of seed, swing on pivots at either side of the feed opening. They work independently, so the machine can be set to increase or decrease the cast on either side. This is a special advantage in winds which would not allow the use of other seeders. It sows the same amount per acre whether the horses walk fast or slow. Furnished with end board to take the place of end gate, large sprocket wheel to attach to wagon wheel and all chains necessary to operate. Shipping weight, about 95 lbs. Shipped from factory in southern Wisconsin

B-2657—AJAX Force Feed End Gate Seeder $15.70
B-2658—Grass Seeder Attachment for above Seeder. Extra. 3.75



Master Rapid Plant Setter

CO-OPERATORS PRICE **$5.40**

The only practical tool for transplanting all kinds of plants, Tobacco, Tomato, Cabbage, Sweet Potato, Cauliflower, Peppers, Egg Plant, Strawberries and all similar plants.

Each plant is set, watered and covered in one operation without any stooping or lame backs. You walk along in an upright comfortable position and all the drudgery and backache of hand planting is done away with. Makes transplanting easy pleasant work.

Does perfect work even in hottest, driest weather, you will get a full stand of plants and no resetting to be done.

MORE THAN THREE TIMES AS FAST. 8,000 to 15,000 plants per day and very much easier than hand setting. This planter is durable and will last for years. Satisfaction Guaranteed.

Shipped direct to you from Chicago Factory.

B2660. Masters Plant Setter $5.40

Steel Land Roller

DRUMS ARE 24 INCHES OIL SOAKED HARDWOOD BOXES

This is one of the strongest and best land rollers on the market. This closed head roller has pressed steel head and wrought steel hangers. Is made with 24 inch drum of 12 gauge steel. Axles are 1¾ inch steel. The steel hanger is perfectly stiff and rigid and guaranteed thoroughly oil soaked which we believe will outwear any box made. We consider this the best roller now being built. No neckyoke or doubletrees furnished. Shipped direct to you from factory at Kansas City, Missouri

MARBLE'S GAME GETTER GUN

Marble's Game Getter Gun Shoots All of These Cartridges

The Game Getter can be safely used with Smokeless Powder. The .22 and .44 Bullets shoot to the point blank range of 50 feet with sights set the same. There is very little recoil on account of .44 barrel being Cylinder Bored.

The Striker on Hammer is quickly set with the thumb for either barrel or at Safe. The Folding Stock locks automatically at any drop for which it is set. Is easily removed.

With the holster hung over shoulder and under coat the Game Getter is invisible, but can be speedily drawn and very handily used in one hand with stock hanging down or thrown to position. In either place the stock only aids in the balance of the gun.

This Gun is the Ideal Arm for the Fisherman, Motorist and Vacationist, and all classes of people whose business or pleasure calls them to the woods, fields or waters.

The Big Game Hunter with a Game Getter for a side arm secures with little noise and no mutilation the small game he runs across and enjoys target practice without the jar and expense of firing his heavy ammunition.

The Game Getter's utility, simplicity of construction, careful design, perfect safety, absolute reliability and superior accuracy are the qualities which are making it famous the world over.

ELECTRIC FANS

MEMOMINEE

Each part of these fans is cast, finished and assembled under one roof, and nothing is left undone to bring them to the highest state of mechanical development. Dealers and users everywhere are greatly impressed with their fine appearance, the unusually large blades and the quiet running motors. The manufacturers stand squarely behind every fan and guarantee them **free from mechanical defects and workmanship.**

SPECIFICATIONS

Cast iron motor body and base, black japanned. Full size blades, lacquered. Steel guard, black japanned. Green felt base, 8 foot cord with separable base. Knuckle joint, allowing adjustment for desk or wall. Bronze bearings. Each fan packed in individual box.

ELECTRICAL WIRES AND CABLES

Browne & Sharp (B. & S.) Gauge

TELEPHONE WIRES

Rubber Covered Copper

BRIDLE WIRE

Twisted Pair

Each conductor a soft drawn tinned copper wire, insulated to a diameter of ⅛ of an inch over rubber, and covered with a cotton braid, saturated with black weatherproof compounds, wax finish one conductor has raised tracer.

No. 18—No test, twisted pair, 32 lbs per 1000 feet.

INSIDE OR SUB-STATION

Twisted Pair

Commonly known as B. R. C. (braided rubber covered). Conductors soft drawn tinned copper, insulated to a diameter of ⅛ of an inch over rubber, covered with a single hard glazed cotton braid. Colored tracer thread in one conductor.

No. 19—No test, twisted pair, 28 lbs per 1000 feet.

EXTRA GALVANIZED TELEPHONE AND TELEGRAPH WIRE

Best Best (B. B.)—Used very largely by telephone companies.

Gauge	Approximate weight in lbs per 1000 ft	per mile	100 lbs
6	112	590	$21 50

12	32	170	22 50
14	19	99	24.00

HEATING CORD (TYPE H)

For electrically heated devices. Made in both paired and parallel types. Each conductor (34 gauge copper wire) has a wind of cotton, is covered with a 1/32-inch wall of high grade rubber and braided with pure asbestos fibre yarn.

Size		No. wires each conductor
16	Twisted Pair	88
18	Twisted Pair	66

LAMP CORD

DURACORD

Duracord is a two conductor portable cord with a special cover. This cover is a weave of heavy cotton yarn as contrasted with a light braid. It is made like a piece of fire hose. The insulation is far better than that required by the Board of Fire Underwriters. Laboratory tests and actual use have proven that Duracord will outlast ordinary cords four, five and six times over. It is far superior to any other cord now being used for portable work in factories, ship yards, railway shops, garages and on all types of steel construction.

Type	PS	P
Size, inch	18	18
Feet in coil	250	250
Weight per 1000 feet, lbs	73	105

LAMP CORD

National Electrical Code Standard

TWISTED (TYPE C)

Specifications—The conductors (30 gauge copper wire) are wound with a fine cotton yarn, and rubber insulated 1/32-inch, then separately braided in either silk or polished cotton, and twisted together to make the finished article.

Used principally for drop cords, where not likely to come in contact with surrounding objects.

Single Strand—Used extensively in this form for wiring lighting fixtures with chain stems and open fittings. Considerable time saved by not having to untwist. Price is one-half of the twisted or double type.

Size	No. of wire in each conductor	Feet in coils	Weight lbs per 1000 feet
16	26	250	35
18	16	250	29

PORTABLE CORD

National Electrical Code Standard

REINFORCED (TYPE P) DRY BRAID

This is type C twisted cord with an outer covering of rubber 1/32-inch thick, making the whole cylindrical, and then covered with a cotton or silk braid. Black braid is standard and will be shipped unless otherwise ordered. Extensively used for hand portables and extensions in basements, stores and warehouses.

Size	No. of wire in each conductor	Feet in coils	Weight lbs per 1000 feet
16	26	500	75
18	16	500	67

REINFORCED (TYPE P W P) WET BRAID

Same as type P, except outer braid is saturated with weatherproof compound. Used for hand portables and extensions in damp places where a conductor under one braid is desired.

Size	No. of wire in each conductor	Feet in coils	Weight lbs per 1000 feet
16	[illegible]	500	75
18	16	500	67

REINFORCED (TYPE P S)

Same as type P, except that the rubber insulation is 1/64-inch instead of 1/32-inch. Used almost altogether for electric portables in residences, offices, etc. The usual outside braided covering in either cotton or silk being old brass, tan, maroon, old gold or black.

Size	No. of wire in each conductor	Feet in coils	Weight lbs per 1000 feet
16	[illegible]	500	51
18	16	500	41

BREWERY CORD (TYPE C B)

Practically the same as reinforced type P. W. P. cord, except that the two finished conductors are twisted together without the outer braid. Used extensively for hand portables and extensions in basements, packing houses, garages and other places where there is considerable moisture and dampness.

Size	No. of wire in each conductor	Feet in coils	Weight lbs per 1000 feet

STRAND SKIS

The young people of America have adopted and made very much of the Norwegian ski sport. Wherever the snowfall is sufficient to make good, steady sleighing the use of skis in work and play is becoming popular, and in those regions where the snow becomes deep, as it does in the Northwest, the sport has its enthusiastic votaries.

Our Skis are designed by experts and made of selected material, carefully prepared and fashioned in accordance to the time from which is absolutely essential in correct skis.

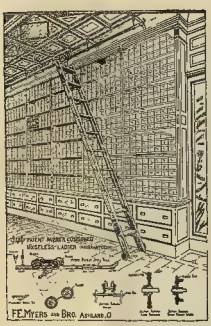
STORE LADDERS

MYERS CUSHION TIRE. NOISELESS



Ladder and Trolley, Complete (Any Length Ladder).

Each $27.06

Track, with Hangers, Complete .. . .Per Foot. .40

Double-angle steel track; varnished Georgia pine ladder. 12 in. wide; open panel sides, 5 in. wide; 5-in steps; malleable iron trolley, self-adjusting; 3-in. anti-rattler wheels, rubber tires; floor travelers, 5 in. diameter, with rubber cushion tires.

Measurement Blanks furnished and prices quoted on application

In ordering, give the exact height of the ceiling and length of each track. If the height of the ceiling varies, give the height of ceiling at each end and center of each run of track. To ascertain the length of the ladder required, subtract from height of the room 11 inches and multiply the remainder by one and one-tenth.

BICYCLE

Bent, for Floor. Equipped With Iron Wheels

Made of oak or yellow pine, natural finish, with japanned or nickel-plated mountings. Noiseless steel track on floor supports the entire weight of ladder and operator, relieving all liability of ladder falling Turned pole at top guides the upper end of ladder in moving it. Top of ladder has two hooks which fit over the pole, preventing it from tipping backward. Fitted with extra-wide top shelf for convenience in handling stock.

All Length Ladders Same Price

STEP LADDERS

KEYSTONE UTILITY STOOLS

No. 10—Made of first quality material, varnished, well braced and substantial. Top of hardwood. Will fold up into small space. Height from floor, 24 in.....Per dozen, $24.80

FOLDING GIANT JR.

No. 102—Height, 24 in. Width, 15 in. Top, 7½x12½ in. Weight per dozen, 60 lbs... .. .. .Per dozen, $18.00

Made of selected basswood, very rigid, and will hold any human weight in safety. The usefulness of this ladder is apparent in every home and its folding features make it occupy only a small space when not in use.

STORE LADDERS

MYERS

Clear Georgia pine ladder. Varnished. Open panel sides, 5 inches wide. Malleable iron dowel tees support each step on both ends. Fixtures malleable iron. Self-adjusting trolley with 3-inch anti-rattler wheel with cushion rubber tires and turned steel bearings. Double angle steel track suspended from ceiling by lag screws. Complete with clamp, bracket and end stops.

The floor wheel or travelers are 5 inches in diameter, composed of metal sides with cushion rubber tires, clamped in such a position that they cannot become loose. They run on a steel axle without friction or noise.

***Myers Ladder Complete**—Width of ladder, 12 inches. Width of steps 5 inches. Average weight each, 50 lbs..... **Each $27.00**

Track for Iowa with nickel plated mountings. Weight per foot, 1 lb.....**Per foot .40**

***For shipment from factory only.**

HOW TO ORDER BICYCLE OR IOWA LADDERS

Refer to cut on this page and give the following measurements: D to C; D to A; A to B; B to S; B to S feet and B to S inches. State length of track wanted and the number of angles of all kinds in the shelving and say what they are, whether solid uprights, partition boards, turned spindles or whether iron brackets are used to support the shelving. Be sure and send both a front view and the end view diagram of your shelving and tell us all you can about it. The more we know of your shelving the better we can serve you.

*** For shipment from factory only**

*BICYCLE STORE LADDERS

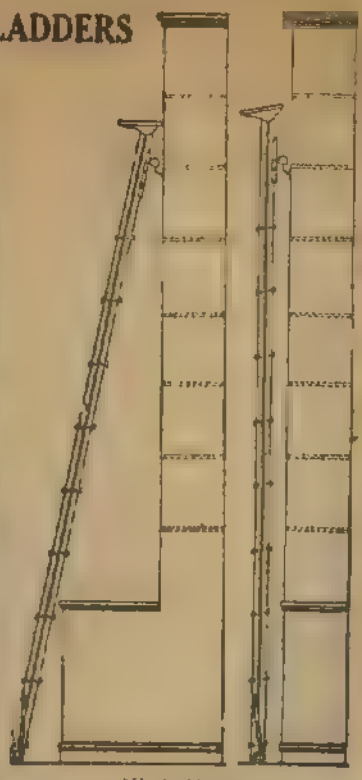
*For shipment from factory only.



No. 7 Auto
Straight. For Floor.

No. 9 Chicago
Straight. Trolley Type

*AUTO

This ladder used where it is not desirable to have track on the floor. It is guided by upper guide alone. The hooks are arranged to slide in a slot so as to adjust themselves automatically to the position of the pole, permitting the bottom of the ladder to be pulled out from the shelving for easy climbing, or to be pushed up close to be out of the way. Adapted for short runs and cramped places where room is limited. Made from selected hardwood. Nickel plated or japanned finished mountings, provided with smooth treads to run on bare floor.

No. 7—Shipping weight each, 40 lbs. ..... Each $20.00
*Guide track or pole for Auto Ladder. Japanned mountings. Weight per foot, 1½ lbs. ..... Per foot .50
Guide track or pole for Auto Ladder. Nickel plated mountings. Weight per foot, 1½ lbs. ..... Per foot .60

*CHICAGO

Made of yellow Georgia pine with plain sides, or natural finish oak with ornamental open work sides. Japanned mountings. Consists of two wheels each at top and bottom. Track is open, permitting the use of large wheels. A special device prevents tipping of ladder, and it cannot possibly get off track.

When so ordered the Chicago Ladders are made to turn corners or follow any crooked or curved track.

No. 9—Yellow Georgia Pine with plain sides. Shipping weight each, 50 lbs. ..... Each $20.00
Natural Oak Finish with ornamental open work sides. Shipping weight each, 50 lbs. ..... Each 24.00
For ceilings over 15 feet high, add to above prices. Extra 2.00
Double Steel Track for Chicago Ladders, with wood center, complete with hangers, screws, etc. Weight per foot, 1 lb. ..... Per foot .50
Wood ceiling strips ..... " .10
Curves for track ..... Extra 2.00

To order the Chicago Ladders, give the height of ceiling, length of each track and number of ladders wanted for each run. State whether ceiling is plastered, wooden ceiling or open joists. Ceiling strips will only be sent when expressly ordered. Any suitable strip of wood, five inches wide, will answer the purpose, and can usually be supplied by the customer and saves the freight.

Large Line shown in our 350 Page Automobile Accessory Catalog

GAME TRAPS

VICTOR

Similar in pattern to the genuine Newhouse, though lighter in construction. Suitable for farmers and trappers of small game. Steel wire chain and ring.

SINGLE SPRING

Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
V0	Rat	3½	5	$ 4.25
V1	Muskrat	4	7½	5.00
V1½	Mink or skunk	4½	11¼	7.50

DOUBLE SPRING

Nos. V2, V3 and V4.

Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
V2	Fox	4½	14½	$10.50
V3	Otter or coyote	5½	23¼	14.00
V4	Beaver	5⅞	25	16.50

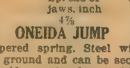
Nos. V0 to V1½, one dozen in box; balance loose.

Victor Giant is similar in pattern to Victor, except the Giant jaws catch far up on the animal's leg, the lightning-action spring rising high on the jaws. The pan and dog are wider and heavier, the chain larger and the spring faster.

No.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
VG1	Muskrat	4⅞	8¾	$ 6.50

ONEIDA JUMP

Sheet steel. Tempered spring. Steel wire chain and ring. Traps lie flat on the ground and can be secreted in runways of animals. Jaws have wide meeting faces, which prevent breaking animal's leg. Construction of springs causes trap to jump up and take a high grip on the animal's leg, instead of the foot.



Nos.	Kind	Spread of jaws, inch	Weight per doz. lbs	Per doz
J0	Rat or gopher	4	6½	$ 4.25
J1	Muskrat	4¾	8	5 00
J1½	Mink or skunk	5¼	9½	7 50
J2	Fox or raccoon	5½	14¼	10.50
J3	Badger or coyote	6½	22	14.00
J4	Otter or coyote	7¾	27¾	16.50

Nos. J0 to J1½, one dozen in box, balance, loose.

TRAP CLAMPS

Malleable iron. For setting large traps. By placing one on each spring large traps are easily and quickly set with a few turns of the thumb screw.

Nos.	N4	N5	N6
Size of opening, inch	2¼	4⅝	5⅝
Weight per dozen, lbs	2¾	9½	23½
Per dozen	$4.00	10.00	15.00

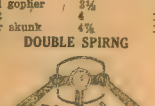
NEWHOUSE

Highest grade. Best crucible steel springs. Stock is a mixture of special Norway iron. Chain flat cut steel, smooth and flexible. Fully guaranteed. Used by professional trappers for catching all fur-bearing animals.

SINGLE SPRING

Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
N0	Rat and gopher	3½	7½	$ 6.00
N1	Muskrat	4	10	7.50
N1½	Mink or skunk	4⅝	14½	10.00

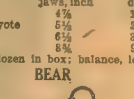
DOUBLE SPIRNG



Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
N2	Fox	4⅞	18	15.00
N3	Otter or coyote	6½	23½	20.00
N4	Beaver	6½	33¾	25 00
N4½	Wolf	8¾	92	60.00

N1, one dozen in box; balance, loose.

BEAR



Double spring, with toothed jaws and heavy chain.

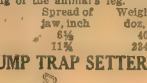
Nos	Kind	Spread of jaws, inch	Weight per doz. lbs	Per doz
N5	Common black bear	11¾	234	$190.00
N6	Grizzly bear	16	522	425.00

DEER OR BEAR, WITH OFFSET TOOTHED JAW

Heavy double spring. ¾-inch offset jaw allows spring to rise, and prevents severing of the animal's leg.

Nos.	Kind	Spread of jaw, inch	Weight per doz, lbs	Per dozen
14	Deer	6½	40	$ 30 00
15	Bear	11¾	234	190.00

JUMP TRAP SETTER



Quickly and easily applied. With one turn of the wrist the spring is brought down, the jaws opened and the trap set.

Size, inch	9
Weight per dozen, lbs	4
Per dozen	$3.00

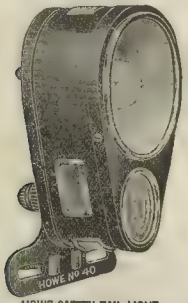
Bulb is 2 C. P., 6-8 Volt, unless otherwise specified, and is held securely in socket. Plug is of plunger type.

Enamel used is of highest quality.

Each

No. 32L—Black Finish; Outside Diameter, 3¼ in. $1.50

One in a Carton; Weight Each about 1¼ Lbs.



HOWE SAFETY TAIL LIGHT

A Combination Tail Lamp and Rear End Searchlight all in one. It replaces the regular Tail Lamp on the Auto. The small red light in the Howe Safety Tail Lamp is operated in the usual way; the large white light or Searchlight is controlled from a separate switch, located anywhere to suit the convenience of the driver. When the driver desires to back up at night, he presses the switch-button and the rear end Searchlight is in operation—he can see anything within fifty feet of the car, press this switch again when you are ready to drive ahead and the Searchlight is off.

Anyone can put on the Howe Safety Tail Lamp as it simply takes the place of the Tail Lamp already on your car.

The Howe Safety Tail Lamp is made of sheet metal and is handsomely finished in baked on black enamel. It comes complete with bulbs, bracket, connectors, etc., and is packed in an individual carton complete with instructions and wiring diagrams. Each

No. 40—Howe Safety Tail Light $4 50

One in a Carton; Weight about 2½ Lbs.

Notice—When Ordering, please specify whether you desire Single or Double Contact.

TAIL LAMPS FOR TRUCKS

Burns Oil

A Lamp so Perfect in Design that it Stays Lighted Under Adverse Conditions even though not lined.

Height is 8¾ in.; Distance from Front to Rear, 5 in.

Oil Pots are Positively Locked and Cannot Rattle or be Lost.

Per Pair

No. 24F—With 3 in. White Semaphore Lens $5 00

One Pair in a Carton; Weight per pair about 7½ Lbs.

SPOTLIGHTS

AUTOREELITE

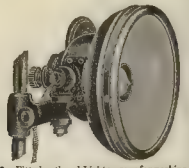
Spot-Light; Trouble-Light; Portable-Light; 7 in. Diameter; 32 C. P.; Attaches to Windshield

Construction—Lamp and Bracket in beautiful black enamel, nickel trim, fitted with a convex lens, backed by a nitrogen (Mazda C) lamp in a silvered parabolic reflector of carefully determined contour to increase and direct the light rays. Switch conveniently located at the back of the lamp. A 3½-inch rear-view mirror giving complete view of the road behind is standard feature if desired. Length of cord on extension reel for use as portable 13 feet. Length of cord for battery connection, 5 feet. Focus of lamp quickly adjusted and set.

Clamps: Three pairs of windshield clamps—round, oval and rectangular—included with each lamp; throw away the two not required.

Operation: The adjustable cord reel is located in the ball casing just back of the lamp. To use as a portable, simply unscrew the knurled nut and withdraw the lamp to the desired length. The cord reel operates like an ordinary curtain roller.

	Each
No. 3140—Without Mirror for Rear View; Weight Each about 4½ Lbs.	$ 9 50
No. 3141—With Mirror for Rear View; Weight Each about 5½ Lbs.	10 00



No. 1616—Fitted with red Light; u rear for parking purposes.

"Red Spot" thrown right or left will give **unmistakable** notice that you are going to turn or cross; thrown behind, that you are going to stop. And, while you are making roadside repairs, the steady "Red Spot" will warn approaching traffic that your car is stationary. Intermittent flashing will attract help, and in an emergency "Red Spot" can be used as a temporary tail light—two searchlights in one for the price of one. In an instant, you can change the white light to an imperative red signal—the universally understood "Halt," that will protect you and your car and help render night driving **Safe**—as well as enjoyable.

"Red Spot" Searchlights are equipped with high candle power 6-8 volt nitrogen lamps. When other voltage lamps are required, be sure to specify the voltage on your order. Searchlights equipped with 18-24 volt nitrogen lamps to operate in conjunction with Ford Magneto are 50 cents list additional.

Made throughout of the finest and most durable materials known to the industry; exclusive in its many refinements.

Even without the red spot feature, the "Red Spot" by the sheer force of its excellence of design, build and appearance would sell itself right off your shelves. Send along your inquiry for terms, and literature, on this mighty interesting, rapid seller.

RED SPOT

The Double-Duty Searchlight—Red for Danger—White for Light

The "Red Spot" Searchlight is exceptionally well built, symmetrical and original in design. The accurate parabolic reflector is made of brass—not steel—heavily silver plated and highly polished. Twin-fitting base and glass lens with rubber gasket make it weather proof, dust proof and rattleless. Universal bracket with lubricated smooth-working rattle-proof joint. Rear view mirror, instantly adjustable, can be used independently of the searchlight. Heavy gauge steel shell, all parts are protected against rust by enamel, **baked on**—not painted, a heavy nickel plate or the Parker rust-proof process.

The bulb is instantly focused by turning a knob on the handle.

The bracket is universal and unusually solid. The lamp comes equipped complete with 6-8 volt 21 C. P. Nitrogen lamp and weather-proof cord with copper terminals.

	Each
No. 1616—Complete with Mirror; 5½ **in. Diameter;** Weight about 2¾ Lbs.	$ 7 50
No. 1622—Complete with Mirror; 7 **in. Diameter;** Weight about 3 Lbs.	10.00

A Packard which handles heavy loads in city traffic. How soon will the truck assembled to meet an arbitrary price eat away the deceptive first cost "saving"—when accurately compared in upkeep and repairs to the Packard, built with long-term transportation as the object

Can the Metal Industries Afford Avoidable Replacement Costs

TODAY permanence is what every keen manager wants in his buildings and equipment.

Only too well he knows the effect of repairs and replacements on his operating costs.

Yet when it comes to trucks, how often he expects to get more out of them than the maker actually put in.

* * *

The Packard people are primarily *transportation engineers.*

The basis of the Packard Truck is *unified engineering* —not merely a blue print and specifications of commercial parts; but Packard engineering design and Packard control of every Packard part.

Packard frames of *rolled* channel steel not commercial pressed steel.

Packard live axles of special steel, *heat-treated* in furnaces designed by Packard. Tensile strength—220,000 pounds to the square inch.

Packard Engine both *strong* and *simple.* Four crank shaft bearings, as against the ordinary three.

One cam shaft only, and but *three* timing gears, in the Packard.

All valves *enclosed,* and with automatic lubrication.

Packard clutch and universal joints *enclosed.* The clutch of dry multiple disc type, with *extra-large* clutch surface. No leather, and nothing exposed.

Packard *four-speed* transmission with *even* ratios—as against only three speeds and uneven ratios.

Packard gears *forged* and *heat-treated* by *unique* methods that give 10 to 20 per cent above average shock-resisting ability, steady load value and long life.

* * *

Such sound engineering facts as these hold a significant interest for the plant manager.

He sees in them the elimination of *avoidable* costly truck replacements—and a corresponding decrease in his operating costs.

"Ask the Man Who Owns One"

PACKARD MOTOR CAR COMPANY, *Detroit*

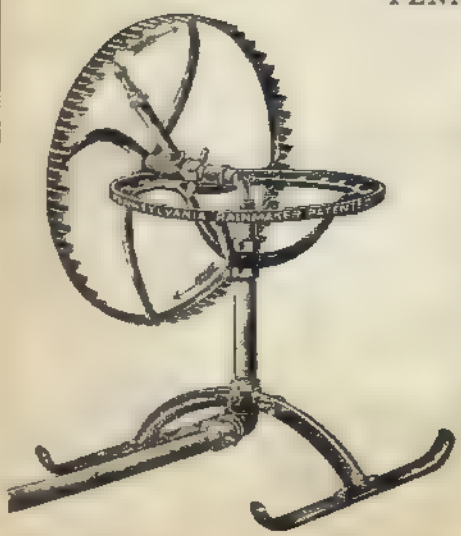
LAWN SPRINKLERS

PENNSYLVANIA RAINMAKER



This Sprinkler Waters an Area of 300 to 500 Square Yards with Drops of Spray Doesn't Flood Doesn't Swamp at the Center; Doesn't Wash Out Soil; Doesn't Chill Tender Grass or Plants, and Works Without Attention. It is Made on the Turbine Principle The Water Coming from the Nozzle Strikes the Turbine Paddles, Turning the Wheel. As the Turbine Wheel Revolves it Travels Around the Circular Base, Carrying the Jet Around Approximately Eight Times a Minute. It Distributes the Water Evenly over the Entire Area so Gradually that it Allows it to Sink into the Ground and Not Run Off into Low Places. The "Rainmaker" can be Easily Regulated to Throw Heavy or Medium Drops or Fine Spray. With a Pressure of 40 to 60 Pounds it will Distribute This Evenly from the Center to the Extreme Edge of a Circular Area 60 to 75 Feet in Diameter. Most of the Spray Travels Through the Air Much Further than is True of All Other Sprinklers. That Gives it Time to Lose the Chill so Harmful to Tender Plants. The "Rainmaker," as Regularly Made, Requires Only a ¾-in. Hose. However, Couplings are Readily Furnished in 1, 1¼, 1½, 1¾, and 2-in. Sizes. A Small Bore Nozzle is Supplied for Low Pressure There are No Cog Wheels Nor Gears to Get Out of Order and it Works Perfectly Without Attention After Starting. It Rests on Flat Runners which are Adjustable to Uneven Ground and Hillsides. They Serve as Sled Runners for Pulling the "Rainmaker" Around

PERFECTION BRAND MILK BOTTLES

SCALLOPED NECK BOTTLE

PLAIN BOTTLE

RIBBONED BOTTLE

The purchasing of milk bottles is a very important item. It therefore follows that great care should be exercised in the selection of same. In the Perfection Brand Milk Bottles we offer the trade a bottle that cannot be excelled. Read what we guarantee.

OUR GUARANTEE

First—Correct capacity, uniform weight. When you serve milk in our bottles you have no loss, you give full measure; no more no less You also have the satisfaction of knowing that your bottles comply with the city ordinances.

Second—Even distribution of glass. Superior annealing. Ninety per cent of breakage is caused by poor distribution of glass and inferior annealing. There are no thin spots in our bottles and they are perfectly annealed, which means your breakage will be reduced to a minimum.

Third—Perfectly smooth finish at top of caps. There are no sharp edges to cut brush handles, or checks in the glass to chip off, as our bottles are absolutely smooth and make a perfect fit for caps.

When Perfection milk bottles come from the machine and while they are still red hot, they are put into a lehr.

These are the most modern and scientific lehrs ever built. They are 80 feet long and equipped with pyrometers and dampers every 8 feet, by which the proper temperatures are maintained throughout the length of the lehrs. The bottles move automatically and it takes 8 hours from the time they are put in the lehr until they come out at the other end, 80 feet away, tempered and cooled, ready to be packed and shipped.

Nothing is left to chance. The entire process is automatic. The bottles cannot fail to be perfectly annealed after they are 8 hours in the lehr at the varying grades of temperature.

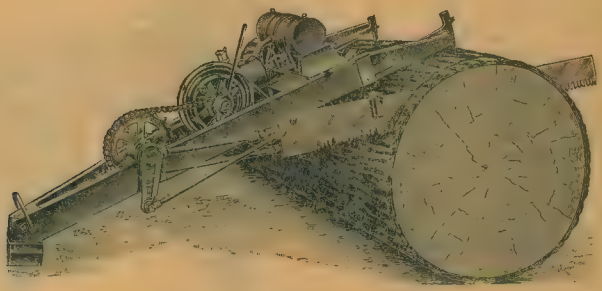
The time has arrived when the public is thoroughly aroused to the necessity of pure, clean and wholesome milk. The day when cows could be kept in filthy stables, when milk could be delivered in cans and dipped into receptacles furnished by the customer, collecting bacteria-ladened dust and dirt, is past.

The successful milkman guards against and prevents impurities entering into his product. And it is only those milk dealers who have met the demands of the time for a sanitary product who are today conducting a successful business.

Many of the states have enacted laws relating to the capacity of milk bottles and to the cleanliness and purity of milk and where states have not enacted such laws, cities and towns have ordinances bearing upon the same.

Let us send you a trial shipment of these bottles. They will give you the satisfaction and results you have been looking for.

PERFECTION PORTABLE DRAG SAW



This portable drag saw has a four horsepower, two-cycle, one-cylinder gasoline engine, fitted with a Ford piston, Ford connecting rod, and a Ford timer. The crank shaft is forged steel and carefully machined to a standard size, and is interchangeable. Special pains are taken in the machining of the cylinders, each one being carefully bored to size, then a dummy piston lapped in to make it absolutely true. After the rings are fitted the engine is set up and run under a belt from an electric motor for three hours, to insure free running and full power from the start. After the drag saw is fitted and everything tested, machine is mounted on a log and a cut made before crating. A friction clutch pulley is fitted to the flywheel of the engine, which allows the saw to be started or stopped without the stopping of the engine. The engine can also be used for auxiliary power purposes, such as running a small pump jack, feed mill or other small power equipment. This rig will cut 20 to 25 cords a day and can be operated by one man on the log and moved from log to log by two men. The friction clutch works automatically and when the saw begins to pinch it will slip and prevent breakage. When side pressure on the saw is relieved it will start again without any damage having been done.

Balance wheel of saw frame is located under main shaft on countershaft, out of the way, allowing long wood or poles to be cut to the best advantage.

SPECIFICATIONS

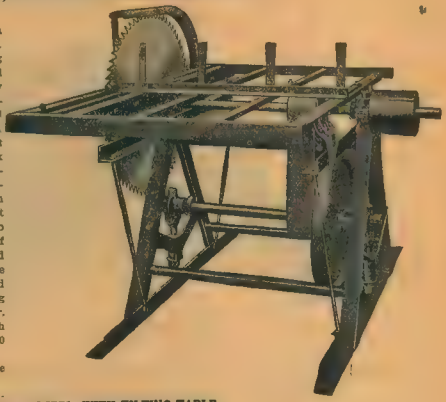
This rig is shipped complete with 6-foot saw, having 20-inch stroke, cutting through 40-inch log in 5 minutes. Ignition by 4 dry cell batteries in weather proof case. Weighs 285 lbs complete, loaded with water, oil and gasoline. Water and gasoline tank are of heavy galvanized iron. Gasoline tank holds 2 gallons, enough to cut from 16 to 20 cords.

Portable Drag Saw Outfit, complete, with 6-foot saw.....Each .....
Portable Drag Saw with Magneto and 6-foot saw..... " .....

CHALLENGE WOOD SAWING OUTFITS

NO. 62, ALL STEEL, WITH SLIDING TABLE, REPLACES NO. 41

EXTRA HEAVY DUTY

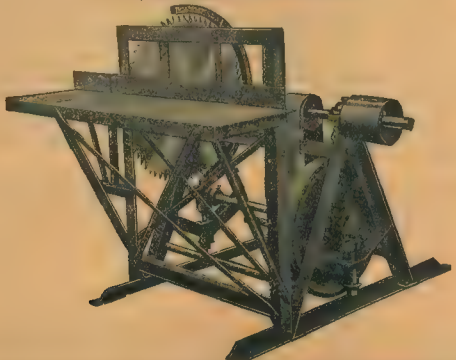


The new No. 62 all steel saw frame embodies a number of improvements over the former No. 41 which has proven to be the most popular sliding table frame ever made. The new frame is fitted with 1⅛-inch mandrel turned to 1¾-inch for saw blade. The boxes on saw arbor are of the self-adjusting type, lined with a high grade metal which makes a non-heating bearing that will last a lifetime if properly oiled. Balance wheel shaft is fitted with adjustable hangers to take up slack in belt. The balance wheel being located underneath table on independent shaft, permits of cordwood or poles being cut in any length desired, in addition to which its location gives the outfit balance and overcomes vibration common to frames of other construction. The front part of table is now entirely covered with sheet iron and has a 10-inch extension at left of blade. These are not shown in illustration. Saw blade is protected by substantial steel guard and permits of using any size blade from 18 to 30 inches in diameter. Sliding table mounted on roller bearings which slide easily over angle steel track. Weight, 450 lbs. Pulley, 6x6-inch. Speed, 1500 R. P. M.

No. 62—All steel frame, sliding table complete with 26-inch blade.

Each .....

NO. 61, ALL STEEL, WITH TILTING TABLE



The new No. 61 frame is of entirely new construction. Undoubtedly the finest tilting table frame ever put on the market. Its biggest feature is the fact that the fly wheel is below the mandrel on separate shaft, which permits of cordwood or poles being cut in any length desired. The only frame of its kind on the market.

General construction and specifications same as No. 62 sliding table frame.

Weight, 400 lbs. Pulley, 6x6-inch. Speed, 1500 R. P. M.

No. 61—All steel tilting table frame complete with 26-inch blade.

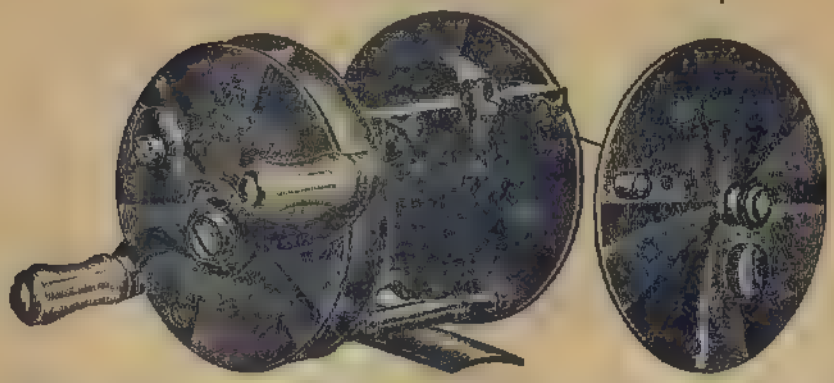
FISHING REELS

QUADRUPLE MULTIPLYING

PFLEUGER-SUPREME



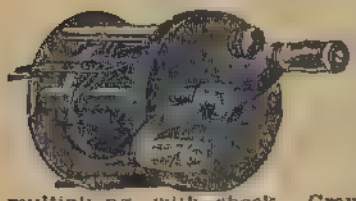
Made of finest quality nickel silver, a perfect free spool, lever; winding anti-back lash casting reel, quadruple. Adjustable front, sliding drag, steel pivots, double handle crank with pyralin amber fluted handles. The automatic level winding device is incased making it sand and waterproof, and only works when reeling in the line.

No.	1573
Capacity, yards	60 to 100
Weight each, oz	12
Each	$30.00

One reel in a chamois leather bag, packed in a chamois lined hinged cover sole leather case, with one Little Giant screw driver.

SOUTH BEND

LEVEL WINDING, ANTI-BACK LASH



French gray, mirror-like satin finish. Made of liberty silver throughout. Will not back-lash and is perfect in its level winding or spooling device. Agate jeweled spool caps of the screw-off pattern, with adjustable spring tension grip. Quadruple multiplying, with check. Crank or handle has white ivoride double grips. Complete, with a leather case, including screw-driver and practice casting weight. Absolutely guaranteed.

No.	1200
Capacity, yards	100
Weight each, ozs.	8
Each	$30.00

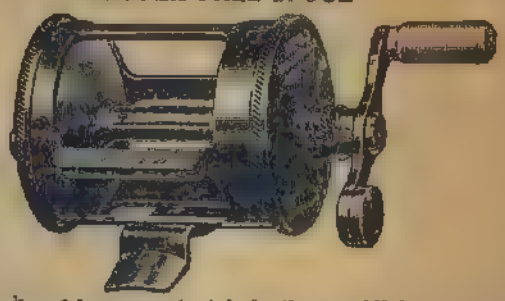
ANTI-BACK LASH

Made of 1890 solid nickel silver. Satin finish. Will not back-lash. Agate jewel, screw-off pattern spool caps, with adjustable spring tension grip. Quadruple multiplying, with adjustable click and drag. White ivoride handle. Absolutely guaranteed.

No.	1131 A
Capacity, yards	100
Weight each, ozs.	8
Each	$15.00

BLUE GRASS

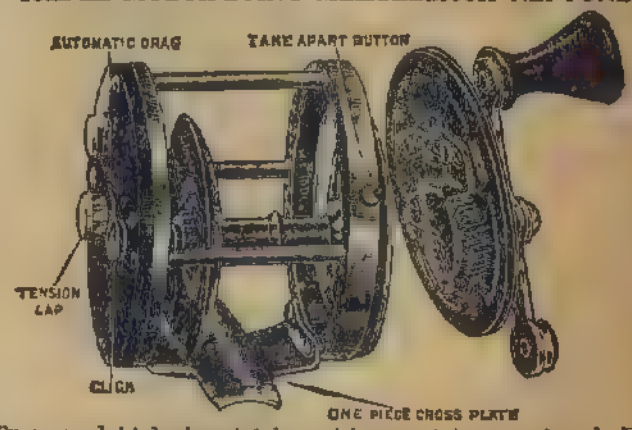
SIMPLEX FREE SPOOL



Made of brass and nickel silver. All brass parts are heavily nickel plated. Frame is one piece of seamless tubing, threaded on the interior. The gear is one piece of hard drawn brass rod; pinion is Stubs steel, cut on rod running through spool, thus making pivot and pinion one solid piece.

No.	84
Capacity, yards	100
Diameter of spool, inch	1⅝
Length of spool, inch	1⅝
Weight each, ozs.	8
Each	$17.60

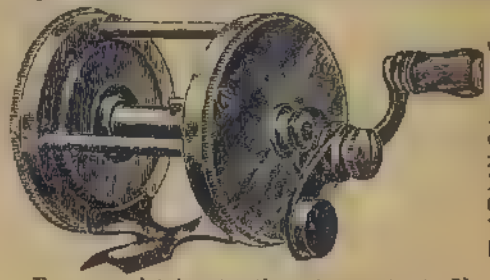
TRIPLE MULTIPLYING MEISSELBACH NEPTUNE



Free spool, high class triple multiplying take-a-part reel. Hard rubber disc. Nickel silver frame.

No.	901
Capacity, yards	80
Weight each, ozs.	11
Each	$16.50

QUADRUPLE MUTIPLYING MEISSELBACH TRI-PART



Nickel frame. Steel bronze bearings. Quadruple multiplier. Head plate is held on by screw cap, no screws being used.

No.	580
Capacity, yds.	80
Wgt each, ozs.	6¼
Each	$7.80

Free spool tripart, otherwise same as No. 580.

No.	581
Capacity, yards	80
Weight each, ozs.	6¼
Each	$10.00

All above, one in a box.

FISHING REELS

QUADRUPLE MULTIPLYING

MEISSELBACH TAKAPART

Satin finish end plates; nickel silver spool. One piece tubular frame; easily and quickly taken apart by hand. Balanced handle. Sliding click

No.	480
Capacity, yards	100
Diameter of spool, inch	1¾
Length of pinions, inch	1⅝
Weight, ozs	8
Each	$7.25

FREE SPOOL TAKAPART

Same style as No. 480, except has free spool device.

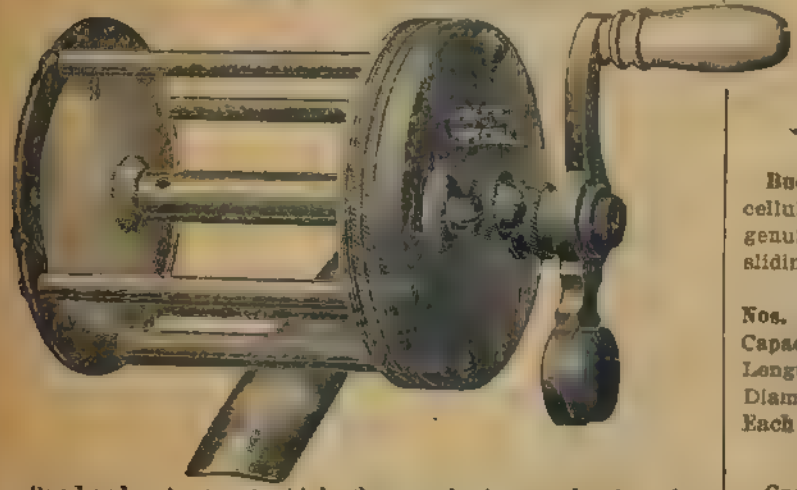
No.	481
Capacity, yards	100
Weight, ozs	8
Each	$9.00

PFLEUGER-REDIFOR

Anti-back-lash multiple casting reel. Made of nickel silver, satin finish. Genuine scarlet agate jewels, balanced crank with amber handle. Phosphor bronze bearings. Adjustable click and drag.

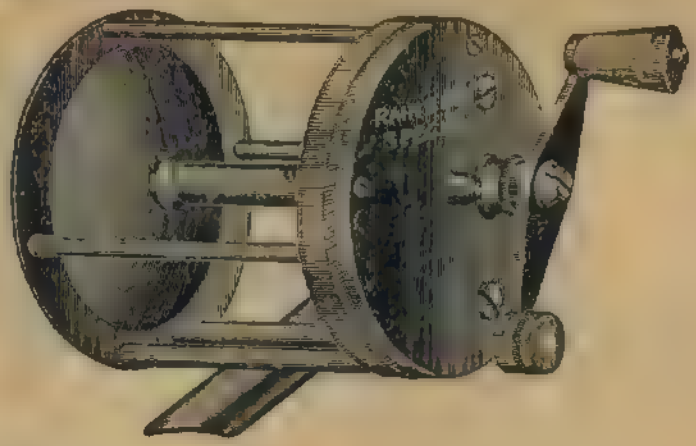
No.	1433J
Capacity, yards	65to100
Weight each, ozs.	12
Each	$18.00

Each reel in velvet lined display case with Marvel oil can enclosed.



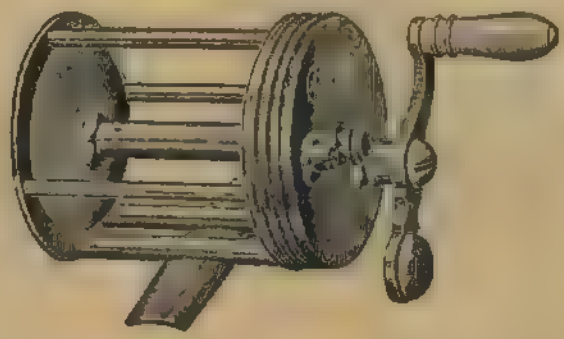
Quadruple—A strictly high class reel at a moderate price. Made of nickel silver, satin finish. Round, wide pattern. Adjustable front sliding drag. Adjustable back sliding click. Kentucky pattern cross-plate. White handle. Steel pivots and pinions. Phosphor bronze bearings. Fancy balanced crank.

Pacific Special—Capacity, yards	60
Weight each, lbs	½
Each	$10.00



Quadruple—Nickel plated. Satin finish. Round disc pattern. Bearings. Steel pinions, click and drag. Kentucky pattern cross-plate. Long spool.

Rainbow Special—Capacity, yards	60
Weight each, lbs	½
Each	$7.50



Buckeye Jeweled—Quadruple. Fancy balanced handle with celluloid ivory thumb piece; front and back oil cups, with scarlet genuine agate jewels; steel pinion and pivots; adjustable back sliding click and front sliding drag.

Nos.	633J	634J
Capacity, yards	60	80

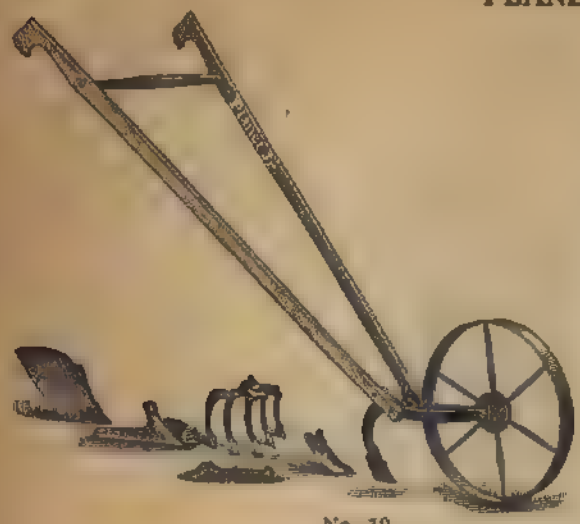
PLANET JR. GARDEN TOOLS



No. 19

SINGLE WHEEL HOE, CULTIVATOR AND PLOW

This attractive implement is especially designed for the farmer's garden work, though it offers to everyone with either a field or a garden a cheap though good and effective tool for hand wheel-hoe operations.

An adjustable malleable piece will carry all the steels that go with the machine. The wheel is high and the standard is slotted for depth regulation.

Equipped with one 2-inch cultivating tooth, one 4-inch cultivator tooth, one 6-inch sweep, one 10-inch sweep and one plow.

No.	19
Weight, lbs	22
Each	

SINGLE WHEEL HOE, CULTIVATOR AND PLOW

This tool consists of our regular No. 33 Seeder, less all seeder parts. It is one of our latest designs and a very popular low priced single wheel hoe.

No.	33
Weight, lbs	22
Each	

No. 33

No. 39

SINGLE WHEEL HOE, CULTIVATOR AND PLOW

No. 39 is a splendid combination for use in peat land and all seeded crops. The hoes have an extra wide and high shield which prevents dirt from falling back and covering small plants, and you can see just where they are cutting. They leave the ground level.

The prong teeth for fine, deeper work.

The plow for drawing furrows, for covering and for deep and thorough cultivation of large vegetables in the garden, such as beets, tomatoes, potatoes, corn, etc.

No. 39½ is identical with No. 39, except that it has one pair of peat land hoes only. Other attachments can be added as needed. A great labor-saver.

Nos.	39	39½
Weight, lbs	26	20
Each		

SINGLE WHEEL HOE, CULTIVATOR AND PLOW

This new member of the Planet Jr family is a tool that is high in quality and low in price. It sells at a figure practically as low as the very cheap cultivators of this type, but at the same time combines the Planet Jr. quality and ease of operation. Equipped with plow, wide and narrow cultivator blades, scuffle hoe and three-prong group.

No.	119
Weight, lbs	16½
Each	

No. 119, High Wheel

PLANET JR. GARDEN TOOLS

SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW

No. 16

The plow on this implement is of superior design, complete with landside and is capable of doing heavy work. Adjustment for depth is simple and can be worked instantly.

Shield hoes are finely shaped and leave the ground smooth and level; are just right for from nine up to twelve-inch rows. To avoid trash and tearing out the rows the hoes are set one behind the other and not opposite each other. Fourteen and sixteen-inch rows can be hoed at one operation with a small rake or cultivator tooth between the hoes.

The rakes are of different sizes and enable the operator to select proper widths for the various work he has at hand. These rakes are excellent for fining and leveling the ground preparatory to seed planting, etc. Rakes for narrow work are furnished, and for extremely wide work two rakes can be set side by side. Leaf guard protects plants and enables operator to work close to the row without fear of injury to the young plants.

Equipped with a set of three cultivator teeth of new design, two 6-inch hoes, one large garden plow, one 7-inch and one 4-inch rake and one improved leaf guard.

No. 13
Weight, lbs. 22
Each .....

SINGLE WHEEL HOE, CULTIVATOR AND PLOW

This implement is designed for easy, clean and perfect gardening. It is suited to all kinds of garden cultivation and all garden crops.

More and better hoeing can be done in one day with the use of this machine than can be done by three men with hand hoes.

Equipped with one pair 6-inch hoes, one plow and three cultivator teeth.

This outfit covers the implements used in a garden most satisfactorily.

Other attachments can be added at the owners wish.

No. 17
Weight, lbs. 26
Each .....

No. 17

No. 17½

SINGLE WHEEL HOE AND CULTIVATOR

This tool is built on the same lines as the Planet Jr. No. 16, with the exception that it is not equipped with rakes or plow. Furnished with a leaf lifter enabling work being done close to the rows without fear of injuring the young plants. Hoes can be adjusted to work to or from the rows and a change of wheel regulates the depth

The cultivating teeth are made of one piece and are changeable for pitch. Can be used for marking out.

Equipped with one pair 6-inch hoes, three cultivator teeth and one leaf lifter.

No. 17½
Weight, lbs. 22
Each .....

SINGLE WHEEL HOE

This implement is known as a favorite with the onion, strawberry and sugar beet growers in this country. As a single wheel hoe it is much lighter than the double, while it will do almost the same variety of work. It is especially adapted and is used mostly for work between the rows. Wheel can be attached to opposite side of arm and tool can be used to plow both sides at once, when the plants are small.

Plows, cultivator teeth and rakes may be added to the equipment of this implement although it is better and cheaper to secure what you may need in the original purchase.

Equipped with one pair of 6-inch hoes.

No. 18
Weight, lbs. 20

TILLER ROPE

SAMSON

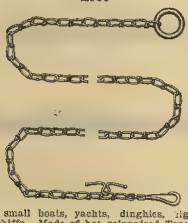
Made of best Samson cotton stock braided over a phosphor bronze flexible wire cable. Mahogany finish.

No. 8T—Diameter, ¼ in. Weight, 2¼ lbs. per 100 feet. Per Foot $0.10

No. 10T—Diameter, ⅜ in. Weight, 3⅛ lbs. per 100 feet. Per Foot ..... .14

PAINTER CHAIN

"ACCO"



For all small boats, yachts, dinghies, light launches, canoes and skiffs. Made of hot galvanized Tenso. It has an electric welded ring at one end and a snap and toggle at the other. The ring end of the chain lies under the bow of the boat, and the snap and toggle are used for the mooring. For making fast a small boat of any type a chain has numerous advantages over rope. It does not kink, foul, chafe or rot, and will not carry into the boat the water, drift and scum that are always picked up by a rope every time it is used.

No. 2—Canoe type. Length, 8 ft. Weight each, 13 oz. ..... Per dozen, $4.80

No. 2-O—Larger boat type. Length, 9 ft. 8 in. Weight each, 2 lbs. 1 oz. ..... Per dozen, 6.50

FIRE EXTINGUISHERS

CARBONA

No. 100

No. 200

No. 100—For general factory, store, automobile repair shop or household use, or in public buildings of all kinds. Weight, 4¾ lbs. ..... Each, $1.50

No. 200—With bracket and finger pull ring. For use in an automobile. Weight, 5 lbs. ..... Each, $2.00

Refill Cans—1-quart ..... " 1.50

No. 100 packed twelve in a carton. No. 200 six or twelve in carton. Refills, twelve in a carton.

The Carbona Fire Extinguisher is chemically perfect. It is filled with a liquid, which when it strikes flame exudes a dense vapor. This vapor displaces all the oxygen about the flame. Fire cannot burn without oxygen—the fire is out. Carbona Fire Extinguisher Liquid is almost twice as heavy as water. It can be directed a distance of many feet by a simple flip of the wrist.

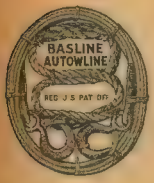
TOWING DEVICES

BASLINE AUTOWLINE



Yellow Strand

Made of the best quality ¼-inch "Yellow Strand" wire rope. Length, 20 feet. Equipped with two patent snaffle hooks and two Manila slings. Can be rolled up in a flat coil and carried under a cushion. Approximate strength, 8600 lbs.

No.	280
Weight, lbs	5
Each	$6 00

One in a carton.

POWER STEEL

A flexible cable of great tensile strength for towing heavy cars and the largest tractors. Cable ⅛-inch in diameter, 18 feet in length, with 2 plain hooks and 2 rope slings.

Weight, lbs	18½
Power Steel	Each $12.00

KANTBUST'ER TOWLINE

Composed of 16 strands of pure Manila Binder Twine and 8 strands of galvanized wire interwoven gives it a tensile strength of 8000 pounds.

As an emergency line no car owner will be without it. Besides its use as towing, it takes the place of chains and in every way the user of this Towline is protected against any emergency.

Length, ft	25
Weight, lbs	2¼
Each	$3.00

SURE-FIT

The only towing cable put on a reel and made with a double hook. Made of crucible steel and will stand over 7000 lbs strain. Furnished with two Manila slings. Weight, 7 lbs.

No. 30C—For Autos.....Each $9.00

Constructed of ½-inch blue center steel cable, 18 feet long, and is equipped with 32 inches of ⅞ Manila rope slings. Will stand a strain of 12 tons. Weight, 10 lbs.

No. 30C—For Trucks.....Each $18.00

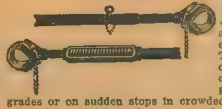
TOWING CHAIN

AMERICAN

The American Automobile Towing Chain is made of flat link steel chain, 18 feet long, fitted with a flattened S hook and tanned leather tubing 15 in. long on the other end. Non-kinkable.

Weight, lbs	12
American—One in a canvas bag	Each $5.00

TOWING POLE



The danger and inconvenience of towing disabled cars is practically eliminated by this device. The brakes of the towing car are in absolute control of the rear car. No danger of jamming on down grades or on sudden stops in crowded streets. The heavy coil spring is applied in such a manner that it cushions both pulling and ramming shocks, so that there is no jerk or jar on either car. The connecting clamps are equipped with heavy steel chains, 30 inches long with a secure spring latch.

This clamping device gives the pole a practically unlimited range of application, either to axle, spring or frame of either car. The pole telescopes, and is adjustable from 5 feet 6 inches to 8 feet. Strongly constructed and is made of double steel tubing. Shipping weight, 30 lbs.

Each $12.00

PULL-U-OUT

The Pull-U-Out consists of a substantial winding drum with gears inside which engage a small gear at the end of a long ratchet crank. Forty feet of steel cable, with 5000 pound capacity, a pulley and two 7-foot chains with hooks on each end, complete the pulling device.

Three 1-pound stakes, each 13 inches long are provided with each Pull-U-Out. Complete outfit weighs 26 pounds, and will fit into a space 4 inches by 14 inches.

Pull-U-Out—Complete ..... Each $20 00

SLING CHAINS

ACCO

A helper that will pay for itself many times over in any garage or repair shop. To lift motors and transmissions from the chassis, raise a front or rear end when replacing springs or removing axles, and do a hundred and one other odd jobs of heavy lifting where absolute safety is the first essential. Made of proof tested welded coil chain with ring on one end and a grab hook on each free end. Finish, self colored. Made in two sizes only.

Size, inch	¾	⅞
Lgth of each branch over all, ft	5½	9½
Bearing strain, lbs	3000	5000
Weight each, lbs	8½	21
Each	$3 00	6.50

One in a strong canvas bag.

FIRE EXTINGUISHERS AND LIQUIDS

PYRENE

Prices on Request

EXTINGUISHERS

A Double-acting, One Quart Pump, Strongly Constructed. Throws a Continuous Stream Twenty-five Feet. Fourteen Inches Long; Three Inches in Diameter. Weighs Six Pounds. Easily Operated, and May be Refilled as Readily as a Kerosene Lamp. Handsomely Finished and May be Carried in the Special Holder on the Dashboard or any Convenient Point of Car.

LIQUID

When Pyrene Liquid is Pumped on a Fire, it is Changed to a Heavy Blanket of Gas That Surrounds the Flame, Cuts Off the Oxygen and Puts Out the Fire. Non-Damaging and Non-Corrosive, Does Not Freeze at 60° F. Below Zero, and is Good Until Used, Because It Does Not Deteriorate. Neither Does It Evaporate, Being Enclosed in a Sealed Cylinder.

	Per Quart
No. Q150—Quart Cans	$1.50
	Per Gal.
No. 600—Gallon Cans	$6.00

Loose.

J-M

The J-M Fire Extinguisher Possesses Every Desirable Feature of the One-quart Type Plus an Exclusive Two-way Method of Operation. This Method Permits Discharge, Either by Pumping or by Storing Sufficient Pressure with Nozzle Closed to Discharge Contents when Nozzle is Opened. With the Latter Method Both Hands are Left Free to Aim, and Operation in Cramped Quarters is Greatly Facilitated. Its Use Entitles Car Owners to 15% Reduction on Auto Insurance. The Fluid Never Deteriorates is Non-corrosive, a Non-conductor, and the Only Fluid Recommended for Use in the J-M Extinguisher.

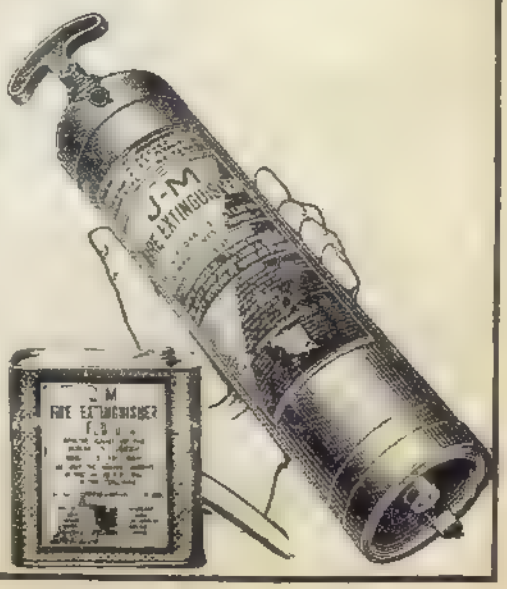
No. 33—50 or 110 Gallon Drums	4.50 Per Gallon



FIRE EXTINGUISHERS

PYRENE

Approved and Labeled by the Underwriters' Laboratories, Inc.

Pyrene Fire Extinguishers are the safest and most effective type for electrical and fires starting in oil, gasoline, shellac, paints or other highly inflammable substances. Water only spreads oil fires and it is dangerous to use water on an electrical fire.

Insurance companies recognize the value of Pyrene and grant a 15 per cent reduction in automobile fire insurance when cars are equipped with Pyrene. Reduction in premium is also given for Pyrene equipment on other risks.

Laws require and safety demands that motor boats carry a fire extinguisher. Pyrene is sure on gasoline and oil fires, so there's safety afloat with Pyrene in the boat. Approved by the U. S. Steamboat Inspection Service.

Thoroughness and ease of operation of Pyrene by women and children commend Pyrene to anyone for home protection. Approved by Good-Housekeeping Institute.

Pyrene is found all over as standard fire protection for inexpensive fires by large railroads, factories and power plants all over the country.

Pyrene will not injure delicate fabrics or sensitive machinery. Pyrene requires no recharging unless used on a fire. This lessens the upkeep cost. Pyrene can be left in unheated buildings or in exposed places as the liquid does not freeze at 30 degrees below zero.

Always use Pyrene Liquid in refilling Pyrene extinguishers. The use of other liquid may injure the mechanism.

PYRENE WITH BRACKET

	Each
Pyrene Extinguisher, Complete with Black Enameled Bracket	$10.00

Pyrene with Watchman's Holster

PYRENE WITH WATCHMAN'S HOLSTER

No watchman is completely equipped unless he is armed to fight fire. This holster is made of heavy reinforced brown canvas and enables Pyrene to be carried over the shoulder out of the way but ready for instant service.

	Each
Holster Only	$1.50
Holster Complete with Extinguisher	11.00

PYRENE METAL BOX

Boxes are substantially made of metal, Painted Bright Red. They Hold One Extinguisher and Prevent Tampering.

	Each
Metal Box Only	$1 50
Metal Box Complete with Extinguisher	11 00

PYRENE LIQUID

Size Package	Quart	Gallon
Each	$1.50	6.00

PYRENE ACID SYPHONS

Used by chemical plants, manufacturers using acids, storage battery manufacturers and charging stations, drug stores, fire departments, railroads and all places employing sulphuric acid.

Pyrene Pneumatic Acid Syphons are indispensable for the safe handling of acids from carboys into bottles or other containers. Acid spattering or splashing will cause great damage to anything it touches. This danger is eliminated with the Pyrene Acid Syphon.

The Syphon is constructed so that the flow of acid is rapid and smooth. A valve is simply pressed down and a few strokes of the pump start the flow. Releasing the valve stops the flow. The Syphon is not affected by sulphuric acid or its fumes.

	Each
Pyrene Acid Syphon	$10 00

PYREX TRANSPARENT OVEN-WEAR

PYREX GLASS

Clear as Sunshine; Serviceable, Beautiful and Durable. Nothing can Penetrate its Hard Polished Surface; Does Not Scratch, Chip, Crase, Dent or Bend. It Fills Every Requirement of a Baking Ware and a Table Ware.

GASOLINE LAMPS

REGULAR AIR-O-LITE

Will Give the Farmer and Resident of the Small Town a Brighter Light at Less Cost than he can get by any other method

Needs Filling Only Once a Week by Three Hours Use Each Night. Gives a Light Five Times Greater than any Center Draft Oil Burner and Twice as Great as any Mantle Gas Burner. The Light is Soft and Soothing to the Eye.

No possible chance to spill any fuel by dropping or overturning, explosions are impossible -a child can fall down stairs with lighted lamp and no danger of fire: Lamp can burn dry with entire safety, and no injury to any part of the lamp itself. Operates at 10 pounds pressure—the fount tests 200 pounds. When the filler cup is removed from lighted lamp it goes out instantly; it is therefore impossible to fill a lighted lamp.

GASOLINE LAMPS AND LANTERNS

"AMERICAN READY-LITE"

No Torch—No Alcohol; Lights with a Match; Can be Cleaned Instantly While Burning

A combination of both large and small generators is used, thus retaining the quick lighting feature of the small generator without sacrificing the advantages of the large generator. Carbon and other impurities instantly removed from gas orifice by means of the handy instant cleaner, while the lamp is burning. Just a twist of the wrist and the job is done. Cleans from the outside like a hand cleaner, no small parts or mechanism inside the generator to cave trouble.

Unquestionably the most beautiful of all gasoline gas portables. Rich and massive in appearance. Built entirely of brass. Material and workmanship of the highest grade in every respect. Finished in highly polished nickel. Equipped with 10 inch beautiful opal dome shade with 3 inch crystal bead fringe to match.

Each

No. P67-6—Base or Fount is 8¼ inches in Diameter and Holds nearly Two Quarts of Gasoline. Lamp Burns 22 to 24 Hours on a Filling. Approximately 400 candle power. Uses one Large Mantle. Filler Plug Tightened or Removed with the Fingers; no Wrench required. Lamp is 23 inches High.....$12.50

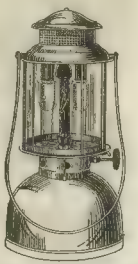
Each Lamp Packed in Strong Corrugated Board Box complete with Pump, Wrench, Mantle and Instructions for Operating. Shipping weight 12 Lbs.

Built of Brass and Finished in Polished Nickel with Solid Hardwood Ebonized Standard. Has 10 inch Ribbed Shade. Universal Spring Holder Holds Shade securely and Fits all Standard Shades used on Gasoline Portables.

Each

No. 1200—Base or Fount 8¼ inches Diameter, Capacity nearly Two Quarts. Lamp Burns 16 to 18 Hours on One Filling. Uses Two Mantles, approximately 400 Candle Power Light. Lamp is 19½ inches High.....$11.00

Each Lamp Packed in Strong Corrugated Board Box complete with Pump, Wrench, Mantles and Instructions for Operating. Shipping weight 8 Lbs.



The **Ready-Lite Lantern** is used for Every Purpose for which a Hand Lantern is required. Wind and Storm Proof and Safe under All Conditions. Has Metal Reinforced Mica Globe, no Tin Sections to Obstruct the Light. Entire Top Removed by Depressing the Spring which holds it in place. This is a great convenience in lighting or replacing mantles.

Each

No. 1250—Made Entirely of Brass Nickel Plated and Polished. Base or Fount Holds about One Quart of Gasoline. Burns 10 to 11 Hours on a Filling. Two Mantles, approximately 400 Candle Power. Filler Plug Removed or Tightened with the Fingers—no Wrench required. Height (not including Bail), 13 inches $10 80

Each Lantern is Packed in Strong Corrugated Board Box complete with Pump, Wrench, Mantles and Instructions for Operating. Shipping weight 5 Lbs.

Storm and Rain Proof. Automatically Cleaned: Cannot Clog

For Campers, Hunters, Summer Resorts, Street Shows, Circuses, Railroad Yards, Freight Houses, Way Stations, Docks, Warves, Camp Meetings, Street Lighting, etc.

An Efficient, Safe, Reliable, Powerful and Economical Light. Absolutely Storm-proof and will Burn Anywhere and in Any Position. It is Simple in Construction and in Operation. Easy to Light and Extinguish and can be taken apart in a few seconds if desired. Equipped with Automatic Tip Cleaner which Prevents Clogging; Rag Mantle, Mica Chimney, Pump and Lighter.

	Each
No. S. K.—13 in. High; Fount Holds One Quart, Burns 15 Hours on One Filling. Produces 250 Candle Power. Takes No. 120 Mantles	$6.50

Shipping Weight 5 Lbs. Each

GASOLINE LANTERNS

"COLEMAN"

QUICK-LITE LANTERNS

Lights with a Match; No Other Generating Required
Wind-Proof, Rain-Proof, Blizzard-Proof; Brighter than Twenty Oil Lanterns; Night Work Easy

On the Farm it is Indispensable—for the Barn, the Feed Yard, the Granaries, and all late work about the place. For Builders and Contractors, Blacksmith and Repair Shop, Warehouse, Store, Garages and Stables, Tent Shows, Camp Meetings, Street Stands, Bowling Alleys, Shooting Galleries, and will be just the Lantern for Boat Landings, Picnic Grounds, the Summer Cottage and the Outing Party Everywhere. It's the One Great Light Not Affected by Wind or Snow, Sleet or Cold.

The Air-O-Lantern is a Wonderful Outdoor Portable Lamp Producing 300 Candle Power, 12 to 15 Hours from a Quart of Common Gasoline. It Produces a Steady, Penetrating, Powerful Light in the Midst of the Wildest Winter Storm as well as on the Quiet Summer Night. Much Safer than the Common Oil Lantern.

Each

No. LQ-328—16 in. High, 7 in. Diameter; Mica Chimney 5 in. Diameter; Extra Heavy Brass, Full Nickel Plated; Fount Holds 3 Pints, Burns About 15 Hours, Gives 300 Candle Power Light.....$8 00
Shipping Weight, 10 Lbs.

No. 327-LQ—Mica Chimneys.....1.20

ARC LANTERNS
With Torch Lighting Burner
Guaranteed Storm-Proof and Bug-Proof. An Ideal Light for Use in Front of Stores, Churches, and Public Buildings

Gives a Strong, Steady, Powerful Light by which work is a Pleasure. It is handy about the Coal Stable, Barns or Yard. When hung up, it gives a Good Light for 100 yards in every direction; Placed on a Post 6 to 8 feet from the ground it serves as a Street or Yard Light; Can be instantly carried from place to place.

It is useful around Warehouses, in Basements and similar places. Hotel and Liverymen find it Indispensable, and for Camp Use there is nothing that will compare with it.

It is just the Lantern for Outside Construction Work, Factory Use, Railroad and Mining Work, and any place where a Portable Lamp of High Candle Power is Demanded.

Ten Shows, Camp Meetings, Street Stands, Tennis and Croquet Grounds can be Satisfactorily Lighted with it.

Each

No. HV316—13¼ in. High; 10¼ in. Diameter; Solid Brass, Burnished and Lacquered; Fount Holds 2 Quarts; Gives More Light than 20 Oil Lanterns.....$12.00
Shipping Weight about 14 Lbs.

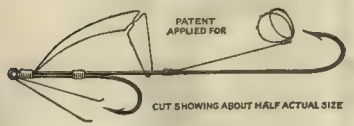
FROG HARNESS



Holds the Frog without Hooking and Keeps it Alive. Most Humane and Truly Sportsmanlike Tandem for Casting and Trolling

The U-B Live Frog Harness holds the frog perfectly, and keeps it **absolutely alive.** The frog is so held **without hooking,** that it has **free use** of every part of its body, and it is always in natural position, and riding properly, thus making the bait most attractive. An unlimited number of casts may be made **without injury to the frog;** it never bloats, or opens mouth, and it may leap, float or swim with perfect ease.

Weight each, lbs	105	132	163	232
Each	$155 00		200.00	270.00

RUSH

For lifting heavy loads in repair and machine shops and industrial plants or wherever a well constructed and dependable tool is required, these jacks find great favor with superintendents, foremen and workmen.

Because of their simple and rugged construction, lack of complicated working parts and ease of operation, they are ideal for general use.

No.	25-A
Capacity, tons	10
Height, inch	24
Lift, inch	16
Weight each, lbs	68
Each	$67.00

TRACK JACKS

BARRETTS AUTOMATIC

The lifting power of the Barrett jacks is simply a question of leverage. Depends entirely on the length of the lifting lever and the distance from the loaded end to the fulcrum point. In the Barrett jack this is one inch. Therefore the leverage of the jack is 60 to 1. If the man weighs 150 lbs he can lift 150x60 or a total of 9000 lbs.

No. 2

For all general lifting purposes. Double acting, lifting load on both upward and downward stroke. Automatically lowered by operator. Foot at base for lifting low set loads. Has no trip, cannot drop a load through carelessness. Malleable iron frame or base. Forged steel rack with machine cut teeth. Rolled steel fulcrum pin. Hardened steel bearings. Selected hardwood handles.

No.	2
Capacity, tons	10
Height of bar down, inch	21
Raise of bar, inch	10
Size of ratchet bar, inch	1⅛x1½
Weight each, lbs	65
Each	$25.00

Combined trip and automatic lowering Compound lever. Double acting and reversible. General construction same as No. 2.

Each

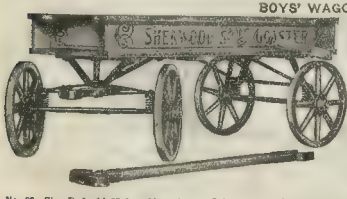
No. 585—Size, 42x18 in.; Seat and Back Upholstered in Silk Plush $10.00

One in a Crate, Weight About 39 Lbs.

BOYS' WAGONS



SHERWOOD SPRING COASTER
Equipped With Shock Absorbers

The Box is Made of Selected Well Seasoned White Ash with the Corners Carefully Mortised; Removable Sides; Substantial Platform. The Wheels are of the Auto Type, with Hub and Bushing of Cold Rolled Steel; Spokes are of Well Seasoned Second Growth White Ash, Mitered and Machine Riveted in Hub; Wooden Felloe; Electrically Welded Tires. Hand Drawn Bessemer Steel Roller Bearings. The Brake is always held in place away from the wheel by a Concealed Spring. Steel Axles.

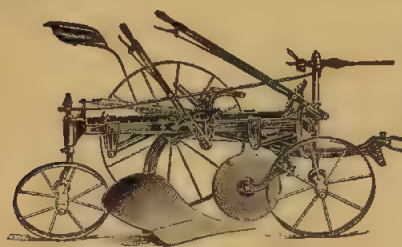
The Coiled Springs that Absorb the First Shocks are of Fine Steel attached to the bolsters and Enveloped in Solid Steel Casings. These Casings are made of such a height that under heavy pressure they transfer the weight directly to the axle and to the Transverse Springs thus Insuring Ease of Riding either under light or unusual loads. This division of strain means constant resiliency of the coiled springs and, corresponding decrease in wear of all the parts.

Per Dozen

No. 32—Size Body 14x32 in.; Size Wheels 8 in.; Weight Each 26 Lbs. $26.00
No. 34—Size Body 14x34 in.; Size Wheels 10 in.; Weight Each 30 Lbs. 60.00
No. 36—Size Body 16x38 in.; Size Wheels 10 in.; Weight Each 37 Lbs. 70.00

One-Twelfth Dozen in a Container

ROYAL BANNER SULKY PLOW



Soft Center Steel Mouldboard, Landside and Share.

HEAVY BEAM, DUST PROOF AXLE.

A STRICTLY FIRST-CLASS, HIGH-LIFT, FOOT-LIFT, SPRING-LIFT, BEAM HITCH, LIGHT DRAFT PLOW.

The Royal Banner Sulky Plow is constructed of high grade materials in every way. It is very simple in operation, yet very strong and durable. Has all of the very latest features, making it one of the easiest plows to operate ever produced. It is very light in draft, but at the same time very strong and is positively guaranteed to give complete satisfaction. THE FOOT LIFT IS MOST EFFECTIVE. A slight push of the foot releases the plow which enters the ground and reaches its proper depth within eighteen inches travel. The foot lift is so easy a child can operate it. The lift is directly in front of the driver where weight can be instantly applied. As soon as the plow gets its depth it is automatically locked in the ground and cannot lift until pressure is applied to the foot lift. **FRAMES** are of heavy, high carbon steel bars. There can be no sagging or bending to cause the plow to run out of line. **THE LAND WHEEL AXLE** crosses under the frame with a box on either side of the frame and combines to support the axle and divide the strain. This feature keeps land wheel in proper position and adds strength to plow. The front furrow axle socket casting has slot holes to take up the slack after the plow has been used for some time, preventing it cutting too wide a furrow.

ON STONY GROUND the plow can be left loose in the frame, to rise when it strikes stone or root. By the turn of the set screw the locking device can be thrown off its center and the plow will rise out of the ground, saving the point of share.

LEVELING LEVERS are within easy reach of the operator to the right, allowing free clearing space at left side for mounting and getting off the plow.

WHEELS are set true so that when at work there is no slipping or friction of any kind. The plow will follow the horses as true as a wagon. Where wheels are not running in direct line, it means adding another horse to your plow.

THE LINE OF DRAFT is so true that there is no need of setting one wheel barrel against another to line up plow.

FRONT FURROW WHEEL has a latch or hand lever, whereby the furrow wheel can be adjusted while plow is working, without the necessity of loosening any bolts on pole. An advantage. When a horse is tiring, and there is a tendency to lag, the wheel can be instantly adjusted to overcome any side draft. This improvement allows operator to finish up a piece of land to advantage.

THE REAR AXLE is set to positively take the friction from the land side of plow bottom. The connecting rod enables the front and rear furrow wheels to work together.

DUSTPROOF HUBS AND SAND BANDS on all wheels. A spring oil cup permits perfect lubrication.

ROLLING COULTERS are fastened to beams with corrugated washers and an eye-bolt through the beam. They are easily adjusted to any angle.

PLOW BOTTOMS are extra well braced, and of the most approved shape.

MOULDBOARD and SHARES are constructed from the highest grade soft center steel, and shinned on the upper side, producing double wearing qualities where the wear comes. The share and mouldboard are bound together by solid malleable frogs and heavy braces. Shares are reinforced at point by a heavy piece of steel, thoroughly welded and highly tempered. This produces durability where the greatest wear occurs.

PLOW IS CARRIED ON THE WHEELS WHILE PLOWING. The Plow does not carry the wheels as is the common fault with other makes.

WITH each plow we also furnish 3-horse evener, pole, neckyoke, rolling coulter weed hook, and wrench. Made in three sizes, 12, 14 and 16 inch, with general purpose stubble or Turf and Stubble bottom. Shipped direct to you from Illinois Factory.

ROYAL BANNER GANG PLOW

AN UP-TO-DATE, HIGH-LIFT, FOOT-LIFT, SPRING-LIFT, BEAM-HITCH LIGHT DRAFT PLOW.

The Royal Banner Gang Plow is built in the same factory; of the same high grade materials; by the same skilled workmen on the same principle as the Royal Banner Sulky, which is described above.

FRAME is of high carbon steel, very strong and rigid. The land wheel axles crosses under frame with a box on either side, which combines to support axle and divide the strain. This feature keeps the land wheel in its proper running position, and adds strength to plow. The front furrow axle socket casting has slot holes to take up the slack after plow has been used for some time, preventing it cutting too wide a furrow.

FOOT LIFT is simple and effective. A slight pressure releases plow, pushes it into the ground where it reaches its proper depth within 18 inches. The lift is directly in front of driver, where weight can be instantly applied. As soon as plow gets its depth, it is automatically locked and can not lift until foot pressure is again applied.

IN STONY GROUND it can be left loose in frame to rise when striking a root or stone. By turning a set screw the locking device can be thrown off its center and plow will rise out of ground, saving point of share.

LEVELING LEVERS are to the right of operator and within each reach. Perfect leveling is assured at all times.

WHEELS ARE SET TRUE. There is no slipping or friction. **FRONT FURROW WHEEL** has a latch or hand lever, whereby the furrow wheel can be adjusted while plow is working, without loosening any bolts on pole. The wheel can be instantly adjusted to overcome any side draft.

THE REAR AXLE is so set that all friction is taken from plow bottom. The connecting rod enables the front and rear furrow wheels to work together when turning corners.

DUSTPROOF HUBS AND SAND BANDS on all wheels. A spring oil cup permits perfect lubrication.

ROLLING COULTERS are same as described with sulky plow.

PLOW BOTTOMS are extra well braced and of most approved shape.

MOULDBOARD AND SHARES are constructed from the highest grade soft center steel, and shinned on the upper side, producing double wearing qualities where the wear comes. The share and mouldboard are bound together by solid malleable frogs and heavy braces. Shares are reinforced

at point by a heavy piece of steel, thoroughly welded and highly tempered. This produces durability where the greatest wear occurs.

REINFORCED SHARE AND MOULDBOARD are bound together by solid malleable frogs and heavy braces.

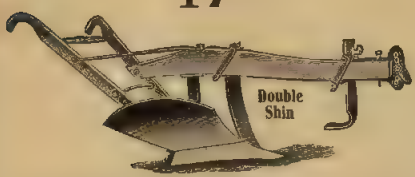
IMPERIAL BRUSH PLOW

$17.95



Wood Beam, Double Shin Brush Plows, complete with Quincy cutters. A good general-purpose plow. Light, strong and serviceable. Has heavy wrought-iron strap under beams, which greatly strengthens it and makes it a plow to stand hard usage in a brushy country among roots and stumps. Also makes a good road plow. The Quincy cutter is bolted to the landside and to beam, and when worn on one end can be turned and used on the other. Well shaped handles, and entire plow strongly braced. Share is best soft-center steel. Shipped direct to you from Illinois factory.

B-2545—12-in., with Quincy cutter, 110 lbs. $17.95
B-2546—14 in., with Quincy cutter, 120 lbs. 19.95
B-2547—Extra shares. 12-inch, $3.00; 14-in. 3.50

LARIMER DITCHING PLOW

The Larimer Ditching Plow is designed to do the digging or loosening up of the earth in the ditch. Will work in the hardest ground to the depth of at least 3 feet. On frequent tests two men and two horses have thrown out 40 rods per day out of a ditch 16 inches wide and 3½ feet deep.

Has all chilled bottom and makes a furrow 8 inches wide. The tile bed shovel regularly furnished with plow, is for finishing up the bottom of the ditch ready for laying the tile. It grades and levels all uneven places so that the fall of tile is exactly uniform.

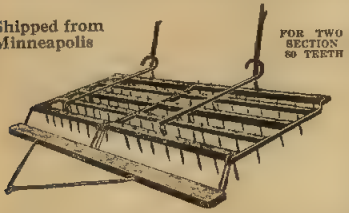
Has sub-soil attachment consisting of shield or plate that attaches to side of plow converting ditcher into an excellent sub-soiler; also adjustable beam that allows setting ditcher to follow right or left hand plow.

Complete directions with each plow. Shipping weight of plow, with tile bed shovel, 150 pounds. Shipped direct to you from our Illinois factory.

B-2548—Plow complete, with the tile bed shovel and sub-soil attachment $23.50
B-2549—Extra points. Ship. wt., 10 lbs. each. Price 1.95
B-2550—Steel shares, extra. Ship. wt., 15 lbs. 5.95

WOOD FRAME LEVER HARROW

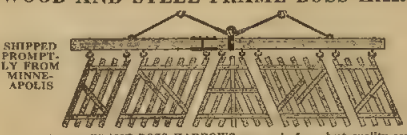
Shipped from Minneapolis



Our WOOD FRAME LEVER HARROW is made exceptionally strong, out of the very best of material, and is guaranteed to give complete satisfaction in every way. It is made up of fine cross bars, 2x2½ inches; made entirely of well seasoned oak, finely painted. Teeth are 8 inches long; square head. ⅝ inch square, made of hard steel, with rivet at each tooth. The teeth are so placed that each section will work naturally like the center section of the Boss harrow. Sections are so arranged that the ground between each section will be harrowed. By means of the lever the teeth can be set in any position for pulverizing or at any desired slant. Two or more sections can be coupled together. The end of each bar is protected by a patented channel over the end of each bar and securely bolted to the side. Four and five section harrows are equipped with equalizer. Shipped direct to you from Minneapolis factory.

		Teeth	Cuts	Weight	
B-2551—2	section Harrow	80	10 ft.	178 lbs.	$20.40
B-2552—3	section Harrow	120	15 ft.	266 lbs.	32.50
B-2553—4	section Harrow	160	20 ft.	360 lbs.	42.50
B-2554—5	section Harrow	200	25 ft.	443 lbs.	56.00

WOOD AND STEEL FRAME BOSS HARROWS



Our WOOD FRAME BOSS HARROWS are made from best quality seasoned hardwood, strongly riveted and firmly braced. All wood parts are well painted. You will need only to compare our harrow with those offered by others to see what a big value we are offering. Each section is independently connected to the draw bar. This makes the harrow flexible. Dagger teeth are used to insure deep cutting and perfect pulverizing. We fit all sizes with draw bars. The 4- to 6-horse harrow can be used complete or each one or two or three sections used as desired. Shipped direct to you from Minneapolis factory.

No.			Weight	
B-2558—2 horse	60 teeth	Cuts 10 ft.	150 lbs.	$
B-2557—3 horse	78 teeth	Cuts 13 ft.	190 lbs.	17.95
B-2558—3 horse	102 teeth	Cuts 18 ft.	256 lbs.	23.50
B-2559—4 horse	150 teeth	Cuts 26 ft.	375 lbs.	33.95
B-2559½—4 horse	174 teeth	Cuts 29 ft.	440 lbs.	43.95
B-2559½—6 horse	222 teeth	Cuts 37 ft.	560 lbs.	53.95

This Harrow is made entirely of steel with the exception of the cross braces on top. Cannot get out of order or broken. The teeth extend through the steel bar and are firmly riveted. Cannot work loose. The wood cross braces allow sufficient spring which is necessary for proper work. We guarantee this to be the best Boss Harrow on the market. Shipped direct to you from Minneapolis factory.

U-BAR STEEL HARROW

Our "U-Bar" Steel Harrows are made by one of the largest harrow manufacturers in the country. They are built of selected materials and are guaranteed to give complete satisfaction in every way. Each section is made with five U-bars and three channel bars of high carbon steel, well braced. Six teeth are in each bar, making the sections contain thirty teeth. The teeth are made of ⅝ inch high carbon steel, and headed. The teeth are securely held in place by a positive clamp, and are adjustable to take care of wear. Lever with each section enables them to be adjusted to any and all conditions. No better construction is possible than that used in the manufacture of our steel lever U-Bar Harrow. It is guaranteed to give satisfactory service in every respect and is built right from start to finish.

Shipped direct to you from Illinois Factory.

SAMPSON POWER WASHER WITH SWINGING POWER WRINGER

CAN BE USED WITH GASOLINE ENGINE, ELECTRICITY OR BY HAND

FULLY GAURANTEED—SENT ON THIRTY DAYS' FREE TRIAL

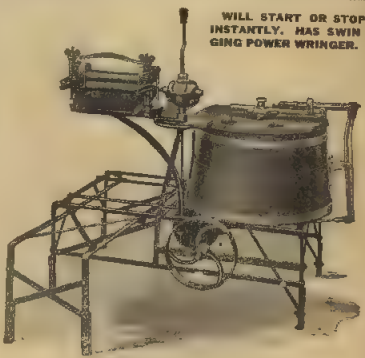
STOP WASHING AND WRINGING CLOTHES THE OLD WAY

SAMPSON STAVE LEG MACHINE

Why continue the old tub and washboard method when you can secure a machine that will do all this work for you and relieve you of all worry? By using the Sampson Power Washer you can do your washing and wringing easily, quickly and with very little expense. It washes and wrings at the same time. It is easily operated and can be run with a one-horsepower engine or an electric motor. By raising the lid of washer the machine stops. By a simple touch of the lever the wringer starts either forward or backward. It can be instantly stopped at any point, thus avoiding tearing the clothes or injuring fingers.

THE MAIN DRIVING MECHANISM is mounted under the main frame of the Washer. Most of the gearing is under the tub, therefore out of the way. It is protected to keep from catching the clothes or fingers. The main drive pulley for operating with an engine is 11¾ in. in diameter with a 2-in. face. For motor operation a 16¾-in. grooved pulley is used. The drive shaft should run 200 revolutions per minute. **The Washer** is operated by means of a rack bar which furnishes a smooth, steady, quiet running machine. By raising the rack bar the Washer stops, and by lowering it, starts. The Washer is also stopped by means of a clutch improvement, fastened on the side of the tub, as illustrated. **The Washer is operated exclusively by gears,** eliminating the unavoidable troubles arising from belts. We have an extra large size, hardwood agitator (or dolly) which is adjustable, the shaft raising up through the lid of the Washer. The shaft or stem on which the dolly is fastened is **galvanized,** as well as all other metal parts inside of the tub. **The capacity of the tub** is 18 gallons. It is best southern cypress, corrugated sides and bottom. Inside measurements are 22½ in. diameter at bottom and 12¾ in. high. We have a special improved screw plug type water drain with extension so a rubber hose can be attached. **THE SWINGING POWER WRINGER** on the machine strongly appeals to the busy housewife and enables you to wring all of the clothes by power. This powerful wringer is operated by concealed gears, it swings to and locks over the different tubs. You can thus wring the clothes from the Washer into the rinse tub from the rinse tub into the bluing water and into the clothes basket. The wringer can be stopped, started and reversed almost instantly by use of the conveniently arranged lever The wringer is well braced and supported. The wringer is two-roll, solid weight rubber (10x1½ in. rolls) reversible wringer, adjustable by screws and springs. **THE STEEL FRAME,** 1x⅛x⅜ in. channel iron, is used for the main frame, which stands 16 in. high, is 23½ in. wide and 43 in. long. The tub is fastened to the frame by lugs and bolts. The sliding racks are strong and actually hold a tub of water. The Stave Leg type has a wood brace and a special ⅝-in. rod brace to insure durability. An adjustable height **platform** is furnished on all Steel Frame Washers, further helping to furnish a maximum of comfort to the user. **A SPECIAL FEATURE** which will strongly appeal to the busy housewife is that this Washer and Wringer can be operated by hand should the power fail. A wood handle for this purpose is included in the price. The tubs are varnished and the metal parts covered with paint, making a neat and attractive machine

COST OF OPERATING. You can do a week's washing for only a few cents' worth of gasoline and a few cents' worth of electric current—figures hardly worth mentioning. **Make Washing a Pleasure.** Let one of these Washers do this dreaded backaching, tiresome work of washing and wringing clothes. Washing is work for machinery and to do it the old-fashioned way is a waste of labor, nerve, time and money. Instead of ruining your health by standing over the washer or tubs with steaming hot water for hours, these Power Washers will wash your clothes a snowy white and do all of your washing quickly, easily and with little expense. **Washes and Wrings at the same Time.** These machines will do the washing while you are doing the wringing, being operated simultaneously, or will wash the clothes while you may be attending to other household duties.



SAMPSON STEEL FRAME MACHINE

OUR GUARANTEE

We guarantee our Washers to be constructed from good material throughout. We will replace **FREE OF CHARGE** any casting that may prove defective within one year from date of purchase.

FREE TRIAL OFFER

You may not be able to fully appreciate the advantage of such a labor-saving Washer **without a trial.** We are so confident you would be pleased to see the wonderful **saving of time and labor** by owning such a Washer, that you may test out any machine for 30 days. If at the end of that time you do not find the Washer satisfactory and as represented, you may return it to us, and we will refund your money and pay the freight We are in position to ship these Washing Machines promptly from factory in central Illinois. Tub or basket is not furnished. Our Jeffrey Gasoline Engine is shipped from Missouri factory.

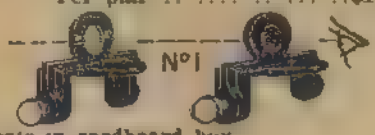
Adjustable. Cast iron frame. Polished and blued finish. Steel set screws.

For Iron Levels

No.	2
Weight, lbs	¼
Per pair	$1 50

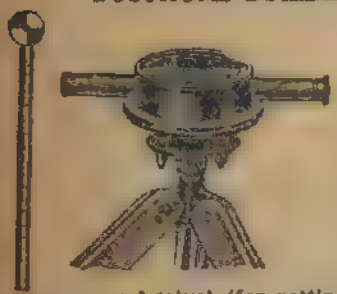
For Wood Levels

No.	1
Weight, lbs	¼
Per pair	$1 20



Above one pair in cardboard box.

LEVELS
BOSTROMS BUILDERS WITH TELESCOPE



For builders and contractors. Brass, highly lacquered and finished. Graduated circle, divided into 360 degrees, numbered from zero to 90 degrees in both directions, giving zero points on opposite sides of the circle. Clamping screw for holding in any position. The telescopes are achromatic, giving a clear field, with magnifying eye-piece. Packed in hardwood box with lock and leather strap and contains a metal trivet (for setting level where the use of tripod is difficult), adjusting pin, plumb bob and sun shade.

No. 8—Complete with plumb bob, tripod and graduated rod with target. The magnifying power of the eye-piece is 10 to 12 diameter. Weight complete, 13 lbs.

Each $37.50

BOSTROMS FARM WITH TELESCOPE

Particularly adapted for leveling farms, also for terracing, ditching, irrigating and drainage work. Circle graduated to degrees. Metal parts made of iron, black enameled finish. Sliding telescope tube and level made of brass, polished and lacquered.

Level plumb and target in wood box, tripod and rod in bundle.

No. 2—Complete with plumb bob, tripod and graduated rod with target. Weight complete, 12 lbs.

Each $25 00

Above, in hardwood boxes.

MERCURY PLUMB BOB
STARRETTS

Made from solid steel nickel plated, bored and filled with mercury. Great weight in proportion to size, low center of gravity, small diameter, hardened and ground points, knurling on the body. Device at top for fastening end of line after winding up. Each with a braided silk line.

No. 87—Weight, ozs	4	8	14
Length, inch	4	5	5½
Diameter, inch	½	⅝	¾
Each	$1.80	2.40	3.00

One in a cardboard box.

PLUMB BOBS
STANLEY ADJUSTABLE

Constructed with reel at upper end, upon which the line may be kept. By dropping the bob with a slight jerk, while the ring is held in the hand, any desired length may be reeled off.

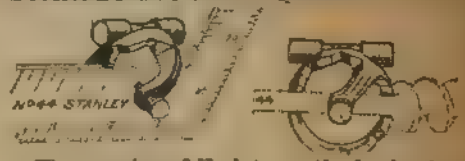
Per dozen	$2 60	3 00

STANLEY BIT AND SQUARE LEVEL



Three pairs of V slots on the back edge of the circular frame. The shank of a bit will lie in these slots either horizontal, vertical or at an angle of 45 degrees, and the boring can be done with accuracy by observing the level glass while turning the bit.

No.	44
Weight per dozen, lbs	1⅛
Per dozen	$6.00

STANLEY PLANES

DADO FILLETSTER AND MATCHING

No 46

Skew cutters are the feature of this plane. It consists of a main stock carrying a spur, a depth gauge and a slitting cutter, a sliding sect on carrying a spur and forming an extra sole for the plane and a fence (rosewood face) which can be set for either plow or filletster work. It has a rosewood knob and handle. Nickel plated.

The cutters comprise 8 plow and dado bits, 3/16, 1/4, 5/16, 3/8, 1/2, 5/8, 7/8 and 1 1/4 inches; a 1 1/2-inch filletster cutter; a 1/4-inch tonguing tool and a slitting cutter.

No.	46
Length, inch	10 1/2
No. cutters	11
Weight each, lbs	5 3/4
Each	$17.00

IMPROVED SCRUB

Iron stock. Japanned trimmings Single iron, with the cutting edge rounded, and is particularly adapted for roughing down work before using a jack or other plane.

No.	40
Length, inch	9 1/2
Cutter, inch	1 1/8
Weight each, lbs	2 1/2
Each	$4.50

SINGLE HANDLE VENEER SCRAPER

Blades adjustable endwise and for angle, and can be firmly locked in position desired. Can be used as a toothing and scraping plane, also for roughing up the surface of wood preparatory to veneering same. It has rosewood knob but no handle. Japanned.

No.	212
Length, inch	5 1/2
Blade, inch	1 5/8
Weight each, lbs	1 1/2
Each	$5.00

UNIVERSAL HAND BEADERS

For beading, reeding or fluting straight or irregular surfaces and for light routing. With each beader are furnished a square gauge for straight work and an oval gauge for curved work. Also furnished eight cutters sharpened at both ends as follows: 6 single beads 1/8, 3/16, 1/4, 5/16, 3/8 and 1/2 inches; 2 fluting tools 3/16 and 1/4 inches; 4 reeding tools (2 beads 3/16-inch, 3 beads 1/4-inch and 3 beads 1/8-inch and 4 beads 1/8-inch), 2 routers 1/8 and 1/4-inch, and a 5/8-inch blank, which latter cutter the owner can file up as he desires. Curved handles

No.	66
No. steel cutters	8
Weight each, lbs	1 5/8
Each	$9.00
Extra cutters or blanks	Each $1.10

ADJUSTABLE SCRAPER

Used for scraping and finishing veneers or cabinet work. It can be used equally as well as a tooth plane and will do excellent work in scraping off old paint and glue

No.	112
Length, inch	9
Cutter, inch	3
Weight each, lbs	4 1/4
Each	$7.75
Extra blades	Each $0.75
Extra toothing blades, Nos. 22, 23 or 32	" 1.10

IMPROVED ROLLER

Can be adjusted to any desired pitch and may be worked to or from the person using it. Roller acts as a support to relieve the strain on the wrist and hands of the workman. Handles can be detached for working in corners.

No.	83
Size of blade, inch	3
Length over all, inch	9 1/2
Weight each, lbs	1 1/4
Each	$2 30
Extra cutters	Each $0.45

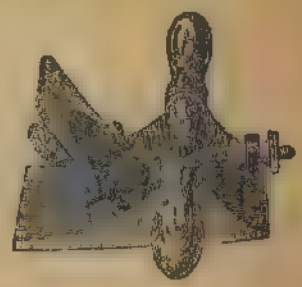
All above, one in a cardboard box

EDGE TRIMMING

Japanned. This plane is designed especially for trimming or smoothing the ends of boards, such as sidings, etc., for a square or close fit. It has a right angle rest or guide from the cutter edge, and the cutter works on a skew giving an easy shaving cut. In the rest or guide are two screw holes to which wood blocks of various bevels may be attached enabling the user to make a slanting cut

No.	95
Length, inch	6
Cutter, inch	7/8
Weight each, lbs	1 1/4
Each	$3 75

ADJUSTABLE VENEER SCRAPERS



No. 12

Takes the same cutters as scraper plane No. 112. For many kinds of work its peculiar form is of great advantage.

Nos.	12	12 1/2
Length, inch	6 1/4	6 1/4
Cutter, inch	3	3

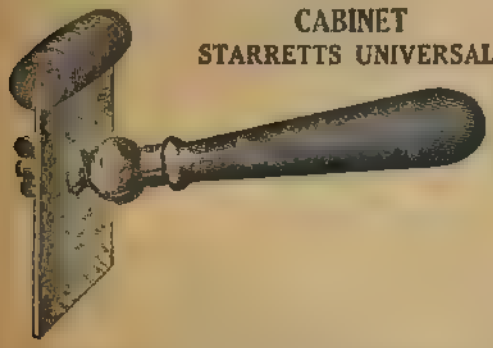
Weight per dozen, lbs	2½	3	3½
Per dozen	$2 80	3 10	3.40

One dozen in a cardboard box.

CABINET
STARRETTS UNIVERSAL



Edges of blades are ground perfectly square. There are therefore eight sharp cutting edges, and any of them can be brought into use by means of the handle with its ball joint connections. To lock or release the joint or place the blade at any angle it is simply necessary to give the handle a slight turn. Blade can be removed by removing the wing nut. Guard may be instantly slipped on or off either side or end of blade, and enables one to use the tool with arm grip.

No.	194
Weight each, lbs.	1¼
Each	$1 20
Extra Blades	Each 0.20

One in a cardboard box.

SCRAPERS

FLOOR
STEARNS

Adjustable cross-handle. Aluminum finish, with rubber wheels. The knife scrapes the floor when the machine is drawn towards the operator, and will, therefore, in connection with the adjustable cross-handle, which may be placed to one side or the other, work up to the wall and into corners. On using this see that the screw in the top of the cap is adjusted so that it will strike level on the knife. After once getting this screw in the proper place, leave it there, and in removing the knife for sharpening, always use the screw where the slot is. The knife is firmly clamped in the scraper, which, together with the weight of the machine, nearly all of which rests on the knife, prevents vibration or chatter, doing away with all wavy effects on the floor.

No.	10
Width of cut, inch	6
Diameter of wheel, inch	5
Length of handle, inch	38½
Length over all, inch	64
Weight each, lbs.	135
Each	$40.00

One in a case.

¼ Dozen Pairs in a Box; Weight per Dozen Pairs about 6 Lbs.

Equip the Barn Complete

Getting the agency for the STAR Line means inviting business as a complete barn outfitter. You have a line with "Something to sell the whole year around".

One STAR sale helps you open the way for another. Selling a STAR litter carrier, for example, makes it easier for you to sell STAR door hangers, STAR hay tools, STAR water bowls for stall and stanchions for the same barn.

As one dealer remarked: "Selling STAR goods makes one hand wash the other. Every time I or a STAR salesman in this territory make a STAR sale, we have a chance to include the sale of something else in the STAR line, which, of course, means more good business".

Who is selling the STAR Line in your territory? If the territory is not now represented, write us and let us tell you how you can turn it into a money-maker for you as a complete barn outfitter.

Ask for the STAR Catalog and Barn Book.

12 No. 6050—Aluminum stove complete with heat.
12 No. 4006—Canned heat. Free.

One assortment in a carton. Complete with large quantity of window display cards and advertising matter.

No. 750
Assortment $27.00

STERNO ASSORTMENT NO. 1225

A very attractive Sterno assortment, consisting of
12 No. 6050—Stoves complete with heat
12 No. 5001—Stoves complete with heat
24 No. 4006—Canned heat. Free.

One assortment in a carton complete, with a large window display equipment.

No. 1225
Per assortment $39.00

CAMP STOVES

CUB

Designed for camping, prospectors, mining and logging camps. Pressed steel body. Nickel plated thumb turn latch. Damper and end draft.

CAST TOP

Body 26 gauge steel.

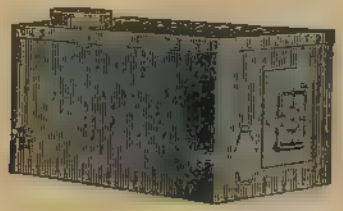
Nos.	2 C	4 C
Number holes	2	4
Height, inch	12	12
Size of top, inch	12½x20¾	16x22
Weight each, lbs.	22½	24½
Each	$9.50	10.50

STEEL TOP

Body 28 gauge steel.

Nos.	2 P	4 P	20	40
Number of holes	none	none	2	4
Height, inch	8	9¾	8	9¾
Size of top, inch	12½x20¼	15¾x22	12½x20¼	15¾x22
Weight each, lbs.	9¼	11⅜	9¼	11⅜
Each	$3.25	4 00	3.50	4.25

STEEL TOP



Even color steel. Can be set up in a few minutes. No bottom or oven. Top folds inside. Draft in front end above feed door.

Four-hole

No.	4HD
Height folded, inch	1½
Height set up, inch	12
Size of top, inch	15½x21
Weight each, lbs.	7
Each	$4.25

FOLDING WIRE GRIDS

For campers, tourists, boy scouts, automobilists. The ideal grid for use with wood or charcoal makes open-fire cooking easy.

SIMPLEX GRID

Made of best steel wire and reinforced with a flat steel bar, makes rigid grid and prevents it from sagging and the cross wires from warping. All joints electrically welded.

Aluminized Finish

Nos.	1	2
Size, inch	10x14	13x21½
Weight each, lbs.	2	3½
Per dozen	$10.00	12.00

DUPLEX GRID

Same as Simplex Grid except has adjustable charcoal grate for use below top. For small fire use grate on upper leg bars. For large fire use on lower leg bars. For wood remove charcoal grate.

Aluminized Finish

Nos.	3	4
Size, inch	10x14	13x21½
Weight each, lbs.	2¾	5
Per dozen	$15.00	18.00

IMPROVED FOLDING FRY PANS

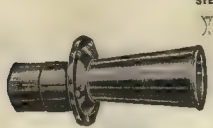
Steel fry pan with folding steel handle. Handle is permanent and cannot be removed or lost, and is so constructed that a wood extension can be put on if necessary.

Nos.	32	34	36
Size, inch	8⅞x1⅞	10x1¾	12x2
Weight per dozen, lbs.	10	15	20
Per dozen	$7.80	9.00	10.80

Kelley-How-Thomson Co. of Duluth.

AUTOMOBILE HORNS

STEWART WARNING SIGNAL



MOTOR DRIVEN

HAND-OPERATED

Underhood Type. The Bell is Superfluous for Underhood Mounting. This Type Takes Up Less Room and is More Easily Cleaned

The Stewart is superior to all others. First, because its motor is entirely enclosed in its own case. The shaft can never get out of alignment. It is the most economical in amount of current required to run it. Runs at highest speed with the very smallest amperage. Brushes of an especially large size. Rear bearing provided with ball thrust. Friction eliminated. Motor will not stick, due to superior bearings and ample lubrication. Large steel, felt-packed oil well keeps shaft always lubricated. No oil gets into rest of mechanism. Weight half as much as other motor-driven warning signals, sound considered.

The push button sticks up like a big mushroom so that you don't have to feel for it—you can't miss it, and the slightest touch with hand, arm or elbow brings forth a flood of sound impulses.

The tone of the Stewart Motor-Driven Warning Signal is Round, Full and Hearty, and can be Heard a Mile Down the Road.

	Each
No. 154A—Black Enamel Finish, Complete with 6 ft. Electric Cord, with Terminals and Push Button	$6.50

One in a Box; Weight about 6 Lbs.

One Complete Pressure of the Plunger Produces 192 Distinct Sound Impulses in the Large Diaphragm. The result is a Wonderfully Effective Warning Signal—a Full, Round, Hearty Tone, Deep and Penetrating, and surpassing anything that has ever been put on the market. Short or Pressure on Plunger with hand, arm, elbow or finger produces a warning blast that "makes them pay attention."

All Parts are Riveted or Bolted which insures long life, regardless of the amount of usage it receives. No soldered parts to work loose by vibration.

The Gears are not light, flimsy, stamped affairs, but are wide-faced cut gears, case hardened, each Gear is supported on a shaft, both ends of which run in hardened steel bushings. All this means greatest ease of operation.

Some horns are lubricated by simply squirting oil through a small hole. But in the Stewart Warning Signal there is an oil-soaked felt pad which rubs against the bearings and wheels continually.

The Stewart Warning Signal has a double supporting bracket which will not weaken under pressure.

The Stewart bracket is made with a swivel—one part fastens on the rail of the car and follows its shape, while the part holding the horn swivels on this rail bracket and can be so adjusted that the horn always points straight ahead, directly in front of the car.

	Each
No. 157B—Handsomely Finished in Black	$3.75

One in a Box; Weight Each about 4 Lbs.

AUTOMOBILE WHISTLES

Ford Type

Regular

"BUELL"

The Original Explosion Operated Whistle for Passenger Cars and Motor Trucks

A Scientifically Constructed Warning Device that combines the features of great simplicity and certainty of operation with a note of ultra warning value which appreciably lessens accidents.

Screwing in place of a priming cup, the "Buell" utilizes the high explosion-pressure of 200 or 300 pounds per square inch. On engines not equipped with priming cups the "Buell" is installed with our special spark plug.

The poppet valve is ground to a gas tight fit with its seat and tested twice for leakage so your engine will not lose compression through the whistle. In blowing the whistle the valve is only held open for an explosion or two and the power consumed is negligible. A slight touch on the readily accessible cord attached to the steering column sounds the unfailing "Buell."

	Each
Ford Type—Including Spark Plug	$5.50
Buell Chime	6.00
Buell Single Tone	4.25

SPECIAL SPARK PLUGS

The Standard "Splitdorf" Spark Plug, Indestructible and Easily Cleaned

	Each

No. B. S. P. ⅝—Size ⅝ in. for Maxwell, Briscoe, etc.	1.50
No. B. S. P. ⅞—Size ⅞ Extension for Buick, Oakland, Chevrolet, etc.	1.50

Kelley-How-Thomson Co. of Duluth
AUTOMOBILE CLOCKS

Keyless Clocks are Handsome in Appearance and Especially Adapted to Withstand the Hard Usage and Vibration of Automobile Travel. The necessity of a key is entirely done away with. To wind clock, simply turn the bezel once a week to the right. By reason of its double case—the movement being enclosed in an inner case—clocks are rendered both Dust and Moisture Proof. Clocks are Fastened to Dash from Inside of the Case and Locked.

COWL FLUSH TYPE

Eight Day Movement; Rim Wind and Rim Set

Specially Adapted for the Cowl Dash. Made to be Countersunk, so as to Project Just Far Enough to be Wound

Each

No. 7—**Regular Dial** 3¾ in.; Base 3 in.; Cowl Ring 3¾ in.; Black and Nickel Finish $14.25

No. 9—**Special Dial,** Otherwise same as above 14.75

One in a Box; Weight about 8 Oz.

AEROPLANE CLOCK

Eight Day Movement; Rim Wind and Rim Set

Used by the United States Navy on account of its Unique Winding Device and Durability, being Especially Constructed to Withstand the Vibration of a Running Motor.

Each

No. U. S.—Diameter of Dial 2½ in.; Black Enamel, with Nickel Plated Trimmings $14.00

One in a Box; Weight about 8 Oz.

REAR WIND

Eight Day Movement; Attached Key and Hand Sets

Adapted for the Cowl Dash; Made Absolutely Flush

Each

No. RW—Nickel Plated; Diameter of Dial 2¼ in. $7.90

One in a Box; Weight 8 Oz.

Eight Day Movement; Attached Key and Hand Sets

REAR WIND

Designed to be Countersunk in the Dash and is the most popular low-priced Cowl Clock on the Market

Each

No. FB—Black, with Nickel; Diameter of Dial, 2½ in. $3.80

One in a Box; Weight 8 Oz.

DENVER

Eight Day Movement; Key Wind

Each

No. D—Diameter of Dial, 2¾ in.; Diameter of Base, 2½ in., Depth, 1¼ in. . $6.00

One in a Box; Weight 8 Oz.

ADJUSTABLE PLANES

Bottoms perfectly true and smooth. Full polished caps. Cutters are extra heavy, which prevents chattering when used on very hard wood or knots. Made of highest grade crucible steel, correctly tempered, full polished, sharpened and whetted on an oil stone by hand. Ready for use. Screw and lever adjustment. Brass screw.

WARRANTY ON AXES

The steel in all axes, in order to carry a good edge, must be of high temper; and for this reason a good axe is more likely to break than a poor one. Soft steel will first bend, and then break; so it is impossible for an axe that is too soft to hold a good cutting edge. Breaks from flaws are readily known by their angular form, not by the color, while sound breaks (which are no fault of the manufacturer), are always circular in form as shown in illustration.

Our warranty does not cover open or broken eyes which are clearly the result of axes being used as mauls instead of for chopping. Axes should not be ground on an emery wheel, because the overheating draws the temper from the steel.

No claim for defective axes will be entertained unless in accordance with this warranty.

Defective axes must be returned to us with freight charges prepaid.

WEIGHTS

Straight weight axes, 3 and 3½ lbs, and assorted weights, 3 to 3½ and 3 to 4 lbs, take base price. All other straight and assorted weights are subject to the advances listed in the complete classification of weights below. Weight of each axe is stamped on poll.

HANDLED AXES

All of our axes (excepting the Corona) are handled in our own handling department. For weights of handled axes add 16 lbs per dozen.

CLASSIFICATION OF WEIGHTS OF AXES

Add per dozen to base price on all single and double bit axes.

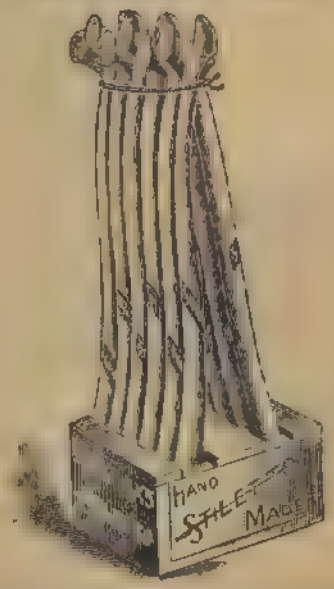
HANDLING OF AXES



All our axes one dozen in a case. Handles securely wrapped in burlap. Our axe handling department is under our own supervision. We employ workmen who know by years of experience the correct shaping and set of the handle. Every axe is handled by a fixed gauge, to insure its being perfect in this respect.

CUTLERY SHOW CASES

POCKET KNIFE

Oak finish. Entire platform covered with plush. Doors fitted with American mirrors.

Sliding drawers are partitioned so that stock of each knife may be placed directly below each sample.

No. 50—Width, 25 inches. Length, 39 inches. Height, 13 inches. Partitioned for knives, 50 patterns. Shipping weight, 90 lbs.

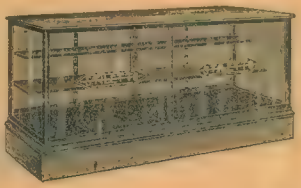
Each $35.00

FLOOR DISPLAY

Natural oak finish highly polished. One piece, ⅜-inch plate glass top. One piece selected double strength glass front, one piece glass ends, clear glass sliding doors on ball bearings. Case contains two quarter sawed oak finish shelves, supported on the latest improved nickel plated keyhole adjustable brackets.

No. 250—Length, 6 feet. Height, 42 inches. Width, 26 inches. Shipping weight, 285 lbs.

Each $150.00



CUTLERY DISPLAY BOXES

Illustrating Knife Display Box

Knife, razor and shear boxes are all made uniform height which enables a show case to be dressed neatly These boxes are particularly neat for displaying cutlery in floor show cases.

Knife Display Box—Made of heavy cardboard; covered with black leatherette paper. Removable cover with green plush covering. The stock number, cost and selling price are kept on underside of cover. Box will hold the stock of knives. Length, 4⅞ inches; height, 2⅝ inches; width, 2⅝ inches

Each $0.30

Razor and Scissor Display Box—Made similar to knife box. Height, 2⅝ inches. Width, 2⅝ inches. Length, 7½ inches. Sample is placed on top of box; stock carried inside. Box holds ½ dozen razors in their individual boxes or one-half dozen scissors and shears up to 6½ inches.

Each $0.50

Shear Display Box—Height, 2⅝ inches. Width, 2⅞ inches. Length, 9½ inches. Box will hold one-half dozen shears of any length up to 9 inches.

Each $0.50

Average weight, 4 ounces each

CUTLERY MARKING INK

Cutlery Ink For marking prices or numbers on knives, razors, shears, etc., or any polished or nickeled steel. Can be entirely removed with alcohol. Put up in 2-ounce bottles.

Per dozen $6.00

HAMMERS

Jumbo Non-Freezing Hog Waterer

$22.40 55 Gallon Capacity **$29.35** 90 Gallon Capacity

WATER CANNOT FREEZE
WATER IS FED TO DRINKING PAN BY VACUUM PROCESS.
CANNOT OVERFLOW
TROUGH IS ALWAYS FULL

Illustration Shows Waterer Complete as Furnished Has Two Drinking Places

Jumbo Non-Freezing Hog Waterers are made of heavy galvanized iron. They are strong and substantial and will last for years. One of the hardest chores on the farm is to properly water the hogs, especially in cold, zero weather when the water freezes in the trough in half an hour. It is a hard job to chop ice from the trough two or three times a day to give the hogs fresh water, and even then they do not have water as often as they should. **With a Jumbo Waterer your hogs can have a constant supply of good, clean water** with the chill off just as they want it, night and day. Hogs will drink frequently both night and day if the water is convenient and at the right temperature. **With the Jumbo Non-Freezing Hog Waterer** the water is automatically fed to the drinking pan by the vacuum system. The trough is always full but never over-flows. No mud hole or disease breeding place around the drinking troughs. The drinking trough is thoroughly protected so horses or cattle cannot step into it or damage it, and hogs cannot get into it with their feet to foul or waste the water, but they can always have all they want to drink. **In cold weather the water that is exposed to the air will freeze first.** There is no advantage in keeping water in a tank warm if it freezes in the trough where the hogs drink. You will note by the illustration that the lamps set directly underneath the drinking pan so the water cannot freeze and the heat then passes up around the tank and keeps the water at just the right temperature. **The Jumbo Waterers have been used and worked perfectly with the thermometer at 35 degrees below zero.** The heat being properly applied as it is, and confined inside the casing, the lamp can be turned low so it uses only a small amount of coal oil. It costs only 2 or 3 cents a day to keep the water warm night and day in the coldest weather. An approach is built to the drinking trough so hogs of any size can drink. **A hog will live and put on weight for 4 or 5 days with practically no food if he is given all the water he wants, but he will begin to lose weight in two days if he has no water, even though he has all the corn he wants.** Nearly two-thirds of a hog's body is water. Give them all they will drink. **Water is cheap—corn costs money.** Plenty of pure water is a big help toward preventing disease. Our 55 Gallon Jumbo Hog Waterer is 30 inches in diameter and 48 inches high. Our 90 gallon is 30 inches in diameter and 58 inches high. Shipped direct to you from Iowa factory.

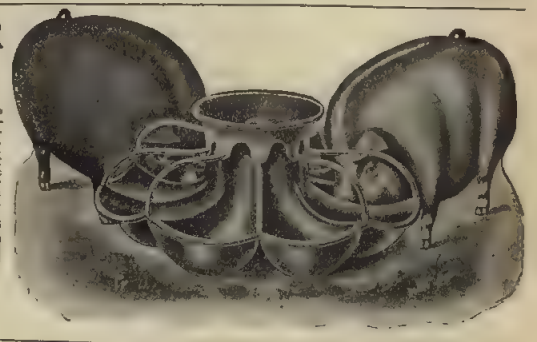
B-2387S	Jumbo Hog Waterer, 90 Gallons, Double Drinking Fountain; Weight 145 Pounds		33.15

SUPREME CIRCULAR $9.25 HOG TROUGH

Our Superior Circular Hog Trough is made of the best smooth cast iron, has eight partitioned compartments with steel division bars cast in, making it impossible for pigs to get into the trough or root out the feed. Feed is poured in at the funnel shaped top and is distributed equally to all compartments, which hold a half gallon each. Trough is heavy enough so that it cannot upset. Is easily cleaned and will last a lifetime. Feeder is 20 inches in diameter, 18½ inches high. Every person raising hogs should have one or more of these troughs. Weight 140 pounds. Shipped from factory at Kansas City.

B-2388—Superior Circular Hog Trough..... **$9.25**



MAJESTIC CAST IRON HOG TROUGH

Shipped from Factory

Majestic Hog Troughs are made in several sizes and are constructed entirely of cast iron, having no bolts, holes, seams or other parts to become loose and leak. While the initial cost is slightly higher than a galvanized or wooden trough, taking into consideration that a cast iron trough will last a life time, it is the most economical one to buy. Bars are cast across the top, which prevent the hogs from lying in the trough or rooting out the feed. All of our troughs are provided with lugs for bolting to a platform or floor. The Majestic Hog Trough can be kept clean and sanitary. All troughs are thoroughly coated with a water proof paint. Shipped from factory in central Illinois or from Kansas City.

SUPREME MANURE SPREADER

HAS BEEN SOLD BY DEALERS FOR OVER 22 YEARS
"YOU KNOW THIS SPREADER"

CO-OPERATORS PRICE

$145.00

Steel Wheels----Steel Cylinder----Steel Fifth Wheel----Heavy Steel Axles.

WE SAVE YOU **$40.00** ON THIS SPREADER

The Supreme Manure Spreader has been made for over 22 years and sold throughout the United States by implement dealers under a very popular and well known name. Thousands of these manure spreaders are in use and giving complete satisfaction in every way

The Supreme Manure Spreaders are the lightest and easiest running spreaders built. They are thoroughly reliable and dependable machines and with proper care will practically last a lifetime. We positively guarantee each and every machine and will gladly replace any part or parts which prove defective on account of poor material or workmanship.

The Supreme Manure Spreader is shipped 'Direct From Factory" to you. No Jobber, Wholesaler, Manufacturer's Agent, Retail Dealer, State Agent, County Agent or Local Agent gets one cent profit on the ? ? ? Manure Spreader. The Holmes Co-Operative plan of furnishing its members with Manure Spreaders, as well as other merchandise, Direct From the Factory, eliminates all the profit made by the "Middleman."

Construction—The materials used in this high-grade Manure Spreader are of the very best and every care is used in order that years of constant usage will show the least amount of wear on the working parts. The bottom is of the endless apron style and is carried on rollers, there being two rollers under each slat. The apron is carried over large rollers on the feed shafts at the rear end, and on a special shaft at the front end of the machine, there is also an adjustment at the front of each sill, which takes up any slack in the apron

The Box measures 44 inches from the ground to the top of the box, thus reducing the work of loading to the lowest minimum. The top is bound with iron and all parts are exceedingly strong and well put together. The rear end is 2 inches wider than the front end, depth at front end, 17 inches, depth at rear end, 21 inches. This arrangement causes the load to be easier pulled and the greatest amount of efficiency is insured.

Axles—Are made of cold rolled steel; front axles are 1¾ inches; rear axles are 2 inches. Front axle and bolster are placed far enough to the rear under the body to divide the load, in order that the rear wheels will not be overtaxed Front trucks permit of turning short, as they turn under the machine **Diameter of the fifth wheel 15 inches.** Can be subjected to the roughest use and heaviest load without fear of breaking, as it is made of steel. The front end of the center track rail is supported by heavy angle steel, which is bolted to the side sills by means of steel brackets and no delay is experienced in getting the movement of the bottom started, for the reason that at all times three sets of lugs are engaged on the sprockets. The least draft and the greatest amount of power is given by the chain drive, which is raised and lowered on the solid arm, and when it is lowered on the drive sprocket it locks in position and any amount of pressure will not cause it to slip or jump.

The Teeth of the rake are made of spring steel, 1¾ inches wide, 16½ inches long, and their sharp points assist the cylinder in tearing up the manure, and a spring of 16 pounds tension is provided for each tooth, which works independent of the others. This permits of any hard substance being let out by each rake tooth, without raising any of the other teeth, thus not permitting a large quantity of manure to be thrown out in bulk

Steel Cylinder is of steel construction, which will not warp or break, as is often the case with wood bars. The cylinder bars are nine in number, size 1¼x 7-16 inch steel, firmly bolted to large cast cylinder head. Teeth are made of thirty-point carbon steel, 4 inches long outside the bar, and 7-16 inch square, with sharp chisel point. The cylinder end of the tooth is threaded and after being firmly bolted, is tapped to prevent the nut from working loose.

Wheels—Are made of heavy steel. Rear wheels are 44 inches and front wheels 24 inches in diameter. Have 4-inch flanged tires with cleats riveted on.

The short stub tongue is in the center, and a pull with three horses comes direct on the short stub, which permits of an ordinary three-horse evener and does not require an equalizer. If two horses are used the stub tongue is removed, the long tongue set in its place, making the pull directly in the center of the two-horse evener. **A two-horse evener** is always furnished unless you state in your order that you desire a three-horse evener.

Capacity Box holds 65 bushels but if well loaded will hold 70 bushels. Width box 42 inches, depth, front 17 inches, rear 21 inches; length 9 feet 5 inches, outside measurements.

The Supreme Manure Spreader is painted two coats, nicely varnished and striped and shipped direct to you from Illinois factory. Shipping weight about 1695 pounds.

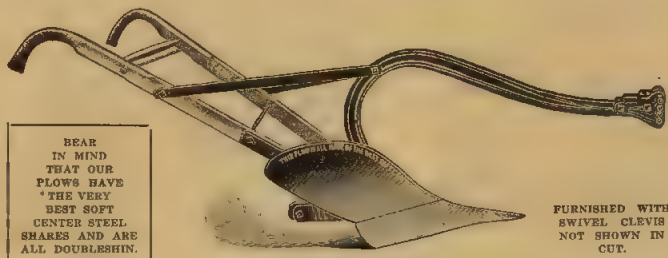
Royal Banner Walking Plows

WE GUARANTEE THAT THERE IS NOT A BETTER PLOW MADE REGARDLESS OF PRICE

BEAR IN MIND THAT OUR PLOWS HAVE THE VERY BEST SOFT CENTER STEEL SHARES AND ARE ALL DOUBLESHIN.



FURNISHED WITH SWIVEL CLEVIS NOT SHOWN IN CUT.

MADE IN STEEL BEAM ONLY

ROYAL BANNER PLOWS Have Double Shins and Double Mould Boards

Royal Banner Walking Plows are made in one of the oldest and largest plow factories in the U. S. This firm has been making plows for years and have the reputation of making the best plows on the market. Royal Banner Plows are extra large, extra strong, and have our celebrated almost "everlasting" double mold board, made of the very finest of soft center steel, with extra wide soft center steel shares with double points of soft center steel. (See explanation following). High soft center steel landsides and entire plow finely polished in oil, tempered as hard as glass and absolutely guaranteed to scour in any soil where any plow on earth will scour, and is just the identical shape that you have been looking for, insuring the lightest possible draft and easy running, it is hardly necessary to hold the handles after it is properly set and hitched to. The Royal Banner shares are one-half inch wider than generally found on any other plow. They are adapted to old ground, turf or stubble. The shape of the moldboard is perfect, turns the soil in the best manner, pulverizes it well and covers all trash. The scouring qualities are excellent, and we guarantee them to scour in any soil where any plow on earth will work. Remember, that if any plow we send you is not perfectly satisfactory, and does not do the work as well as any plow made, it can be returned at our expense and money will be promptly refunded. These plows are made especially for the Northwest and are well adapted to the different soils in this locality.

ROYAL BANNER PLOWS HAVE DOUBLE SOFT CENTER SHARES WITH REINFORCED POINTS.

READ HOW OUR SOFT CENTER STEEL SHARES ARE MADE AND WHY THEY ARE BETTER THAN OTHERS

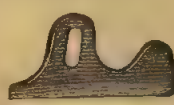
Royal Banner Shares are Made of the Very Best Soft Center Steel; Have Double Points, Are Highly Tempered and Polished in Oil. This is Why They are Better than Others. Read Description of How They Are Made Carefully.

Fig 1 shows the steel share as it comes from the mill. Notice the long point. In welding the landside, the point is turned right back under the share at the **Fig. 4**, giving you the same hard soft center steel in the bottom of the share that you have in the top. See **Fig. 2. Fig. 3** shows the share shape as purchased by other manufacturers.

You will notice it is cut off at **Fig. 4** as shown in Cut 1 and when they weld their landside to share they use a little piece of crucible scrap steel and weld on the bottom. Now the point of the share takes the blunt of the work; if it is only made of crucible steel, then why not buy a crucible steel share and save 50 cents? You will notice the method used in making our share gives you the same hard soft center steel at the bottom as it does at the top, absolutely and unquestionably the best share that money can produce.

ROYAL BANNER PLOWS Have Adjustable Landside Heels

Illustration at right shows the Adjustable Landside Heel used on all our Royal Banner Double Board and Double Shin Plows. The advantage of this feature is the fact that it saves the heel of your landside and is adjustable so that as your plow wears, or as it gets dull and needs more suck you can easily give it the desired inclination by simply adjusting this little casting, a feature that we believe you will readily appreciate.



THIS CUT SHOWS THE ADJUSTABLE LANDSIDE HEEL USED ON OUR ROYAL BANNER PLOWS.

ROYAL BANNER PLOWS HAVE DOUBLE MOLD BOARD

The Double Mold Board furnished on our plows is a practicable and valuable feature as we have a double thickness of hard steel rolled into this mould board, not only on the shin, but throughout the entire surface of the mould board. You will therefore admit that if we double the amount of the steel in the face of the plow, we double the value of the entire plow, as that is where it first wears out; hence we claim our double board plow is not only what we claim but is worth twice as much as the single board plow or double shin plow made by welding patches on them.

SUPREME POWER CONCRETE MIXER

$34.95 COMPLETE

CAPACITY 25 YARDS EVERY 10 HOURS.

The Supreme Continuous Concrete Mixer was designed especially for the small contractor or farmer who does not require a capacity to exceed 25 yards a day. It is constructed entirely of steel and iron. The hopper is made of 16 gauge steel and has a capacity of about two and one-half cubic feet and is bolted to the mixing drum. It is provided with a steel slide to regulate the feed to the mixer and to close the hopper to load a new batch if desired. The Steel Water Tank is of sufficient size to meet all requirements and slides on the sides of the drum to any position desired. It can be set as shown or reversed to discharge near the hopper. Equipped with a half inch lever handle cut off valve. The Drive Pulley is 12 inches in diameter by 3 inches face, but we can furnish 10 inch or 14 inch if so specified. Be sure and state size desired when ordering. The pulley should run 220 revolutions per minute and can be handled very nicely with any engine of 1½ H. P. or over. The mixing drum is made of very heavy steel and is four feet long, heavily reinforced at both ends and center. The Mixing Blades are made of heavy cast iron in sections, interlocking into each other so if one should get broken it can be easily replaced at very small expense. They are spiral in design and very powerful. The Gearing is heavy and equipped with grease caps for lubrication. Sheet Steel Apron covers gearing so no material can drop into it. The Mixed Concrete is discharged from the end of the mixing drum where there is a slide that can be closed at the will of the operator to allow changing of wheel barrows, or to allow a very wet mixture to be made. Shipping weight about 300 pounds. Shipped from Factory as Down

B-2810—Supreme Power Concrete Mixer on Skids $34.95

AUTOMATIC CEMENT BLOCK MACHINE

Build Your Own Home or Store
300 16-inch Blocks Daily Capacity

$22.50 Complete With Full Equipment

Our Automatic Cement Block Machine is made of the best gray iron castings, the material is especially mixed for this purpose, making the parts of unusual strength and stiffness. Simple in design as all springs, cogs, ratchets, etc., are eliminated, thus producing a machine without a single wearing part. It uses plain wooden pallets with two cleats on the back, and anyone can make them by using the pallet furnished with the machine as a sample. The machine consists of a mold and the base mold is of self-truing shape, and the eccentric levers hold it so solid and firm that you can tilt the machine in any manner with the mold either up or down with every assurance that it will not get out of true. Double cores are furnished with each machine as these are the most desirable. Machine permits easy and speedy operation and a few days will enable anyone to become familiar with it and how to secure the maximum output. It is practically unlimited, for 300 blocks a day have been made with this machine. One man can make from 100 to 150 blocks, according to his working ability, as the machine will work just as fast as you feed in the concrete. The size of the blocks, which can be made, are 8x8x16 inches. The 16 inch blocks have proven to be the most popular size for building purposes. The blocks are light enough to be easily removed by one man from the machine. They are light enough so that one man can lay them without any assistance. OPERATION: To release the material after mold is filled and tamped; first tap upward on the projecting lug in center of front wall; drawing upward by the projecting locks, one in each hand, unlocks the combination, front wall slides in grooves in side walls, drawing cores at same time; swing side walls outward, leaving block on pallet ready to be taken away. Accurate drawing is assured by this method. This machine will also make a two piece block for continuous air space, a veneer block with return corners, or a 2, 3, or 6 part re chimney block, by the same operation as the regular outfit. EQUIPMENT REGULARLY FURNISHED WITH EACH MACHINE: One Stand complete, one 8x16 face plate, rock face, two 8 inch end plates, to make cored ends, one Pallet, one Wood core for veneer blocks, two Round galvanized cores, one Double face plate, 8x16, rock face, two 8-inch end plates, rock face, one 16-inch plate for back of block, one Wood core for chimney blocks, one Wood core for veneer corners and one Tamping iron. Shipping weight abut 125 pounds. Shipped direct to you from Factory in Wisconsin.

B-2811—Automatic Cement Block Machine $22.50

OIL AND GAS FUEL TANK

These tanks are made from heavy gauge galvanized steel. Seams are closely riveted and heavily soldered which guarantees great strength.

Being made from best quality Galvanized steel they will last longer than the ordinary oil wagon tank made from black steel.

They have a 2-inch threaded and plugged opening in top for filling, and a 1-inch threaded opening in rear end, close to bottom, with 1-inch lock lever faucet for drawing off oil.

Prices are for tank only and do not include wooden bunks and holding down bands. These can be furnished at extra cost. See below. Shipped from Indiana factory.

Wheelbarrow Engine Truck

This truck is made extra strong and is suitable for carrying engines up to 3 H. P. Can be bolted to any engine skids. By using these fixtures, you can mount any engine, making it portable. Truck consists of two wheels, two legs and bolster and two handles. The feet can be fastened to the floor with lag screws to make a stationary engine. Can be turned in its own length. The bolster can be located on engine skids to give proper balance. The plank shown in the cut is not furnished. Shipped from Factory in Southern Wisconsin. Shipping weight, 36 pounds.

George, Hankins & George, Contractors, of Richmond, Va., have a fleet of ten Autocars. In working on this excavation for the new Federal Reserve Bank at Fourth and Franklin Streets, Richmond, these Autocars were kept busy for more than four hours a day. Two shifts of drivers were operating. On every load out of the excavation these Autocars pulled up a thirteen per cent grade.

For Two Months these Autocars Worked 24 Hours Every Day

It is because the Autocar Motor truck does stand up and deliver economically that half of all the Autocars this Company can make are bought by concerns that already use Autocars.

The 8000 Autocar users in 450 different lines of business have found, too, that the unusual system of Autocar aftersale service through direct factory branches and dealers is the best assurance they can have of continuous motor truck operation

The Autocar Company is represented by factory branches and dealers from coast to coast. Through them it assures complete aftersale service to every Autocar user.

THE CARBIC FLARE LIGHT

THE Carbic LIGHT
TRADE MARK

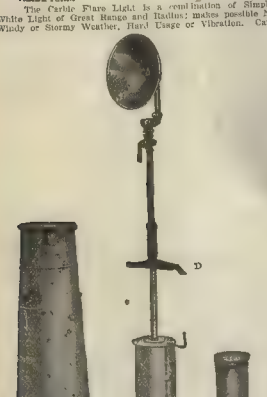
A CLEAR WHITE LIGHT OF GREAT RANGE AND RADIUS

Approximately 2,000 C. P. at a Cost of about 5 Cents per Hour

Designed for the use of Contractors, Railways, Mines, Street Work, Docks, Foundries, Dredges, Steam Shovels, Ditching and Threshing Outfits, Circuses, Lumber Camps, Landings, Summer Resorts, etc.

THE Carbic LIGHT
TRADE MARK

The Carbic Flare Light is a combination of Simplicity, Strength, Economy, Efficiency and Durability. It gives a Clear White Light of Great Range and Radius; makes possible Night Work, Day Work. It is Readily Transported and is Unaffected by Windy or Stormy Weather, Hard Usage or Vibration. Can be Cleaned and Recharged in a few minutes.



A—Tank.
B—Gas Bell, Riser Pipe Burner and Reflector.
C—Cake Holder. D—Strainer.
The No. 2 Carbic Flare Light Ready for Charging.

PATENTED CARBIC CAKES
For Outside Carbic Lights

Carbic is High Grade Calcium Carbide treated and compressed into Cakes by a patented process; Prevents Waste, is Easily and Safely Handled and gives no trouble in using.

Size No. 20—Size of Cake, 4 in. in Diameter; 40 Cakes in Drum. Weight 103 Lbs.	Per Drum Each
	$12.00

This Illustration shows the No. 2 Carbic Light Ready for Operating.

COMPLETE OUTFITS

	Each
No. 1 Holds Two No. 20 Carbic Cakes; will Burn about 12 Hours Without Recharging. Weight Without Charge, 21 Lbs. Charged for Operation 73 Lbs.	$50 15
No. 2 Holds Four No. 20 Carbic Cakes; will Burn about 12 Hours Without Recharging. Weight Without Charge, 41 Lbs., Charged for Operation 120 Lbs.	$55 15

General Description

Consists of but Three Parts and is constructed of Heavy Galvanized Steel and Brass; equipped with a Special Automatic Reflector which may be swung to any desired angle. It is very simple in its construction, has no intricate parts, is not explosive and is easy to handle.

It operates automatically, requiring no attention other than recharging, for which purpose the light may be left burning until before exhausting the Carbic in the cake holder, two parts referred to may be lifted by the inserting any reasons to length of time for later operation thereafter from their connection.

In Cold Weather—The water must be protected from freezing. Use enough salt to prevent freezing and cover with hay, straw or other suitable insulating material and some common salt in the water will prevent. A metal shield around the Tank, as well as a cover. Water Lamp is exposed to freezing weather, it will be necessary to protect the tube except in very extreme weather. Water Lamp is exposed to freezing weather, it will be necessary to protect the tube except in very extreme weather. In very cold weather it is well to remove the plug, the water from the Tank, as well as the Gas Bell, in this case. Replace strainer, putting an ordinary pipe coupling in its place. Replace cover as you would.

CAUTION—Do not have any Flame, nor Allow any Person who is Smoking, Near the Flare when Removing the Gas Bell After Use

RELIEF VALVES

WATER OR OIL

BRASS. SCREWED

Extra heavy. Especially adapted for fire hydrants, steam pumps, fire engines, and wherever a perfect automatic valve is needed to prevent the bursting of hose or pipe, and relieve the over pressure of water; also to protect against the damage caused by water in the cylinders of steam engines. Recommended by all fire insurance companies. Reduces insurance rates. It can be regulated by screwing the head bolt up or down.

Substantial, accurate and reliable. The side lever for lifting the disc is of improved construction, giving great power and acting centrally upon the spring. This will facilitate blowing out the valve when necessary. Set to blow off at 120 lbs pressure, unless otherwise ordered. Full directions for operating sent with each valve. Are allowed for marine use, on the basis of one square inch of valve to three square feet of grate surface and are made to comply with the rules and regulations of the United States Board of Supervising Inspectors of Steam Vessels. When ordered for marine use, the valve is made with beveled seat at an angle of 45 degrees.

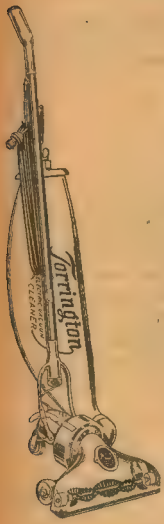
TORRINGTON MOTOR OPERATED VACUUM CLEANERS



The brush in the Torrington Electric Vacuum Cleaner is a big carpet sweeper brush operated in the same way as in a carpet sweeper. It picks up threads, hairs, lint and surface litter, which are whirled into the bag by the suction. It cleans clean without injury to the rug.

Dust Bag Connection—A quarter turn and the bag is detached. No clamps—no screws—no trouble.

Rubber tired wheels drive the brush, insuring positive action.

Nickeled Steel Nozzle—Aluminum discolors rugs or carpets—leaves behind a dark gray smut. Nickeled steel can't injure the finest rug or the most delicate colorings. Roller bearing wheels.

Small fan on motor shaft keeps motor air-cooled—they wear longer.

The nozzle adjusting device permits adjusting the cleaner for use on floor coverings of varying thicknesses.

Brush has three rows all-bristle tufts $\frac{13}{16}$-inch long. Built as a carpet sweeper brush—sweeps as efficiently.

Wheel bearings are all outside the suction nozzle—there's no possibility of threads, lint, etc., becoming entangled. Exclusively a Torrington feature.

Nozzle extension permits cleaning clear up to the walls and into corners.

Motor—Single phase, universal 25 to 60 cycle, 110 volt.

Control switch conveniently located in handle grip.

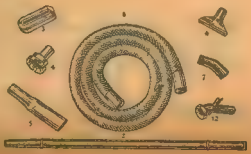
Every machine equipped with 25 feet of heavily insulated cord and connecting plug.

No.	**Model B12**
Shipping weight each, lbs.	17
Each	$55.00

EXTRA ATTACHMENTS

Extra cleaning tools supplied only when specially ordered and at additional cost. Necessary for cleaning upholstery, draperies, stairs, mattresses, etc.

1. Covered hose—8 feet long, for using attachments.
2. Extension handle—for reaching high places.
3. Brush—for cleaning clothing, walls, etc.
4. Blower—for connecting hose to exhaust of cleaner.
5. Tool—for cleaning radiators, books, etc., and for blowing.
6. Nozzle—for cleaning draperies, upholstery, etc.
7. Nipple—for connecting hose and attachments.
12. Connector—for connecting hose with cleaner.



Shipping weight per set, lbs.	6½
Per set	$10.00

UNIVERSAL MOTOR OPERATED VACUUM CLEANERS

The Universal Vacuum Cleaner has been designed and constructed with the utmost care to make it the most desirable of all household cleaners.

The volume of air is sufficient in the Universal Vacuum Cleaner to gather up all the dust and dirt particles. There are, however, pieces of thread and lint which become attached to the carpet and are not easily removed. For detaching these so that the air can take them to the bag, there is a gear driven brush which works easily without danger of injuring the most delicate fabric of the carpet.

Grip—The pistol grip giving a firm hold on the handle.

Bag Clamp—The bag clamp firmly attaches the bag and handle.

Fan—Solid cast aluminum, 6 special designed plates insuring a large volume of air.

Motor—Universal horizontal type, self oiling, dust proof bearings, operating on either alternating or direct current. Perfect balance, enclosed in heavy housing sufficiently ventilated to insure proper working temperature.

Casters—Large rubber tired casters to prevent injuring polished surface of floors.

Switch—The switch is conveniently located with perfect control of the motor at all times.

Cord—20-foot flexible electric light cord with socket plug attachment.

Dust Bag—Specially selected satin finished fabric lined with extra heavy material.

Suction Hose Attachment—Extra large connection direct to the center of the fan.

Nozzle Full 12 inches wide adjusted to the proper distance from the floor for the most efficient work.

No.	**E 701**
Voltage	110 and 32
Color	Verde-Green
Net weight, lbs.	10½
Shipping weight, lbs.	25
Each—Without attachments	**$39.50**

For Voltages other than 110 or 32, add $1.50 to list price.

One in a wood case with handle and without attachments.

ATTACHMENTS EXTRA

8-foot web covered hose 1¼-inch.	Hollow clothing brush.
30-inch extension tube.	Blower nozzle.
7-inch drapery nozzle.	Connector tube.

Shipping weight each, lbs.	7
Set of six	$10 50

Shipping weight cleaner in wood case, complete, with all attachments, 28½ lbs.

WHEEL TOYS

Everything that sells, at the market's bottom prices, and we have the goods to ship AT those prices. We are America's headquarters for wheel toys of every nature. Even in these abnormal times, we are giving remarkable service considering the difficulties all manufacturers are having with their supplies of materials, labor troubles and consequent lowering of production.

"MARATHON" STEEL WAGONS

The supreme value in steel wagons—larger, better in finish and construction, guaranteed to last longer than any other make. Through our huge buying power we are able to quote lower prices than others ask for inferior grades. For proof read the features described below.

Braces, sheet steel, bodies are reinforced at top rails with extra flat dried tongue and grooved bottom boards, wooden seat risers and heavy malleable iron corners. Heavy indestructible fifth wheel (the vital point of all wagons) has special long and very strong tongue iron to prevent handle dropping below desired pulling height, special one piece front gear with extra tongue brace. Gear sale brace, front axle and tongue are well ironed. All wheels have black enameled finish hubs, bright red felloes, green hand picks of well seasoned hickory. Packed knocked down complete (except F102, F103 and F111) all parts assembled and proofread on. Four wheels and

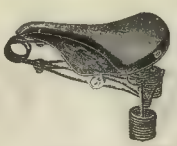
BICYCLE SADDLES

MOTOR BIKE

Five-Ply Wood Veneer Base; Finest English Russet Leather Top; Hair Padded and Neatly Formed, Cushion Springs Combined with the Universal Cone Spring; Universal Clamp prevents it turning or twisting

Each

No. 2 Length 10½ in., Width 8½ in.; Weight 4½ Lbs.....$3.00



EAGLE EASY

Stamped Steel Frame and Trusses; Cushion Springs combined with the Universal Cone Spring, all finished in Black Enamel; English Russet Leather Top; the Universal Clamp prevents it Turning or Twisting

Suitable for Heavy Riders and Hard Usage on Rough Roads.

Each

Eagle Easy—Length 10½ in., Width 8½ in., Weight 4 Lbs.....$3.00

TIP TOP

Stamped Steel Frame and Trusses; Cushion Springs combined with Universal Springs, all finished in Enamel; Black Leather Seat, well shaped for comfort and easy riding.

Each

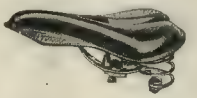
Tip Top—Length 9⅝ in.; Width 7⅛ in., Weight 3¼ Lbs.....$2.00

CUSHION COMFORT

Russet Leather Covered; Hair Felt Padded; High Back Wood Base; Cushion Comfort Springs, Black Enameled; This style of Springs gives the Maximum of Saddle Comfort and is Suitable for Heavy Riders and Hard Usage over Rough Roads.

Each

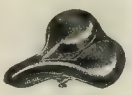
Cushion Comfort—Length 10¼ in., Width 8 in.; Weight 3½ Lbs..$1.75



Wood Base, Hair Felt Padding Covered with Selected Grain Leather, Brown Color. Fitted with Double Springs and Standard Saddle Clamp.

Each

No. 12—Length 9½ in.; Width 8 in.; Weight 2 Lbs.....$1.75



MEN'S

Nickel Plated Truss Spring; Wood Base, Russet Leather Cover, Padded and Neatly Shaped

Each

No. 5—Length 9¼ in.; Width 7⅛ in. $1.00

Weight About 1 Lb.

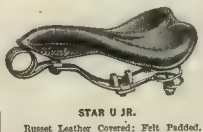
LADIES'

Nickel Plated Universal Spring; No. 1 Standard Clamp; Wood Base; Good Quality Grain Leather, Heavily Padded and Neatly Shaped

Each

No. 14—Length 8¼ in.; Width 8 in. $1.50

Weight About 2 Lbs.



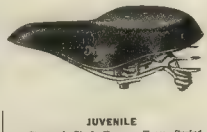
STAR U JR.

Russet Leather Covered; Felt Padded, High Back Wood Base; Universal Springs, Nickel Plated; No. 1 Standard Clamps. A Good Equipment Saddle.

Each

Star U Jr.—Length 9 in., Width 7⅛ in. $1.25

Weight About 2 Lbs.



JUVENILE

Stamped Steel Frame, Truss Spring Heavy Grain Leather Top. A Very Comfortable Saddle for the Little Folks.

Each

No. 1—Length 9 in., Width 7 in...$1.00

Weight About 1¼ Lbs.

WASHING MACHINES

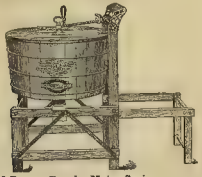
REGAL

Hand Power, High Speed

The gearing is of the simplest construction, with milled working parts. Non-tearing. Dash agitator. Tub made of Louisiana red cypress. Very easy to operate.

No. 10—Weight each, 95 lbs..... Each, $25.00

TYPHOON



Hand Power, Run by Motor Spring

Ball-bearing. Tub made of Virginia white cedar, with electric-welded hoops. Tilting wringer board and rinsing-tub stand attached.

No. 40—Weight each, 75 lbs..... Each, $20.00

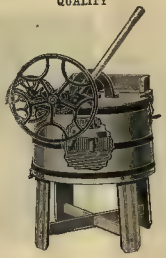
MAGIC

Water Motor

One of the most simple and successful water power machines made. Motor is made of brass. Small parts have been eliminated because they make trouble. Motor being so strong, full city pressure may be used without damage. Successful operation is obtained with only 30 lbs. water pressure.

No. 30—Weight each, 100 lbs..... Each, $40.00

QUALITY



Hand Power, High Speed

The noiseless machine. Milled gears, ball bearing. Large tub, accident proof. Easiest running machine made. Lever positions for operator to stand or sit.

No. 20—Weight each, 107 lbs..... Each, $32.50

CLOTHES WASHER

ACME

Original Vacuum

The body is made of 135-lb. bright charcoal tin plate and is put together by strong lock seam joints, no solder being used in its construction. The handles are made of selected northern beech, 1 in. diam. by 40 in. long. The short cross handle is attached by a steel bolt passing though both handles.

No. 333—Weight per dozen, 27 lbs..... Per dozen, $15.00

One dozen in a carton.

WASHING MACHINES

LAUNDRY QUEEN ELECTRIC

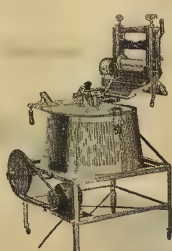
Wood Tub With Cover Up, Swinging Dolly and Swinging Wringer

A Few of the Distinct Features of the Laundry Queen

The tub is completely independent of any of the mechanism; the wringer swings to any position, out to the side of the tub or back of it. It may be used to wring from the washer to the rinse tub, and then to the bluing, then reversed, and the wash wrung into the basket, and while these wringing operations are progressing another batch of clothes is being cleansed in the machine, for the washing and wringing mechanism are entirely independent of one another.

The top, with the dolly mechanism, also swings off the tub and to any position. This is a wonderful convenience in connection with rinsing. Dropped into the rinse tub, the dolly does the necessary agitating quickly and thoroughly.

There are no bolts through the tub, no projecting parts nor unprotected gears. The bench is of angle iron, strong, rigidly braced and mounted on casters. The Laundry Queen is instantly adaptable for power other than electric by attaching a flat belt pulley to the face of the fly wheel.



Copper Tub With Cover Down, Dolly and Wringer Back to Position

No. 1-W—Wood tub. ½ h. p. motor, 110 volts, 60 cycles, alternating current. Weight, 235 lbs..... Each, $130.00

No. 1-C—Copper tub. ½ h. p. motor, 110 volts, 60 cycles, alternating current. Weight, 235 lbs..... Each, $140 00

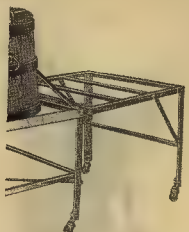
No. 3-C—Copper tub. ½ h. p. motor, 32 volts, for Delco and other similar systems. Weight, 235 lbs..... Each, $140.00

Any other voltage or current than described here must be ordered direct from factory.

Without Electric Motor

No. 02—Copper tub Same as No. 1-C, but without motor. May be driven with any independent power Equipped with combination pulley, one for ¾ in round belt and one for 1½ in. flat belt. Weight, 225 lbs... .... .. Each $130 00

EXTENSION BENCHES



For Laundry Queen

No. 102—Steel frame, to attach to Laundry Queen Nos. 1-W, 1-C and 02. Can easily be attached or detached. Weight, 14¼ lbs..... Each, $5.00

WATER PRESSURE EJECTOR

PENBERTHY HOUSEHOLD

A small, inexpensive device designed to transfer water or other liquids from sumps, washing machines, wash tubs, cellar pits, or any place where there is an accumulation, by means of ordinary water pressure. It takes the maximum amount of water from tub or sump, with minimum amount of water operating the ejector. It is handy to have around the house, saving much back-straining and lifting. As simple in its arrangements as is the common hose nozzle; all you do is to attach it to the faucet and turn on the water. No loose parts—nothing to get out of order. Is made of aluminum. A bronze cap (D) is furnished with this ejector so that after any tub or receptacle has been emptied of dirty or used water, it can be refilled by simply screwing cap on to connection (C) of ejector, and then turning on water same as you would to empty tub.

No. 1-PH ..... Each, $3.50

ADAPTER

Penberthy—Converts ⅜, ½, ⅝ and ¾ in. smooth faucets into standard threaded faucet . . . . Each, $0.75

TOOL CHESTS

FRAME—Thoroughly seasoned, properly kiln-dried selected stock. Quartered White Oak.

DRAWERS—Sides of hardwood. Fronts of Quartered Oak. Bottoms THREE PLY VENEER.

HARDWARE—Extra heavy, with polished, nickeled finish. LOCK: Sargent & Greenleaf, one hundred key change, solid brass and bronze with two, milled slot, flat rust proof keys. FLUSH RING DRAWER PULLS: Our own special design. Very convenient and practical, giving 10 per cent more drawer space than knob pulls.

FINISH—Stain, filler, primer and two coats of high grade, waterproof varnish—Dull Rub. The color on oak is a dark golden.

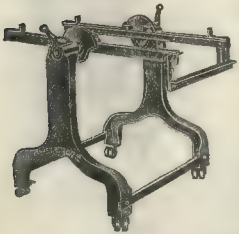
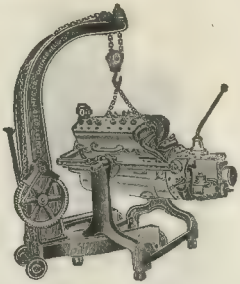
Kellev-How-Thomson Co. of Duluth
GARAGE SHOP EQUIPMENT





UNIVERSAL MOTOR STANDS

The Universal Motor Stand has been designed to meet all conditions. Don't use old methods in repairing motors and transmissions. The success of every efficient garage, repair shop and service station today depends on a higher grade of workmanship, which means satisfied customers.

It is needless to describe the old method of handling and repairing motors, as all garage men are familiar with the labor cost and the time lost in the old practice. Poor equipment, or not enough, is to blame in nearly every case where shop profits are lost.

The Universal Motor Stands are adapted to the present complex conditions. Garage managers and shop foremen, who expect more than the average production from the average mechanics, and accessory houses who are striving for the combination of high quality with low cost, should first study the Universal Motor Stand, as they will find developed in them a simplicity that makes them producers in the hands of all users. Such a Motor Stand is an asset at all times.

In motor building and assembling, the Motor Stand meets every requirement. It is a Universal Stand, and is designed to handle all internal combustion motors, standardized trucks and tractor motors of three-point suspension and four-point suspension type, Ford motors, aeroplane motors, Liberty motors, marine motors and all kinds of passenger car motors and transmissions.

The Motor Stand, as you will note in the cut, is handling a twin six motor. The motor can be turned in any desired position in a circle, instantly adjusted and locked by a slight turn of a friction clamp, no pin holes to line up or adjustments to make, thus making both ends of the motor, as well as the crankcase, accessible. A mechanic can readily remove the lower crankcase and bearings may be scraped in, and rods lined up with ease, in a well-lighted position to be very easy to get at.

The Stand is properly braced and supported, and is portable, being equipped with specially designed double wheel casters, so that they can be easily taken to any part of the garage with motor in stand. The casters may be removed if the mechanic desires a stationary stand, or wishes to bolt the Motor Stand to the floor.

Motor Stands are adjustable to 36 in. in width. The cross bars do not have to be removed while lifting or placing motor on stand with floor crane. The frame of the Stand has been designed to accommodate both the high and low base portable floor crane.

It is not necessary to change the Motor Stand to fasten and handle the complete Ford Unit Plant as is the case with other stands. The Ford attachment is so designed as to securely clamp the cylinder block by means of brackets, allowing the mechanic free working space to remove the cylinder head, crankcase, transmission, crankshaft, timer gears, oil pump, and pistons. **There are no bolts to enter any delicate parts of cylinder block, and break off or strip threads, thereby letting the motor fall to the floor and cause damage.** The block can be turned in either a vertical or horizontal position or any desired angle required, and locked. All positions are rigid. Nothing to interfere with getting at any part of the motor. No shifting or changing. Everything is in easy reach of the mechanic.

A 4 in. adjustment on the friction heads will take any standardized truck, marine or tractor motor. Not necessary to make adjustment on frame legs. All required positions can be obtained by shifting friction heads.

General Dimensions

Length of Motor Support Side Rails, 48 in.
Extreme Height of Motor Stand, 39 in.
Length overall when fully extended, 48 in.
Width adjustment, from 0 in. to 36 in.

	Each
Motor Stand Complete	$78.00
Motor Stand, less Ford Attachment	74 00

CONTINENTAL ENGINE STANDS

The Continental is a Universal Stand—that is, it will handle Ford Motors, Three-point Suspension Motors—in fact, any kind of passenger-car truck or tractor motor. It is portable, can be moved from place to place and makes every part of the motor accessible. Every stand complete. No extras to buy.

As the illustrations show, the motor is placed on the stand in the same way it is fitted in the car—assuming the natural positions as when in the car. All the necessary bolts and clamps to secure the motor to the stand are furnished as part of the complete equipment. A Ford attachment and an attachment for holding three-point suspension motors are also furnished.

After the motor has been clamped on the Continental Engine Stand, it can be completely inverted if desired, or locked in any intermediate position, so that the part of the motor which is to receive attention is brought to the proper working height.

The stand is locked in position by a small steel pin.

Each
Continental Engine Stand—39 in. High, and occupies a Floor Space of 29x36 in. $58 00
Shipping Weight, 265 Lbs.

FORD ENGINE STAND

The Stand is of Heavy Construction, many parts are built of Steel; Is portable, malleable casters being used. The complete engine is held absolutely rigid, and so firmly clamped to the Stand by a bracket on each side of the motor: There is no danger of stripping the threads at the water manifold and thereby letting the motor drop and break.

Each
Continental Ford Engine Stand—34 in. High.....$34 00
Shipping Weight, 115 Lbs.

RADIATOR STAND

The Radiator Stand is an indispensable article to the shop doing repair work, and is one of the biggest time and labor-saving devices ever made. The Clamps which are furnished are covered on the ends with rubber so as not to injure the most highly finished radiators. Is portable, malleable casters being used. Occupies a floor space of 24x26 in.

Each
Continental Radiator Stand—34 in. High.....$27 50
Shipping Weight, 150 Lbs.

WASHING MACHINES

UNIVERSAL ELECTRIC

Cabinet Type, Reversible Wringer

Cabinet handsomely enameled in battleship gray. Removable top, all moving parts enclosed, all electric connections thoroughly insulated, mechanism and motor of ample capacity. Silent running cut gears, enclosed in oil, eliminating frequent oiling. Durable, sanitary, zinc cylinder, reversible type. Length, 18½ in. Diameter inside, 18 in. Weight, 19 lbs. Easily removed and cleaned. Size and construction of cylinder holes prevents possible injury to most delicate fabric. Action combines the advantages of both cylindrical and oscillating type washers. Cylinder automatically locks in position with opening at top when not operating, permitting the easy removal of washed clothes.

The cylinder revolves twice one way and then reverses, revolving twice in the opposite direction, making 18 complete revolutions per minute. There are five maple baffel strips on the inside of cylinder, which carry the clothes up until they fall back of their own weight into the hot suds. This action of hot suds surging through the clothes as they fall washes out all the dirt.

Self-draining galvanized tub. Settling zone in bottom of tub prevents sediment from being forced back into the clothes Drain cock outside of cabinet 10¾ in. from floor.

Sturdy, non-sagging, swinging wringer, reversible type. Equipped with simple safety release. Has four positions and will not operate except when locked in position. Wringer easily detached from washer. Vulcanized rubber rolls 12 in., diameter, 1¾ in. Wringer has double drain board of ample size.

This Universal Washer is guaranteed for one year against defects of material and workmanship. It will give years of faithful service if used according to directions.

No. E-1930—Six sheets capacity. Detachable 20-ft. cord, with rock-off connections. Floor space, 29½x23¾ in. Height to top of tub, 36¼ in. Shipping weight, crated, 250 lbs. ..... Each, $195.00

Orders should specify voltage and whether direct or alternating current If alternating, state number of cycles.

WASH-KOSH ELECTRIC

Cabinet Type, Reversible Wringer, Vacuum System

Cabinet white enamel, trimmed in gray. All moving parts enclosed in cabinet or under guard.

The vacuum system is simple and effective. The action is similar to the old style of hand washing on a wash board, excepting that the destructive rub is left out, while the wonderful dirt-removing suction and pressure of the vacuum are added. The Wash-Kosh will wash blankets or the daintiest laces with equal facility, cleansing both and destroying neither.

The motor and driving mechanism are assembled in one unit, making alignment of all working parts perfect; insuring quick, easy repairs. No belts to slip or to break. Two spring clutches protect motor against overload.

Swinging wringer is at convenient height for easy work. A turn of a handle starts, stops or reverses the rolls.

A simple and easy machine to handle—no cylinders to lift and clean—no ridges and grooves in tub to wear the clothes or to hold water when through washing

The vacuum plunger-cup is driven down and up at the rate of seventy times per minute. This first forces the hot suds and steam through the clothes; then as it comes up produces a natural vacuum that literally draws out the dirt.

The vacuum cup is cast of pure aluminum, and highly polished. It is 7½ in. square, so formed that in each of the four corners there are auxiliary cups. This cup gives a maximum of washing action, resulting in clothes being cleansed in a minimum time.

As the plunger reaches the lower end of its stroke, which is four inches from the bottom of the tub, it gives a quarter turn, thus rotating the clothes so that different garments come under the plunger on each stroke.

The tub is pure copper, tinned inside, of octagon shape. Because of this shape the clothes, as they are rotated, constantly are turned in toward the center, under the vacuum plunger. Settling chamber at bottom of tub catches dirtiest water.

The Wash-Kosh is a full cabinet model. Motor, gears, driving shaft and wringer drive are all inside of cabinet. Crank driving the plunger is under hood on top of machine. Because of this cabinet construction the tub is virtually double jacketed, keeping the water hot longer.

Five-year replacement of any part or parts broken because of defects in material or workmanship.

For nurseries, to wash baby's things, or to wash only a few garments, a large pail can be placed in the tub under the vacuum plunger and operated as though the tub were full.

No. 60—Seven sheets capacity. Swinging, reversible wringer with 12-in. rolls. Size of cabinet, 26½x26½ in., 33 in. high, and 48 in. to top of wringer. One-sixth H. P. electric motor. Shipping weight, crated, 225 lbs.....Each, $165.00

Orders should specify voltage and whether direct or alternating current. If alternating, state number of cycles.

VACUUM BOTTLES LUNCH KITS

The sales on vacuum bottles and lunch kits are enormous and the demand is steadily becoming greater. This increased demand is due to their extreme practicability—guaranteed to keep contents hot 24 hours and cold 48 hours. We show the best known and widely advertised makes.

1Y7859—Tan
} Doz. **$1.10**

VEEDOL
OILS AND GREASES

OILS

Veedol Motor Oil is refined from pure Pennsylvania petroleum by the special and exclusive Faulkner process, which gives Veedol wonderful heat-resisting and wear-resisting qualities. The terrific heat in the engine breaks down ordinary oil and forms sediment. Repeated tests have shown Veedol to resist heat and reduce sediment 80 per cent. That means less friction, less wear on the engine, less oil expense. The highest possible quality.

Veedol Zero-Light flows readily at zero and lubricates in the coldest weather. For use in all types of water-cooled engines.

Veedol Medium possesses superior lubricating qualities when exposed to heat and flows readily in cold weather.

Veedol Heavy has superior heat-resisting qualities and is particularly suitable for use in water-cooled engines which operate at high temperatures.

Veedol Special Heavy has been developed for use in water-cooled engines which operate at high temperatures. Many Fordson and International Harvester tractor dealers recommend it. Many other tractor manufacturers have found by exhaustive tests that Veedol Special Heavy holds up under the most severe conditions and prevents the excessive dilution of lubricating oil in the crank case.

Veedol Tractor Worm Drive is especially adapted for lubrication of Fordson and other worm drives.

Veedol Extra Heavy is manufactured especially for use in air cooled motorcycle engines and some heavy duty engines.

Veedol Trans-Gear is a semi fluid oil for the lubrication of differential and transmission mechanisms where the housings are sufficiently tight to retain it.

GREASES

SAN FRANCISCO, FRESNO OR SACRAMENTO L. C. L. DELIVERY

Veedol Gear Compound retains practically the same consistency throughout the full range of operating temperatures and adheres to such a degree to rotating parts as to assure their efficient lubrication. The leakage of this lubricant, by way of joints in the mechanisms, is less than that of any other.

Veedol Cup Grease is offered in three grades: Light, medium and heavy.

Veedol Graphite Grease may also be obtained in three grades: Light, medium and heavy and is recommended for the lubrication of water pump shafts and spring suspension leaves.

	½ barrel per lb	25-lb can can	10-lb can can	5-lb can can	1-lb can can

VISES

YANKEE

Accurately machined cast iron. May be used on side or end, and may serve as a jig on a drill press, milling machine, etc. Have hardened steel blocks with V-shaped grooves of various sizes for holding irregular shaped work at any angle required. Faces of jaws are of extra hardened steel. Sliding jaws extend through a slot one inch wide in the body of the vise, in one piece, fitted with two steel keys set in the same, making a parallel movement. Screw is ⅝-inch diameter, with Acme thread, and holds rigid, without exerting unnecessary pressure.

BUTLER BROTHERS' 6,000 MILE GUARANTEE

We guarantee all "GORILLA" tires bearing a serial number to be free from imperfections in fabric, workmanship and stock, for a period of 6,000 miles. Should any tire prove defective within the guaranteed mileage, we will, on receipt of the tire, allow the purchaser a credit on a new tire, based on the number of miles the defective tire has been used. Tires are to be returned to us prepaid. If upon examination we find the tire has been tampered with, repaired or retreaded, no credit will be allowed.

When tires are replaced by us, charges will be made at the time the tires are delivered for such amounts as in our judgment will compensate for the services rendered by such replaced tires.

Tires worn out in usual or unusual services, abused knowingly or unknowingly misused, injured through accident or design, are not covered by this guarantee. "GORILLA" tires are not guaranteed to give any definite number of service and we do not claim that they are necessarily the best by any particular test, but we do claim that they are the most reliable tires for their price on the market, and we refer to the users of those tires which tires are not manufactured or who tires not been tires entered in the press as recommended by us

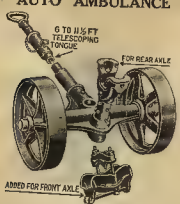
WEAVER GARAGE EQUIPMENT

AUTO AMBULANCE



For Disabled Automobiles

The Weaver Auto Ambulance is a thoroughly practical and universal device for economically transporting disabled automobiles to the repair shop. It is extremely strong, but all unnecessary weight has been eliminated, so that it may be placed in the service or towing car and carried to the wreck. By removing or replacing one bolt, the tongue may be taken from or placed into the Ambulance frame.

It can easily be handled by one man and can be quickly and securely attached to either the front or rear axle of any car. The height of the standard may be varied as conditions demand, by a heavy pin. The length of the tongue may be varied at will, from 6 feet to 11½ feet.

Provision is made for attaching the axle of the car firmly to the Ambulance, so as to prevent any play at the connection. The main frame housing is designed with provision for placing the standard, either in front of the Ambulance axle or back of it, which is vitally important for a universal towing device.

Fourteen-inch cast steel wheels with three-inch face and roller bearings enable this Ambulance to withstand the severest service and to tow very heavy loads.

The construction throughout is extremely strong, but designed to eliminate all unnecessary weight. Telescoping tongue is of double strength steel tubing; 1¼-inch steel axle extends entirely through the malleable iron frame; malleable iron saddles; 20-inch tread.

Weaver Auto Ambulance—Shipping weight complete, 140 lbs. ..... Each, $60.00

TOWING POLE

A Rigid Cushioned Coupling for Towing Automobiles

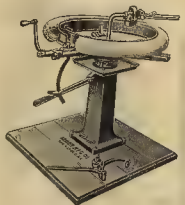
The danger and inconvenience of towing disabled cars is practicaly eliminated by the Weaver Towing Pole.

The heavy coil spring is applied in such a manner that it cushions both pulling and ramming shocks so that there is no jerk or jar on either car. The connecting clamps are equipped with heavy steel chains, 30 inches long, with a secure spring-latch.

The Pole telescopes and is adjustable from 5 feet 6 inches to 8 feet. It is made of double strength steel tubing.

Weaver Towing Pole—Shipping weight, 30 lbs. Each, $20 00

UNIVERSAL TIRE CHANGER



For dismounting and remounting all styles and sizes of pneumatic automobile tires.

The most difficult tires can be changed in a small fraction of the time usually required by more primitive methods.

Every operation in the handling of tires by this Universal Tire Changer is done by means of smooth finished rollers. There is positively no possibility of injuring either the casing or rim, even in the most stubborn cases.

No Pounding, No Jamming, No Cutting

This equipment has been very carefully designed, with a view of eliminating the separate individual tools which have been so common, and to have a compact, easily operated machine that will perform all operations with the fewest number of parts.

Weaver Universal Tire Changer—Shipping weight, 180 lbs. ..... Each, $120.00

AUTO HOIST

Single or Double Suspension—Worm Hoist—Ball and Roller Bearing Casters

One of the most convenient and useful articles of garage equipment on the market. Note particularly the unobstructed space under the car, allowing ample room for two or more mechanics to work with absolute freedom.

The peculiar design of this Hoist permits it to be operated in very cramped quarters. It can be run into position over a car in a crowded shop without requiring more than 12 to 14 inches space on either side of the car.

The frame is designed so as to permit the height of the arch to be increased approximately 12 inches, allowing the uprights to be raised to the desired height in the braces on either side, by means of the chain hoist. This increased height enables the Hoist to raise the rear end of a limousine or a touring car with the top up, for removing the rear system.

One chain of the Hoist may be carried over the pulley in the center of the frame for performing work which can be handled to better advantage by a single suspension than by a double suspension from each corner of the frame, as shown in illustration.

Each chain before being mounted in the Hoist is subjected to an individual test.

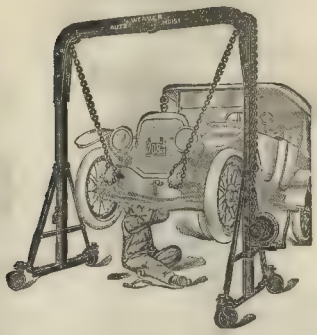
The hoisting mechanism is operated by worm drive, which is absolutely safe and positive. There are no gears nor ratchets to slip or break and allow the load to fall.

Weaver Auto Hoist is carried upon four ball and roller bearing casters 5 inches in diameter. The construction throughout is of steel, giving the greatest possible strength in comparison with its height. Height, 8 feet to 9 feet.

Weaver Auto Hoist—Shipping weight, 575 lbs. Each, $200 00

SEATTLE HARDWARE COMPANY

Kelley-How-Thomson Co. of Duluth
AUTO HOISTS



WEAVER

Single or Double Suspension—Safety—Worm Hoist—Ball and Roller Bearing Casters

This is one of the most convenient and useful articles of garage equipment on the market. Note particularly the unobstructed span under the car, allowing ample room for two or more mechanics to work with absolute freedom.

OCCUPIES SMALL AREA

The peculiar design of the Hoist permits it to be operated in very cramped quarters. It can be run into position over a car in a crowded shop without requiring more than 12 to 14 in. space on either side of the car. Contrast this with the space required to transport the ordinary type of crane sometimes employed for work of this kind.

GREAT RANGE OF APPLICATION

There is no work which can be performed by the ordinary block-and-tackle or crane which cannot be performed to better advantage by the Weaver Auto Hoist. This Hoist can also be adapted to many conditions absolutely impossible to meet with the equipment mentioned above.

TELESCOPING FRAME

The frame of the Weaver Auto Hoist is designed so as to permit the height of the arch to be increased approximately 12 in. allowing the uprights to be raised to the desired height in the braces on either side, by means of the chain hoist. This increased height enables the Hoist to raise the rear end of a Limousine or a Touring Car with the top up, for removing the rear system.

SINGLE SUSPENSION

One Chain of the Hoist may be carried over the pulley in the center of the frame for performing work which can be handled to better advantage by a single suspension than by a double suspension from each corner of the frame.

SAFETY

In designing this Hoist we have taken particular pains to provide a very great margin of safety. The all-steel construction throughout is much heavier and stronger than is absolutely necessary to enable it to satisfactorily perform the work demanded of it in the ordinary garage.

Each Chain, before being mounted in the Hoist, is subjected to an individual test.

The hoisting mechanism is operated by worm drive which is absolutely safe and positive. There are no gears nor ratchets to slip or break and allow the load to fall.

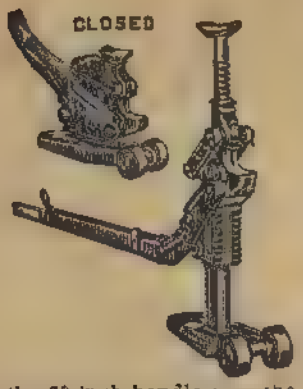
CONSTRUCTION

Weaver Auto Hoist is carried upon Four Ball and Roller Bearing Casters 5 in. in Diameter which permit it to be transported with perfect ease. The construction throughout is of Steel, giving the greatest possible strength in comparison with its weight.

Ea ch

Weaver Auto Hoist—Height 8 ft. to 9 ft.; Shipping Weight About 500 Lbs. $125.00

GARAGE JACKS
RANDALL



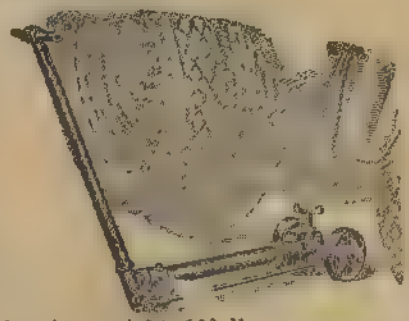
A heavy tool made to stand up under the continuous knocks of the garage and service station, and to meet the demand for a powerful, substantially built, quick acting device capable of doing heavy work efficiently and, well. Leverage of handle 60 inches. Capacity 2000 to 3000 lbs. Lowest lift main jack, 10½ inches; highest lift, 24½ inches; lowest lift to extension, 4½ inches; highest lift, 15 inches.

Action

One upward motion lifts the swivel head or housing into proper position. One downward sweep of the 60-inch handle lifts the car instantly. Releasing the tripping latch permits of lowering the load. Upward kick on ball pawl drops housing and the jack can be withdrawn.

No. A-6110 .....**Each $25.00**

NEW-WAY
WEAVER



A strong, compact, easily operated, quick actioned lifting and transporting jack. Length of frame and wheels over all is only 40 inches. The great distinguishing feature of this jack is the pivoting wheels that are guided and controlled by the handle. The enormous leverage of this jack enables one man to lift 5000 lbs with perfect ease. Capacity, 5000 lbs; maximum lift, 19 inches; shipping weight, 100 lbs.

F. o. b. factory.....**Each $54.00**

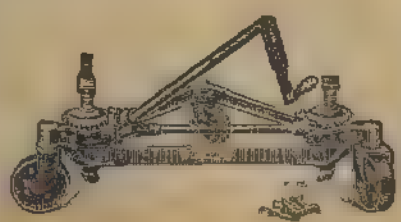
AUTO TWIN
WEAVER

Provides the most efficient and practical means of handling complete or dismantled automobiles in the garage, or repair shop. With this one man can readily manipulate a car in any desired manner. Designed to take either front or rear axle of the car even though the latter be equipped with truss rods. 34 inches between wheels; lifting leverage, 400 to 1; capacity, 4000 lbs; shipping weight, 50 lbs.

F. o. b. factory .....**Each $24 00**

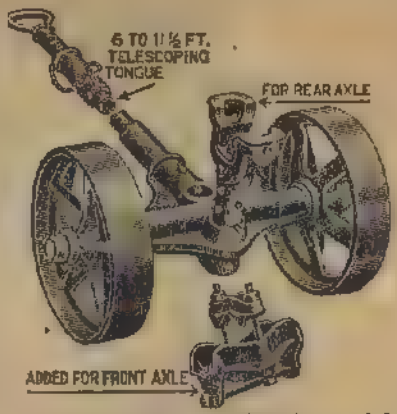
EXTRA HEAVY AUTO TWIN
WEAVER

Identical in principle with the small car size auto twin jack, but has twice the strength and capacity. Extra large 6½-inch wheels with roller bearings enable heavy loads to be transported over comparatively rough floors. Capacity 8000 lbs; shipping weight, 110 lbs.



F. o. b. factory.....**Each $41.25**

AUTO AMBULANCE
WEAVER



Invaluable for transporting disabled automobiles to the repair shop. Can be quickly and securely attached to either the front or rear axle of any car. The height of the standard may be adjusted as conditions demand and the length of the telescoping tongue can be varied at will from 6 to 11½ feet. Equipped with cast steel wheels 14 inches in diameter with 3-inch tires. Telescoping tongue is of double strength steel tubing and adjusts every 6 inches to 11½ feet. Shipping weight, 140 lbs.

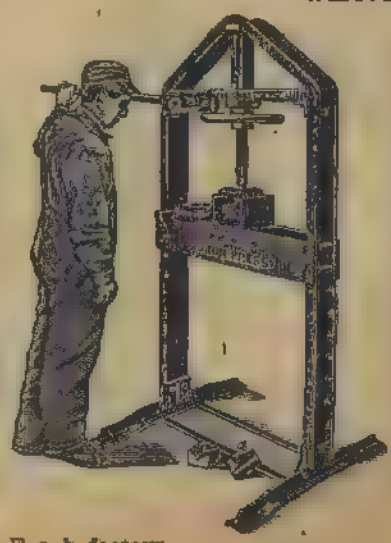
F. o. b. factory.....**Each $57.00**

TOWING DOLLY
KIMKIN

The large annular ball bearings on which it rolls, combined with its rugged construction, make an assembly which will tow the lightest touring car or the heaviest truck with ease and safety. The material and construction of the Kimkin dolly make it practically indestructible. Ball bearing wheels, heavy cast brass hub caps and grease retainers. It is equipped with 15x3½-inch Goodrich solid tires which make for easy riding over rough roads.

Net weight, lbs..... 275
Kimkin Dolly .....**Each $150.00**

TWENTY-TON PRESS
WEAVER



The design of the leverage mechanism supplies a leverage of 3000 to 1, which enables a pressure of 20 tons to be secured with very little effort. The bolster which carries the plate can be set at any desired height and will permit work of enormous size to be placed in the press when set at the bottom of the frame. The width between frame uprights is 32 inches. The frame is of one piece of heavy 5-inch channel steel, hand wheel is 15 inches in diameter, carried upon ball bearings. Screw is 2 inches in diameter and has a range of movement of 9 inches. The screw does not revolve. Floor space, 36 by 36 inches, height 74 inches. Shipping weight, 440 lbs.

F. o. b. factory.....**Each $135.00**

CONTINENTAL MOTOR STAND

A universal stand. Will handle Ford motors, three-point and four-point suspension motors, in fact any kind of passenger car, truck or tractor motor. The motor is placed in the stand the same way it is fitted in the car, assuming the natural position. All the necessary bolts and clamps to fasten the motor to the stand are furnished as part of the complete equipment. A Ford attachment and an attachment for holding three-point suspension motors are also furnished.

The stand is provided with strong double-wheel casters, and can be readily turned to any position to get the best light on such parts as need attention.

The Continental is the only stand on the market today in which you can fasten a complete Ford unit power plant direct to the stand and tear down or rebuild it without changing the stand. It is adjustable in height from 32 inches to 37 inches; in width, from nothing to 30 inches, and occupies a floor space of 29x36 inches when fully extended. Shipping weight, 290 lbs.

No. 14C27—Stand complete $85.00
No. 14C28—Stand less Ford attachment..... 76 00
No. 14C29—Stand for Fords only..... 77.25

CONTINENTAL REAR AXLE STAND

This stand is universal and will handle any and all types of axles both front and rear. Every shop that is doing repair work will find that one of these stands will pay for itself in a very short time and labor and time saved and in better workmanship. The stand is heavily constructed, is 34 inches in height and takes up a floor space of 12x22 inches. The grease pan is of heavy cast iron and is easily cleaned. The chain vise will take care of all sizes and types of axles, and being adjustable conforms to the shape of the housing. The support opposite the vise locks in position when in use and when separating a semi-floating axle it may be unlocked and drops down so as to allow one housing to be readily removed. Shipped knocked down, crated flat. Shipping weight, 180 lbs.

No. 14C32 ..... Each $52.75

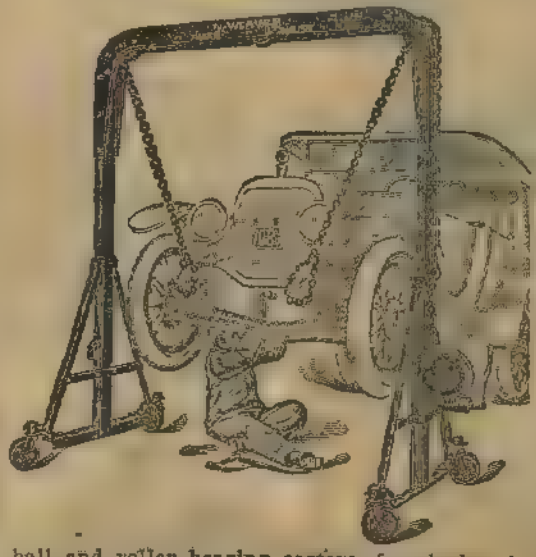
CONTINENTAL FORD ENGINE STAND

The only stand in which you can place a complete Ford unit power plant, and tear it down to the stripped cylinder block and rebuild it without having to change its position on the stand. In fact, it is the only stand on the market that will handle the complete Ford power plant. After the complete motor is placed in the Continental Ford Engine it can be turned to any position and firmly locked. It is of heavy construction; many parts are built of steel. Every stand is portable, malleable casters being used. The height is 34 inches, which is correct for efficient wo[illegible] Shipped knocked down, carried flat. Shipping weight, 140 lbs.

No. 14C30 ..... Each $45.75

AUTO HOIST

Single or Double Suspension, Safety Worm Hoist, Ball and Roller Bearing Casters.



The frame of this hoist is designed so as to permit the height of the arch to be increased approximately twelve inches. This increased height enables the hoist to raise the rear end of a limousine or a touring car with the top up. The hoisting mechanism is operated by worm drive, which is absolutely safe and positive. The hoist is carried upon four ball and roller bearing casters, five inches in diameter, which permits it to be removed with perfect ease. The frame is of 5-inch channel steel. Height 8 to 9 feet. Capacity 3000 lbs. from the center 1500 lbs.

Shipping weight, lbs..... 575
Each—F. o. b. factory..... $125.00

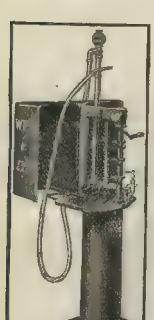
GASOLINE STORAGE OUTFITS



Open

WESTERN ROADWAY

Pumps and Tanks are Tested, Inspected and Labeled by the National Board of Fire Underwriters

Cabinet—The Cabinet Encasing Pump is Built of $\frac{5}{16}$ inch Iron; the Doors Overlap, making it Weather Proof; Doors are Fitted with Best Corbin Six-Tumbler Lock; a Small Door at Bottom of Pedestal Gives Access to Pipe Union.

Pump—Is of our Long Distance Type, Adjusted to Measure Gallons, Half-Gallons, Quarts or Pints at a Stroke; is Built Entirely of Metal with Cylinders, Valves, Plunger Rod and Stuffing Box of Brass; Cut Steel Gears; Balance of Pump is of Heavy Cast and Wrought Iron; Requires but Two and One-half Turns of the Handle to Discharge a Gallon, Giving Pumping Capacity of 13 Gallons per Minute.

Gallon Meter—Keeps an Accurate Check on All Gasoline drawn up to 9999 Gallons, at which point it reverts to 0000, making it a Continuous Meter. Every Tenth of a Gallon is Shown in Red Figures, so Value of Oil may be computed in 10ths if sold in small quantities.

Gravity Filter—Is Attached Below Pump Cylinder and made an integral part of Pump. It Strains the Gasoline from Water and other Impurities, which Gravitate to Settling Chamber and is Drawn Off Through Auxiliary Pump which is Attached to Pump Plate. This Pump is Securely Locked when not in use.

Discharge Register—This Device Automatically Tallies Every Gallon Pumped from 0 to 10 Gallons and is Reversible from Any Point.

Independent Discharge Nozzles—Pump is Fitted with Discharge Openings on Either Side, One for Attaching Hose, the Other for Filling Cans, the Discharge Openings being Entirely Independent of Each Other

With Indicator Adding

Hose Draining Valve—The 1 inch Discharge Pipe Extends 24 inches Above Pump and Terminates in a Hose Draining Valve that Automatically Shuts Off the Supply and Allows the Hose to Drain Out Clean.

Hose and Filling Nozzle Each Outfit comes Equipped with 5 ft. of 1 inch Steel Lined Hose and Open Type Filling Nozzle with Strainer. Filling Nozzle End of Hose is Locked in Cabinet when Not in Use.

Automatic Door Stop—Holds Door Rigid While Operating Pump.

Removable Pump Handle—Handle Can be Slipped Off and Carried in the Building, Making Pump Fool and Meddler Proof.

Quantity Stops—Are Located in Front on Pump Standard; to Change Measurements, it is but Necessary to Push in the Nickeled Disc Stamped with the Quantity Desired, Give Grip Stroke of the Handle and the Exact Amount is Obtained.

Finish Pump and Cabinet are Highly Finished in Vermilion Enamel with Gold Lettering and Nickel Trimming.

Tanks—Are Built in Any Capacity of Either 12 or 14 Gauge Galvanized Steel, Riveted and Soldered Throughout.

WRENCHES

DROP FORGED

The Wrench Sets shown on this page and on the following pages are particularly adapted for the automobilist, the garage and the machine shop. Each wrench is fully described with the idea of making it easy to make the right selection.

Finished Versus Semi-Finished Wrenches—The manufacturer of Drop Forged Wrenches informs us that the only difference between the finished and semi-finished wrenches is that the finished wrench has the mottled polished finish. In all other particulars, such as case hardening, accuracy and utility, the semi-finished wrench is equal to the finished.

E-Z Ball Washer

HIGH SPEED BALL BEARING

In the construction of the "E-Z" Ball Bearing High Speed Washing Machine, we have embodied every possible convenience and advantage that mechanical ingenuity and skill can produce in a high-class washing machine.

During our forty years' experience in the manufacture of highest quality family sewing machines, with which the whole world is now familiar, we have established an enviable reputation. This same skill and ingenuity this invaluable experience of two score years, has enabled us to produce the "E-Z" Washer a machine that stands at the head of all strictly first-class, high speed washers

All metal parts are finished with the electro galvanizing process—it is an attractive finish that will not wear and cannot rust

The "E-Z" Washing Machine runs so easily that a mere child can operate it

The "E-Z" Washing Machine is guaranteed against defective workmanship and material for a period of five years.

The tub is strongly built of well finished, select material—with reasonable care it will last for years.

The ball bearing is a simple and most effective device. It is absolutely the easiest running bearing that can be made, and is so constructed that it will wear for years without oiling or adjustment.

The compound lever construction in connection with the Walking Beam, and the exclusive ball bearing gives the "E-Z" such a decided advantage that it requires but one-half the labor to operate it that is necessary with other makes

This style, namely the high speed washer with balance wheel, has proved to be the most practical and easiest running washing machine devised The improvements we have embodied in the "E-Z" Washer, place it in the van of machines of this particular type

Capacity—Standard family size washing, six sheets or their equivalent in other clothes. A wringer box is provided so any hand wringer can be attached to the tub. Shipping weight about 110 lbs. Shipped from Illinois Factory

B-106 E-Z Washer **$17.95**

"Wonder" Power Washing Machine

FOR POWER OR HAND

ALL GEARS ENCLOSED

FULLY GUARANTEED FOR FIVE YEARS

Superiority in construction, operation, workmanship and finish is what we claim for our "Wonder" Power, or hand, Washing Machine. **FINISH.** The tub is made of the very best quality of selected Cypress—"the wood everlasting." Cypress will last longer and give better satisfaction in a washing machine than any other wood. The tub is finished nicely with legs being well braced to prevent breakage. It is especially heavily reinforced at top, making it impossible to warp Can be used with power or by hand. The handle is easily reached and allows operator to work machine by hand while standing or sitting. The machine is beautifully finished, and fully guaranteed for five years. Shipping weight about 95 pounds.

Carefully crated and shipped direct to you from Iowa Factory.

B-2316—"Wonder" Power Washing Machine.....

FOR ADDITIONAL WASHING MACHINES SEE PAGE 123.

E-Z Vacuum Washer

The E-Z High Speed Vacuum Washer embodies all of the features and improvements necessary in a modern washer of the highest type. These are—strength and simplicity of construction, extreme ease of operation, durability, good appearance and excellent finish. The simple, compact mechanism is attached to the cover and is so evenly balanced that the cover may be opened and closed with minimum effort All metal parts have rust-proof, electro galvanized finish, which will last for years.

The Vacuum Cups. The clothes are thoroughly cleansed by the three large vacuum cups, which force the hot suds THROUGH the clothes, while by means of an ingenious indexing device the position of the cups is changed at every stroke, so that all the clothes are thoroughly washed. The finest and tiniest articles can be washed without damage, as the cups are perfectly smooth and the clothes cannot catch on them and be torn

The Tub is made of the very best quality of selected Southern cypress— the wood everlasting." Cypress will last longer and give better satisfaction in a washing machine than any other wood The tub is finished nicely with good quality varnish and is very strong in construction, the continuous legs being well braced to prevent breakage.

Ease of Operation. This machine runs so easily that it can be operated without extra effort by a child of eight or nine years of age. When loaded it runs as easily as do most machines when empty

Shipping weight about 110 lbs. Shipped from Illinois Factory.

B-107 E-Z Vacuum Washer..... **$18.50**

VACUUM POWER WASHER

With Swinging Wringer

For Engine or Electricity

Our Vacuum Power Washer is constructed of the very best of materials and is positively guaranteed to wash any and all clothes as clean as any washer on the market regardless of price. It can be operated by gasoline engine or motor. It is a machine which pleases every careful housewife. It washes the finest laces, lace curtains, silk shirts, shirt waists, as well as all heavier and all colored clothes Many are the days and hours you will rejoice having selected this pattern. The machine is well built, strong and durable and operated exclusively by gears. By raising the lid the washer stops and by lowering it, it starts.

The dome shaped vacuum cup 10¾ inches in diameter, made from one-piece galvanized steel with an extra air chamber soldered inside, makes about 95 strokes, each 4 inches long, per minute. This draws and forces the dirt out of the clothes without wearing or tearing them

Our machines possess every practical feature that the most exacting and careful purchaser demands, including a reversible wringer, special feature for stopping the machine, extra sliding rack and an adjustable height platform. This machine can be furnished with a 1-3 H. P. motor to be used with electricity. Note prices. They are guaranteed to perform the same service as machines selling for twice the price, and will out last many similar machines of their kind. Shipping weight 225 pounds. Shipped direct to you from Illinois factory.

B-8372—Vacuum Power Washer, complete..... **$52.50**

B-8373—Vacuum Power Washer, complete with 1-3 H. P. motor, cord and plug **$7.00**

THE MOST BEAUTIFUL CAR IN AMERICA

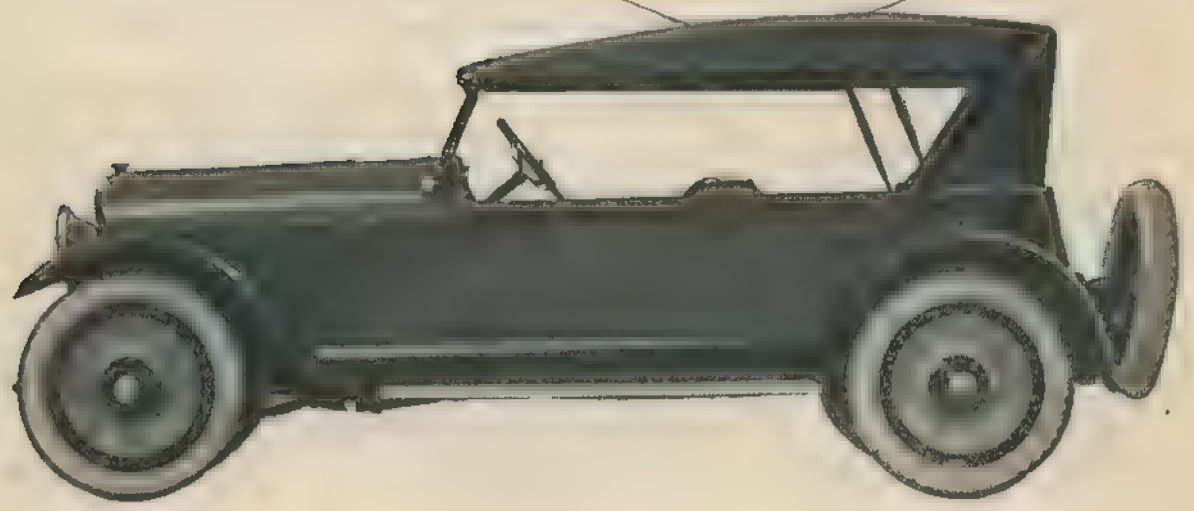
THE "Larchmont" Four Passenger Model has been called the ideal "Young Man's" Car, but it appears to have just as many friends among the older folks.

It is smart—there can be no question about that—but it is the smartness of good taste and refinement. It both looks and acts the part of a thoroughbred.

Please remember that the production schedule on this model is limited. Our dealer will be in much better position to meet your requirements in regard to delivery if you place your order now.

PAIGE-DETROIT MOTOR CAR CO. DETROIT

Manufacturers of Motor Cars and Motor Trucks



The P & H Excavator-Crane

AS A DRAGLINE

The P & H excavator-crane is a super standard dragline machine It has a 30-foot boom ½ yard dragline bucket with a 9,500 pound dragline pull,—an operating speed of 100 feet per minute and non-clogging corduroy traction.

AS A BACKFILLER

Equipped with a self acting scraper bucket an operator (not a licensed engineer) and one man can backfill large quantities of material in a day. Operating expense is low All steel construction and careful supervision reduce breakdowns to a minimum

AS A CRANE

Equipped with a hook or other grappling device the P and H instantly becomes a handy man on any job. It has ample power and does not require a licensed operator to run it.

AS A CLAM SHELL

For convenience and economy the P and H excavator crane equipped as a clam shell is in a class by itself For handling any loose material you have a machine that you will recognize at once as being efficient and economical

THE BRIDGE THAT SPANS MIGHTY GAPS OF COMMERCE

WHEN that fragile thing, the bank check, is viewed not as an inanimate piece of paper, but as the link that brings together the buyer and the seller and sums up all the work between raw material and finished product, banking takes on a new meaning.

WHEN the check or draft becomes the medium uniting the wool grower of Montana or the cotton grower of Texas with manufacturers elsewhere in the country, and the manufacturer with the exporter to foreign lands, it is a vital and mighty instrument, capable of bringing the ends of the Earth together.

WE try to train our employees to see with the eyes of the imagination the significance of the thousands of checks that go through the bank each day and the important part these instruments play in the world trade. An employee who comprehends the scope of a great bank's business can meet the needs of customers intelligently and communicate to them the spirit of the institution.

Schoenhut Toys

Made in U.S.A. Since 1872

American Ingenuity and Invention

The All-Wood Doll

The Schoenhut ALL-WOOD Doll is the greatest of all the Schoenhut inventions—an American-made doll that has proved to be far superior in every way to any doll ever imported from foreign Dolldom. It is almost unbreakable being made entirely from wood, and fully jointed with patented steel spring hinges having double spring tension and swivel connections. The parts are held tightly together, yet the joints are so flexible that the doll can be placed in any position and will stay as placed. Having no elastic cord, this doll never requires restringing. It is painted with enamel oil colors that do not come off. These dolls come with the finest quality mohair wigs, or with hair carved on wooden heads and painted natural colors. Your little ones can never know the full joy and pride of doll possession until they own a Schoenhut All-Wood Doll. If your dealer cannot supply you, we shall be glad to do so direct from the factory. Send for illustrated doll booklet.

The Walkable Doll

Schoenhut's Walkable Doll (the latest addition). An All-Wood Doll that can be led by the hand and will walk like a real little tot. Ask your dealer to show you a Schoenhut All-Wood Walkable Doll.

Alphie Blocks

The Schoenhut Alphie Blocks are cute, chubby, attractive little creatures, each of which has a separate personality to endear itself to the children's mind. In shape the blocks present the semblance of human figures. They are handsomely lithographed on both sides—one side of the child, the other a happy little animal, each block a different design. A different letter of the alphabet appears on the front and back of each block, so arranged that a half set provides a complete alphabet. They are made of hardwood, 5" high, 2½" wide and about ¾" thick. Flat on the tops, bottoms and sides, they can be used in innumerable ways for building, spelling, ten pins, etc. Several rubber balls come with each set.

Toy Pianos

The Schoenhut Toy Piano has accurate notes. Real tunes can be played upon it. The keys are the same width as on grown-up pianos, so that the child learns to spread her fingers properly. Schoenhut toy pianos are sold in practically all toy dealers and music stores. There are 42 variations of sizes and styles, ranging in price from $1.00 to $40.00 each. They should not be ordered from the factory as it is not practical to ship them by parcel post.

Humpty-Dumpty Circus

Schoenhut's Humpty-Dumpty Circus Toys are universally acknowledged the most amusing unbreakable toys. Clowns, elephants, donkeys, horses and all other animals, animals and people can be made to do the very same tricks that are seen in the "big" circus. The figures are made of wood and wood, fully jointed with strong steel spring hinges. Start a circus with a few pieces and keep adding to it until your "greatest show on earth" is completed. Sold in sets from $1.00 to $20.00 according to the number of pieces. If your dealer cannot supply you, send us his name and we will mail you an illustrated catalog free.

Look for the Name "Schoenhut"

With Schoenhut Toys in all good stores, no mother need put in the hands of her child cheaply constructed toys that break a few days after Christmas. Every Schoenhut part that comes off is one that can be fixed so the child is growing the right. Every Schoenhut Toy means satisfaction to every child who owns one. Look for the name Schoenhut which appears on every genuine package.

Your home—and its hardware

IN planning that new home, are you giving the thought to hardware which it should have? You are building for permanence, your hardware should be durable—possessing built-in wearing quality. You are building with an eye for beauty, your hardware should be pleasing and in accord with its surroundings.

In Sargent Locks and Hardware you find all this—security, permanence, ease of operation, and a choice of design which fits in exactly with your scheme of architecture.

Send for the Sargent Book of Designs and go over it with your architect

STANDARD EIGHT
A Powerful Car

Meeting Every Demand of the Road

THIS car, which unfailingly responds to every demand made upon it, has won a superior position. The mechanical perfection of the Standard Eight permits that faultless operation which reduces driving effort to the minimum.

One may keep pace with slow-moving traffic or hold the open road with the same ease. The Standard Eight will answer demands which the average car owner will seldom even attempt to make.

Well-balanced, powerful, and light, with perfect finish and appointments, the Standard Eight is a car which carries pride of ownership under any circumstance.

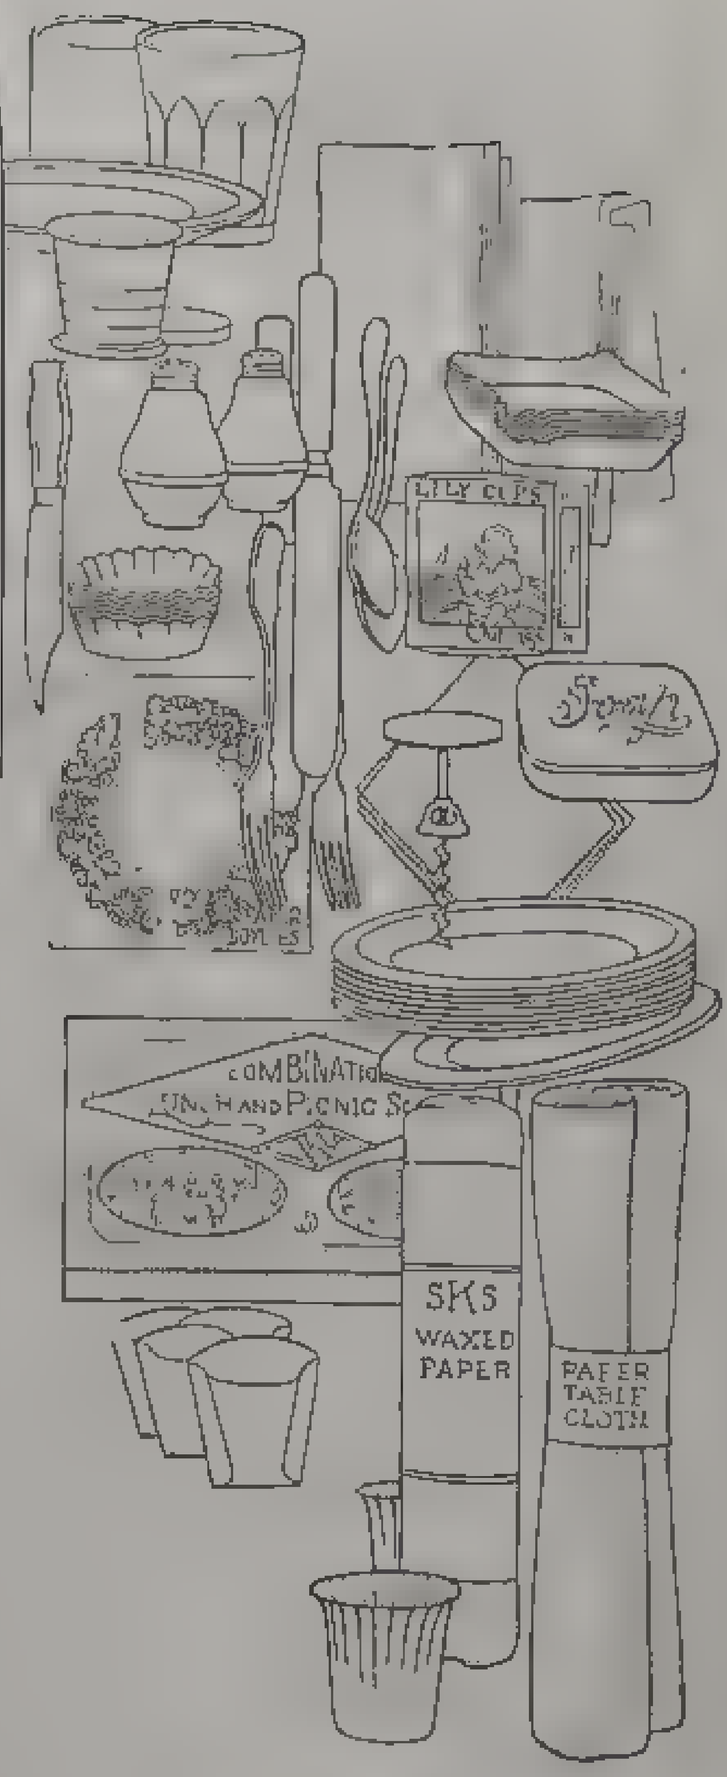
STEINWAY

The Instrument of the Immortals

IN those homes where the compositions of the Immortals are known and loved and kept living—where fine music is daily food for the soul—there you will find the Steinway. It is but natural that this, the piano of the Immortals—the choice of such men as Liszt and Wagner and Gounod—should be also the choice of those who know and love and cherish their music.

STEINWAY & SONS, Steinway Hall, 107-109 E. 14th St., New York

Subway Express Stations at the Door



For Picnic Days

There's a cool shady spot on the river's bank. And the breeze that is rustling the leaves carries a breath of woods and grass—of peace and contentment. It's the ideal place to picnic.

But for any picnic to be a real success, there's something more needed than the ideal place to hold it. For what's a picnic without lunch and the proper picnic settings and trimmings?

You need paper tablecloths and napkins, paper plates and cups, knives, forks, spoons and so many other things.

And you can buy these articles well and economically at Kresge's—and so quickly too.

They're all on open counters before you. You pick out whatever you need, hand the items to the girl to wrap and as far as the lunch accessories are concerned, you're ready for the picnic.

And while you're at the Kresge Store, just notice how many other articles you can buy.

The values offered are possible for you only because of the immense Kresge buying power and the Kresge method of doing business.

The delicious flavor of

Baker's Cocoa

appeals strongly to children, because it is the natural flavor of high-grade cocoa beans without additions. Frequently a child's taste is exceedingly discriminating, as it is unspoiled.

A celebrated dietitian says:

"Chocolate is a perfect food, as wholesome as it is delicious . . . . . It is highly nourishing and easily digested, and is fitted to repair wasted strength, preserve health and prolong life. It agrees with mothers who nurse their children."

WESTERN Of Course

THE BEST THE WORLD PRODUCES
WESTERN
EARTH AND STONE HANDLING MACHINERY

"WHAT wagons am I using? Why Western, of course. I wouldn't have any other on the job."

This Ohio road contractor was loading 15 Western 2-Yard Dump Wagons in 9 minutes. The Western Dump Wagon should be an indispensable part of every contractor's equipment.

A Few Points of Western Superiority

Can be operated by any boy who can handle a team.
Dump the load instantly without stopping.
Large dump opening. Two yards can be dumped in one place without coming in contact with wagon body.
Built strong and light running. Easy on team.
Bed remains in balance on uneven ground.

Whatever your contract you will need Western Dump Wagons. Compared with old-style stick wagons they soon will save their cost. Contractors tell us they are the best all-around dump wagons on the market. Whether used with the Western Elevating Grader and Wagon Loader or with steam shovels, they will stand up under the hardest kind of use.
